Introduction

1. General

This report is the seventh in the series published on the 1972 Housing and Population Census of Mauritius. It presents information on households for the Island of Mauritius. It is the first time that a separate report is published on households; up to now all census data have been analysed in relation to individuals. With the use of the computer it has been possible to extend the analysis to households which are important socio-economic units. In fact the household is the basic unit of consumption as regards durable goods, houses, public utilities, family welfare, etc.

The composition of households was determined in relation to the person reported as head. The relationships identified were:

- (i) Spouse of head
- (ii) Unmarried child of head
- (iii) Married child of head
- (iv) Spouse of married child
- (v) Grandchild of head
- (vi) Other relative of head
- (vii) Person not related to head

Since these relationships give rise to a large number of different household compositions, a preliminary sample study was made to identify the types of households that were encountered most frequently. The fifteen main categories obtained were adopted for the classification of all households; these are shown in Table 10 on page 74.

The categories selected have been further combined into seven broad groups which have been analysed in detail in Tables 11 and 12; these broad groups can be described as follows:

- Type I : Households consisting of head only
- Type II : Households consisting of a married couple without children
- Type III : Households consisting of either or both parents and unmarried children only
- Type IV : Households consisting of either or both parents and unmarried children as well as other relatives
- Type V : Households consisting of either or both parents and married children without grandchildren as well as unmarried children where applicable
- Type VI : Households consisting of either or both parents and married children with grandchildren as well as unmarried children where applicable
- Type VII : Households which do not fall within types I - VI

2. Legal basis

The census was taken according to provisions laid down in Ordinance No. 11 of 1951 (the Statistics Ordinance). The questionnaire used for the Housing Census was prescribed in regulations published in Government Notice No. 31 of 1972 and that for the Population Census in Government Notice No. 44 of 1972.

3. A joint housing and population census taken in two rounds

The 1972 census was a joint housing and population census but was taken in two rounds. Two separate schedules were used and subsequently the two sets of data have been matched by computer.

The housing census was taken at the first round between the 15th March and the 15th June 1972. It was followed by the population census at the end of June; census night was the night of the 30th June to 1st July 1972.

For the housing census, all buildings were visited. Information was collected on the structural characteristics of those that served wholly or partly for residential purposes. Further, to determine the housing conditions under which the population was living, information was recorded for each set of living quarters identified on the number of rooms, the availability of facilities such as toilet, bathroom and kitchen and on the provision of water and electricity.

At the housing census, a list of all heads of households was drawn up. The list served as frame for the population census and a separate questionnaire was used to collect demographic, economic and social data from each household.

The population census forms were delivered by enumerators to households from the 26th to the 29th June. Collection of the census forms started on the 1st July, and, by the 9th July, almost all of them had been collected.

4. Recommendations of the United Nations

The recommendations made by the United Nations in statistical papers "Principles and Recommendations for the 1970 Population Censuses" (Series M No. 44 and 45) have been followed as far as possible. The concepts and definitions published in these papers have been extensively used, with only slight modifications where necessary, to suit local conditions.

5. International classifications used

The International Standard Industrial Classification of all Economic Activities (ISIC) - Series M No. 4, Rev. 2 Add. 1 - has been used to classify the branches of economic activity in which the economically active persons were engaged.

Occupations have been classified according to the International Standard Classification of Occupations (revised edition, 1968) of the International Labour Office.

6. Financial and technical assistance from the United Nations

The United Nations Fund for Population Activities kindly accepted to finance part of the cost of the census. It has contributed towards the rental of the computer, the cost of punch cards and other supplies for the computer, the salaries of a systems analyst and of punch and verifier operators. It has also financed the assignment of a demographer to assist in the evaluation and analysis of the census data.

Mr. Z. Rajakovic, Regional Adviser in Demographic and Social Statistics of the United Nations Economic Commission for Africa and Mr. P. G. Bantegui, Population Programme Officer of the United Nations Development Programme gave very useful advice on the planning and conduct of the census during their respective visits to this country.

7. Population enumerated

The count was made on a "de facto" basis. All persons alive in Mauritius at midnight on census night, 30th June - 1st July 1972, were enumerated, whether they were residents or not.

Passengers and crews of ships lying at anchor in the harbour of Port Louis were also enumerated. They numbered 224 but have not been included in the census figures.

8. Place of enumeration

All persons were enumerated at the place where they spent census night, whether it was their place of usual residence or not. However, a question was asked of households on their usual address, and, when entire households did not spend the night at their usual address, they were, as far as possible, enumerated at their usual place of residence.

9. Processing of data

The data were processed by the Data Processing Division of the Ministry of Finance on a 1900 ICL computer.

The census data on housing and population were processed independently and were matched at a later stage to relate the demographic and economic characteristics of households and population to the characteristics of dwellings in which they were living.

Complete matching of the two sets of data has not been possible due to households moving between the housing and population censuses. For the island of Mauritius matching has not been possible for 2,038 households consisting of 1,697 family nuclei and 8,167 persons, i.e. for slightly less than 1% of the population.

For the preparation of this report information was derived from the population census data (a total of 155,232 private households) except for tables 13 - 16 on tenure of household which present information obtained from the housing census (a total of 154,184 private households).

