The Producer Price Index for the manufacturing sector (PPI-M) registered an increase of 0.4 point or 0.4 % from April 2020 to May 2020. This increase was mainly due to higher prices in “Printing and reproduction of recorded media” and “Other transport equipment”.

Compared to May 2019, the PPI-M for May 2020 was higher by 3.1 points or 2.8%.

It is to be noted that the above figures are provisional.

Revised figures are usually published on a quarterly basis at
