HOUSING AND POPULATION CENSUS
OF
MAURITIUS

VOLUME VI

POPULATION
POPULATION IN CONSTITUENCIES

Introduction

1. General

This report is the sixth in the series published on the 1972 Housing and Population Census of Mauritius. It presents the final results of the population census of Mauritius by constituency and by locality.

2. A joint housing and population census taken in two rounds

The 1972 census was a joint housing and population census but was taken in two rounds.

The housing census was taken at the first round between the 15th March and the 15th June 1972. It was followed by the population census at the end of June; census night was the night of the 30th June to 1st July 1972.

3. Preparatory work done at the housing census

For the housing census, the island was divided into 21 census districts which were further subdivided into 376 enumeration areas with approximately 400 to 500 households each.

For urban areas, the delimitation of enumeration areas was done on the latest maps available from the municipalities. For rural areas the 1 : 25,000 map of the Ministry of Housing, Lands and Town and Country Planning was used. At the housing census, while buildings were being enumerated, a list of all heads of households and their addresses was compiled. The list served as frame for the population census. All buildings that were vacant or under construction were included in the list.

The taking of the population census

4. Enumeration procedure

For the housing census each enumeration area was covered by a chief enumerator. For the population census, each chief enumerator had a team of 5 to 7 enumerators to carry out, under his supervision, the census in his area.

As from mid-May, the enumerators received intensive training from their supervisors and the senior supervisors. They were also taken on reconnaissance rounds by their chief enumerators and were given a small plan showing how the buildings in the area they had to cover had been numbered at the housing census.

The office staff had, in the meantime, numbered and addressed a census form for each household that had been registered by the chief enumerators at the housing census. Forms were also prepared for buildings that were either vacant or under construction at the time of the housing census.

The census forms were delivered by the enumerators to households from the 26th to the 29th June. The collection of the census forms started on the 1st July and by the 9th July, almost all census forms had been collected.

5. Population enumerated

The count was made on a "de facto" basis. All persons alive in Mauritius at midnight on census night, 30th June - 1st July 1972, were enumerated, whether they were residents or not.

Passengers and crews of ships lying at anchor in the harbour of Port Louis were also enumerated. They numbered 224 but have not been included in the census figures.

6. Place of enumeration

All persons were enumerated at the place where they spent the census night, whether it was their place of usual residence or not. However, a question was asked of households on their usual address, and, when entire households did not spend the night at their usual address, they were, as far as possible, enumerated at their usual place of residence.

7. Population by locality

Legal boundaries exist for geographical districts, electoral districts, municipal areas and village council areas. However, villages and hamlets, whether falling within or outside the limits of village council areas, do not have legal or fixed boundaries, and, quite often consist of clusters of houses. Sometimes, when expanding, neighbouring villages merge together. It then becomes impossible to delimit each one of them. Some of the localities listed in 1962 could not therefore be demarcated at this census. On the other hand, some new localities have sprung up since 1962. Besides, it is possible that boundaries of villages within which enumeration was carried out have differed from one census to another.

8. Publication of results

The preliminary results of the census have been presented in two volumes:

1972 Housing Census of Mauritius
1972 Population Census of Mauritius

Previous to this one, three other reports have been published on the final results of the census, viz.

The 1972 Housing and Population Census of Mauritius -
Volume III - Island of Rodrigues.

The 1972 Housing and Population Census of Mauritius -
Volume IV - Island of Mauritius - Housing

The 1972 Housing and Population Census of Mauritius -
Volume V - Island of Mauritius - Population -
General Tables.

9. Acknowledgements

We wish to thank all members of the office and field staff who were engaged in the census. The success of the census was to a large measure the result of their sustained efforts at all stages of the census. Our thanks also go to the staff of the Data Processing Division of the Ministry of Finance for processing the data.

We are grateful to the United Nations Fund for Population Activities for their kind financial and technical assistance.

We wish to thank the public for their helpful co-operation and to express our gratitude to the large number of persons and organisations who have contributed to make the census a success.

J. AH KONG
Director of Statistics

POPULATION OF MAURITIUS BY CONSTITUENCY