10. Publication of results.

The preliminary results of the census have been presented in two volumes:

1972 Housing Census of Mauritius

1972 Population Census of Mauritius

The present report is the fifth to be published on the final results of the census. The previous ones are:

The 1972 Housing and Population Census of Mauritius
Volume III - Island of Rodrigues

The 1972 Housing and Population Census of Mauritius
Volume IV - Island of Mauritius - Housing

The 1972 Housing and Population Census of Mauritius
Volume V - Island of Mauritius - Population -
General Tables

The 1972 Housing and Population Census of Mauritius
Volume VI - Population - Population in Constituencies

11. Acknowledgements

We wish to thank all members of the office and field staff who were engaged in the census. The success of the census was to a large measure the result of their sustained efforts at all stages of the census. Our thanks also go to the staff of the Data Processing Division of the Ministry of Finance for processing the data.

We are grateful to the United Nations Fund for Population Activities for their kind financial and technical assistance.

We wish to thank the public for their helpful co-operation and to express our gratitude to the large number of persons and organizations who have contributed to make the census a success.

Concepts and definitions

1. Household

A household is either

- (a) A person who makes provision for his own food and other essentials for living; or
- (b) A group of two or more persons related by ties of kinship or not, who make common provision (i.e. who share the expenses) for food and other essentials for living.

Two families living in a housing unit constitute one household if they have common housekeeping arrangements, but are considered as separate households if they have separate housekeeping arrangements.

- (c) In case of varying degrees of housekeeping, a group of persons who share at least one meal a day is regarded as one household.

2. Private households

Private households are individual units which may be made up of a single person or a group of persons in accordance with the above definitions. They exclude institutional households such as groups of persons living in hotels, convents, penal institutions, homes for the aged, etc.

3. Head of household

The head of household is the person who is acknowledged as such by the other members of the household. The head may not be the person who bears the chief responsibility for the economic maintenance of the household.

4. Composition of households

Data on composition of households reflect the 'de facto' situation on census night. They relate to persons who were present in the household and not necessarily to usual members of the household. Thus "couples without children" comprise couples who have never had any children as well as couples whose children were no longer living with them, or were absent on census night.

5. Family Nucleus

A family nucleus is either:-

- (a) a married couple without children;
- (b) a married couple with one or more never-married children;
- (c) one parent (either father or mother) with one or more never-married children.

Couples in consensual unions are regarded as married couples.

6. Age refers to completed years of age at the census date and has been calculated from the date of birth given in col. 4 of the questionnaire.

7. Marital Status

- (i) Single persons are persons who have never married (i.e. bachelors and spinsters).
- (ii) Married persons include persons who are currently married religiously and civilly, married religiously only and married civilly only.
- (iii) Consensually married persons are those living in a union but not married religiously or civilly.
- (iv) Widowed persons are those who have not remarried since their spouse died.
- (v) Divorced persons are those who have not remarried after divorce.

- (vi) Separated persons include those who are separated legally or not and have not remarried.

8. Economic Activity

Population covered:- The statistics on economic activity refer to the enumerated population aged 12 and over, excluding persons on visit to Mauritius, either on business or on holiday.

Type of Activity

Columns 16 and 17 of the questionnaire allow for the classification of the population into those economically active and those economically inactive and further into those in and out of employment among the economically active.

Economically active persons are those aged 12 and above, who furnished the supply of labour for the production of economic goods and services at any time during the month of June 1972. They comprise all persons in employment as well as persons out of employment who were looking for work.

Persons in employment are those who,

- (a) at some time during the month of June,
 - (i) have worked for pay or profit or have performed work in anticipation of money earnings to be received at some future date, or have helped, without pay, a member of the same household in his enterprise for at least 3 hours each working day or for six full working days which need not be consecutive. Enterprise includes workshop, shop, plantation, cow-keeping, cattle rearing, dairying, fishing, handicrafts, etc.;
 - (ii) although being old age or retired pensioners or engaged in household duties, have been working for pay or profit or have helped, without pay, in a family enterprise as mentioned in (i) above;
 - (iii) although attending a training course were receiving a regular wage or salary;
- (b) had a job but were on sick or local leave during the whole month of June.

Persons not in employment and looking for work are those who,

- (a) had not worked during the month of June and had been looking for work during the month of June or previously;
- (b) were out of work during the month of June and could not look for a job because of temporary sickness.

A person is considered as "looking for work" if he/she has made a positive effort to find work by:-

- (a) placing advertisements or answering advertisements;
- (b) writing letters of application;
- (c) registering with an employment exchange;
- (d) visiting prospective employers;
- (e) enquiring from other persons about existing vacancies; or
- (f) asking other persons to find a job for him/her.

Persons not in employment and looking for work have been classified into two categories:

- (a) "first job seekers" i.e. those who had never worked before, and
- (b) "employed before" i.e. those who were working previously, including self-employment, and who were out of work during the month of June.

Economically inactive persons are those aged 12 and above who were neither engaged in gainful economic activity nor were on sick leave during the month of June 1972 and were not looking for work. These include housewives, wholly retired persons and rentiers not engaged in other gainful activity; children between ages 12 and 15 who were not at school and not looking for work; persons engaged in unpaid voluntary work and permanently disabled persons; full time students even if they have also been engaged in any paid activity or have helped in a family enterprise. However, exception has been made in the case of inmates of resident institutions such as convents, mental and penal institutions, homes for the care of the aged or children, who were engaged in producing goods of economic value, and members of cloistered institutions who worked for the congregation. Such persons have been treated as economically inactive. The residual category of persons who were neither engaged in gainful economic activity nor looking for work, who were not income recipients and did not fall under any of the categories mentioned above, is also included among the economically inactive.
