Instructions to enumerators

INTRODUCTION

This is the second and last volume which will be issued in connection with the 1962 Population Census.

It is divided into two parts: Part I relates to Mauritius and Part II to Rodrigues.

PART I : Section I contains an analysis of the economically active population of Mauritius by industry, status and sex and by occupation and sex. Data are given both for the major and for the minor groups of the International Standard Industrial Classification and of the International Standard Classification of Occupations.

Section II gives detailed information about the population of each town, village and hamlet by geographical districts and village council areas.

Villages and hamlets have no legal boundaries and it is probable that from one census to another different boundaries have been assigned to the same locality.

Section III gives the results of the housing census which was taken between March and mid-May 1962, during the preliminary stage of the population census. It contains data on households, buildings, dwellings, occupancy and tenure and on housing conditions.

PART II: Section I gives the population of each locality of Rodrigues and Section II the findings of the housing census which was taken during the second fortnight of May 1962.

As far as feasible, the recommendations of the various agencies of the United Nations Organisation have been closely followed in drawing up the different tables published in this report.

Part in Savanne (page 40)

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is crucial for ensuring the integrity of the financial statements and for providing a clear audit trail. The document also notes that proper record-keeping is essential for identifying and correcting errors in a timely manner.

2. The second part of the document focuses on the role of the accounting department in the overall business operations. It highlights that the accounting team is responsible for providing accurate and timely financial information to management, which is necessary for making informed decisions. The document also discusses the importance of maintaining strong relationships with external stakeholders, such as banks and tax authorities, to ensure the smooth operation of the business.

3. The third part of the document addresses the challenges faced by businesses in the current economic environment. It notes that many companies are struggling with increased competition and fluctuating market conditions. The document suggests that businesses should focus on improving their operational efficiency and reducing costs to remain competitive. It also emphasizes the importance of staying up-to-date on industry trends and regulations to avoid potential pitfalls.

4. The final part of the document provides a summary of the key points discussed and offers some recommendations for businesses. It suggests that businesses should prioritize financial management and record-keeping to ensure long-term success. The document also encourages businesses to seek professional advice from accountants and other experts when needed. Finally, it concludes by stating that a strong financial foundation is essential for any business looking to thrive in a competitive market.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that this is crucial for ensuring transparency and accountability in the organization's operations.

2. The second part of the document outlines the various methods and tools used to collect and analyze data. It highlights the need for consistent data collection procedures and the use of advanced analytical techniques to derive meaningful insights from the data.

3. The third part of the document focuses on the role of technology in data management and analysis. It discusses how modern software solutions can streamline data collection, storage, and processing, thereby improving efficiency and accuracy.

4. The fourth part of the document addresses the challenges associated with data management, such as data quality, security, and privacy. It provides strategies to mitigate these risks and ensure that the data remains reliable and secure throughout its lifecycle.

5. The fifth part of the document concludes by summarizing the key findings and recommendations. It stresses the importance of a data-driven approach in decision-making and the need for continuous monitoring and improvement of the data management process.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice to ensure transparency and accountability.

2. In the second section, the author outlines the various methods used for data collection and analysis. This includes both primary and secondary research techniques, as well as the use of statistical software to process large datasets.

3. The third section provides a detailed overview of the results obtained from the study. It highlights key findings and trends, supported by relevant data points and charts. The author also discusses the implications of these findings for future research and practice.

4. Finally, the document concludes with a summary of the main points and a list of references. The author expresses gratitude to the participants and funding agencies that made this research possible.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy auditing of the accounts.

2. The second section covers the process of reconciling bank statements with the company's ledger. It provides a step-by-step guide on how to identify discrepancies and investigate their causes. Regular reconciliation is crucial for catching errors early and maintaining the integrity of the financial data.

3. The third part of the document addresses the issue of budgeting and cost control. It explains how to set realistic budgets for different departments and projects, and how to monitor actual spending against these budgets. This helps in identifying areas where costs are running high and taking corrective actions.

4. The fourth section discusses the importance of timely payment of bills and invoices. It outlines the consequences of late payments, such as damaged relationships with suppliers and potential penalties. It also provides tips on how to manage cash flow effectively to ensure that all obligations are met on time.

5. The final part of the document covers the annual financial review process. It describes how to prepare a comprehensive report on the company's financial performance for the year, including key metrics and trends. This report is essential for informing stakeholders and making strategic decisions for the future.

PART I - MAURITIUS

Section III - Housing Census
(March-May, 1962)

oooooooooooo

HOUSING CENSUS

CONCEPTS, DEFINITIONS AND CLASSIFICATIONS

The concepts, definitions and classifications used were largely based on the United Nations recommendations embodied in the publication "General Principles of a Housing Census", but it was sometimes found necessary to adapt these recommendations to local conditions.

