External Merchandise Trade Statistics

3rd Quarter 2026

1. Introduction

This issue of Economic and Social Indicators presents external merchandise trade statistics from the first to third quarter of 2026 and the years 2025 and 2024. These statistics are compiled from declarations lodged at the Customs Department of the Mauritius Revenue Authority (MRA), by importers and exporters. Some of these declarations are usually revised at a later period and corrections are made accordingly on the computerised database of the Mauritius Revenue Authority (MRA).

Figures for 2026 are still provisional and subject to revision as and when the Customs Department of the MRA submits latest amendments to Statistics Mauritius.

Data on external merchandise trade are compiled as per the recommendations of the United Nations General Trade System. According to this system, all goods entering and leaving the national frontier, including trading activities of the Freeport zone should be accounted for.

2. Total value of trade and trade balance

Total external merchandise trade for the third quarter of 2026 was valued at Rs 122,801 million, i.e. 2.0% lower than the value of Rs 125,290 million of the previous quarter and 20.6% higher than the value of Rs 101,804 million of the corresponding quarter of 2025.

For the third quarter of 2026, total exports (inclusive of ship's stores & bunkers[1]) were valued at Rs 31,642 million against total imports of Rs 91,159 million. In the second quarter of 2026, total exports (inclusive of ship's stores and bunkers) amounted to Rs 28,887million against total imports of Rs 96,403 million. Compared to the previous quarter, total exports were higher by 9.5% and total imports were lower by 5.4%. While compared to the corresponding quarter of 2025, total exports and total imports were higher by 16.5% and 22.1%, respectively.

The resulting trade deficit for the third quarter of 2026 worked out to Rs 59,517 million, 11.8% lower than the deficit of Rs 67,516 million of the previous quarter and 25.3% higher than the deficit of Rs 47,482 million of the corresponding quarter of 2025.

Figure 1: Total External Merchandise Trade, Jan - Sep 2025 & Jan - Sep 2026

Notes

(1) Scope and coverage

External merchandise trade statistics are compiled according to the General Trade System as recommended by the United Nations. Using the national boundary as the statistical frontier, the General Trade System is a record of all goods entering (imports) and leaving the country (exports).

Imports include goods brought in directly for domestic consumption plus goods imported into customs bonded warehouses.

Exports cover:

- Domestic exports defined as goods of national origin, that is goods produced in the exporting country.

- Re-exports which are exported in the same condition as imported or after undergoing minor operations which leave them essentially unchanged and include re-exports from customs bonded warehouses.

- Ship's Stores and Bunkers (SSB) are included in total exports and are shown separately.

Trade by parcel post is also included in imports and exports.

(2) Valuation

Imports are valued on a C.I.F. (Cost, Insurance and Freight) basis, whilst exports on a F.O.B. (Free on Board) basis.

Cost, Insurance and Freight (C.I.F) value is the value of a country's imports of goods, including all charges for transporting and insuring the goods from the country of exports to the given country but excluding the cost of unloading from the ship, aircraft unless it is borne by the carrier.

Free on Board (F.O.B) value is the value of a country's exports of goods, including all costs of transporting the goods to the customs frontier, export duties.

(3) Classification of commodities

Commodities are coded according to the **Harmonised Commodity Description and Coding System Nomenclature (HS 2022)**. However, for the purposes of economic analysis and to facilitate international comparison of trade by commodity data, the commodities are also classified according to **the Standard International Trade Classification (Revision 4) (SITC Rev. 4)**. The HS and the SITC Rev. 4 are six- and five-digit codes respectively but have been extended to eight and seven digits to accommodate national requirements.