The definitions given below are those which have been adopted:

Urban: The urban regions comprise:

(i) The towns of Port Louis, Beau Bassin/Rose Hill, Quatre Bornes and Curepipe as delimited at the time of the Census (March-May 1962);

(ii) the town of Vacoas/Phoenix created by Proclamation No. 13 of 1963 and whose boundaries are set out in the first schedule of that Proclamation.

Building: A structure comprising one or more rooms or other spaces physically separate from other structures.

Housing Unit: A building, whether intended or not for habitation, but actually used as such at the time of the census.

Dwelling: Building or part of a building which provides structurally separate living quarters and occupied by one private household. Access to a dwelling should be by a separate door and not through the quarters occupied by another household.

Household: Person living alone or a group of persons living together and sharing household expenses and main meals and occupying one dwelling.

Housing units intended for habitation

1. Private housing units:

- (a) Conventional dwellings: houses, flats, apartments;
- (b) Rustic housing units : independent buildings rudely constructed with locally available rustic materials having mud walls, thatched roofs, etc. This category includes huts and a few sea-side bungalows.

2. Collective housing units:

Separate and independent sets of premises intended for habitation by large groups of individuals or separate private households. Such units have generally certain common facilities shared by the occupants and include:

- (a) hotels, boarding houses, pensions;
- (b) institutions (convents, infirmaries, hospitals, prisons);
- (c) improvised multi-family housing units built to offer temporary shelter to those whose dwellings had been destroyed by cyclones (longères).

Housing units not intended for habitation but in use for the purpose

Kitchens, sheds, garages, etc.

.....

A specimen of the Census second schedule and the instructions issued to enumerators will be found at the end of this volume.

Table 12 - Population in private and institutional households, urban and rural

Population	Total	Urban	Rural
Total	679,568	230,005	449,563
In private households	674,545	228,239	446,306
In institutional households	5,023	1,766	3,257

Table 13 - Housing units and occupants (population) by type of housing unit, urban and rural

Type of housing unit	Number of housing units		Number of occupants (population)	
	Urban	Rural	Urban	Rural
Total	30,423	76,231	230,005	449,563
Units intended for habitation	<u>30,376</u>	<u>75,918</u>	<u>229,757</u>	<u>447,890</u>
Private	30,121	75,100	224,731	435,758
Conventional dwellings	27,887	43,107	214,130	283,302
Rustic	1,797	30,258	10,601	152,456
Conventional under construction	434	1,602	-	-
Rustic under construction	3	133	-	-
Collective	110	376	5,003	12,100
Hotels and other boarding houses	7	2	75	15
Institutions	48	61	1,706	3,242

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that this is essential for ensuring transparency and accountability in the organization's operations.

2. The second part of the document outlines the various methods and tools used to collect and analyze data. It highlights the need for consistent data collection practices and the use of advanced analytical techniques to derive meaningful insights from the data.

3. The third part of the document focuses on the role of technology in data management and analysis. It discusses how modern software solutions can streamline data collection, storage, and processing, thereby improving efficiency and accuracy.

4. The fourth part of the document addresses the challenges associated with data management, such as data quality, security, and privacy. It provides strategies to mitigate these risks and ensure that the data remains reliable and secure throughout its lifecycle.

5. The fifth part of the document concludes by summarizing the key findings and recommendations. It stresses the importance of a data-driven approach in decision-making and the need for continuous monitoring and improvement of data management processes.

INSTRUCTIONS TO
ENUMERATORS

1. Terms of Appointment

Having been appointed an Enumerator and having given an undertaking to perform the duties of an Enumerator you are personally liable for the performance of them in accordance with these instructions and any other you may receive from the Director of Statistics, or the Supervisor, the Superintendent in whose Census district you are to act.

2. Information is confidential

All the information you will obtain in the course of your duties is strictly confidential. It must be clearly understood that the obligations as to secrecy apply not only to information relating to particular individuals revealed in the returns but also to statistical information, such as the total population, number of houses, etc., which may be derivable from the Enumerator record books. If you are approached by any person who wishes to obtain statistical information about your section you should advise him to write to the Director of Statistics. The public has been given the assurance that the information given in the Census return is confidential and the success of the Census depends upon this promise being kept. The law provides a severe penalty for any breach of this undertaking.

3. Preparation

Your first duty is to read these instructions and study them carefully. Be sure you understand all your duties and in particular how to use the Enumeration Record.

4. Boundary of Section

Your principal responsibility is to **enumerate** every building and every person in your section. You must therefore be quite certain that you know the precise limits of the area for which you are responsible.

5. Enumeration Record

The Enumeration Record is to be made during the Preliminary Enumeration which is due to start on the 1st of March and to end by the 15th of May at latest.

6. Buildings

(a) Definition - A Building is a structure, comprising one or more rooms or other spaces physically separate from other structures.

Examples and exceptions: -

- (i) Each house in a semi-detached pair or in a back-to-back group is to be regarded as a separate building.
- (ii) A block of flats in which separate apartments are linked by passages, staircases or lift-shafts is a single building.
- (iii) A subsidiary structure (garage, kitchen or W.C.) is to be considered as part of the main building.
- (iv) A group of buildings in a common enclosure and not used as living accommodation (factories, hospitals, prisons, etc) is to be treated as a single building; but if two or more different institutions share the premises, they should be treated as occupying two or more separate buildings.

- (v) Non-permanent structures (longères, converted railway carriages) are to be treated as buildings.

(b) **Listing** - Make a separate entry for every building that you come across on your pre-arranged route and give a number to each. Buildings in the course of erection should be taken account of - a note "under construction" being entered in the "Remarks" Column.

7. Utilization of Building

Non-residential = N	Partly residential = P
Institutional = I	Wholly residential = W

Non-Residential - Building not normally occupied by any person. The presence of non-resident watchmen or workers does not prevent an establishment being regarded as non-residential since such persons are to be enumerated in their homes after their return from work and not at their place of work.

Institutional. - Hospitals, clinics, hotels, boarding houses, prisons and remand homes; camps (Navy, Army, Air and Police Forces) and other institutions. In all establishments included under this heading some form of communal catering is provided for resident staff, resident guests, borders, patients, inmates, etc. The whole of the different detached buildings forming an institution should be classed as one building, but if two different institutions share the premises they should be treated as occupying two separate buildings.

Partly residential. - Building partly used for residential purposes. This definition applies only if non-residential part is used as a shop, office or factory.

8. Dwellings

Definition. - Building or part of a building which provides structurally separate living quarters. Access to a dwelling should be by a separate front door and not through the quarters occupied by another household.

Examples and Exceptions: -

- (i) When two or more detached buildings in one place are used by a single household for dwelling purposes, the whole should be regarded as one dwelling.
- (ii) When such a group of separate buildings is used for dwelling purposes, as a hotel, boarding house, etc., the group should still be regarded as a single dwelling. If some of the buildings within the institution house private households (manager's quarters, doctor's quarters, etc) then each should be counted as a dwelling.
- (iii) When a building is let, sublet or held in different apartments, and occupied by different persons or families, each part so let, sublet or held in different apartments is to be considered as a separate dwelling (example: flats or "maisons de logement").
- (iv) In the case of offices, stores, etc. with a caretaker in residence the only portion of the building to be treated as a dwelling is that actually so used by the caretaker and his family.

9. Households

Definition: - A person living alone or a group of persons living together and sharing household expenses and main meals.

Examples and exceptions: -

- (i) The Household normally consists of a family: husband, wife, children but may include other relatives.
- (ii) A father, a mother, their unmarried children together with a married son, his wife and their children constitute a single household if they do their catering, etc., jointly. If they do not they must be counted as separate households.
- (iii) Boarders who are defined as persons receiving board and lodging against payment, are part of the household.
- (iv) Lodgers, defined as persons paying for their lodging (i.e. room or bed) but not receiving most main meals should not be counted as members of the household, but as a separate household.

10. Living Rooms

Definition - Any space in a dwelling enclosed by solid walls reaching from the floor to the ceiling to a height of at least six feet above the ground and used by a household for living, eating or sleeping. Rooms available for this purpose but not actually in use should be included. Landings, lobbies, recesses, kitchens, bathrooms and closets and open verandahs should not be counted as living rooms, but a glazed verandah should be included.

No entry of the number of rooms should be made in respect of hospitals, prisons, convents, etc. For institutions such as hotels, boarding houses and other places offering accommodation to the public on similar terms, the number of rooms should be entered. "Rooms" means not merely the number of rooms for letting to guests, but includes all rooms used for living, eating or sleeping by either staff or guests.

11. Materials of construction

Insert code number corresponding to material mainly used according to the following: -

- | | |
|----------------------------------|--|
| 1. Concrete (inc. cement bricks) | 8. Galvanised iron (corrugated or plain) |
| 2. Stone | 9. Tin sheet |
| 3. Bricks (ordinary) | 10. Mortar |
| 4. Wood | 11. Ravenal or bamboo |
| 5. Shingles | 12. Straw |
| 6. Tiles | 13. Earth |
| 7. Fibro-cement | 14. Other |

12. Tenure of dwelling

- . Write O1 for Owner occupied
- Write R2 for Rented
- Write F3 for Rent free

13. Rental Value

If house is not rented, try to estimate what monthly rent could reasonably be paid for it.

14. Conveniences

Write E1 for exclusive to household
Write S2 for shared
Write N3 for none

If a building is provided with both Internal and External piped water, an entry should be made in both columns.

If on any premises no piped water is available, i.e., if water is obtained from a neighbour or from a public fountain or river, enter N3.

15. Totalling Enumeration Record

When each page is completed you must fill in the spaces for totals at the foot.

16. Abstract of Record

The totals of each page must then be inserted in the appropriate sections of the "Abstract of Record" on the last page of the Enumeration Record - This abstract must also be added to give the total population of your section.
