Housing and Population Census
of
MAURITIUS

VOLUME VI

Households
(ISLAND OF MAURITIUS)

October 1985

Price : Rs. 100.00

F o r e w o r d

This is the sixth report in the series published on the results of the 1983 Housing and Population Census. It presents information on households for the Island of Mauritius. The first four volumes deal with the methodology of the census, the demographic, geographical and migration characteristics of the population of the Island of Mauritius and its living conditions. The results for the Island of Rodrigues are presented in Volume V.

The present report deals mainly with **data on private** households collected during the population census effected on the night 2-3 July, 1983. Thus figures on households and population included therein will differ slightly from those appearing in volume IV which deals with information collected during the housing census conducted three months earlier. While this report deals mainly with the characteristics of households, Volume IV, on the other hand, presents information on the housing conditions of households. It is hoped that the data will be useful to administrators, policy makers and the public in general.

The figures presented in this volume, like in previous ones, have been obtained directly from compilation of the raw data as collected on the Census forms. Like all census data they may be subject to some inaccuracies and inconsistencies. However, it is expected that the level of accuracy will be high for most topics. A detailed evaluation and analysis of data on various topics is being carried out and the results are being published as and when the analyses are completed. A report on evaluation of the basic age and sex data has already been published in June 1985.

I would like to reiterate my thanks to members of the public, the census field staff, my own staff and the staff of all departments who have contributed in one way or another to the success of the census operation. Particular thanks are due to the United Nations Fund for Population Activities and to the United Nations Economic Commission for Africa for financial and technical assistance.

D. Zmanay

Introduction	i - iii
Table 1 - Population in private households and population in hotels and institutions, number of private households and number of family nuclei by geographical district	1
2 - Private households and population in private households by geographical district and size of household	2
3 - Private households by size of household, geographical district and number of family nuclei	7
4 - Private households, population in private households and number of family nuclei by size of household and municipal council area	17
5 - Private households by type	20
6 - Private households by geographical district and type	21
7 - Population in private households by relationship to head of household, sex and age group	22
8 - Population in private households by geographical district, relationship to head of household, sex and marital status	24
9 - Population in private households by municipal council area, relationship to head of household, sex and marital status	34
10 - Heads of private households by geographical district, age-group, marital status and sex	39
11 - Heads of private households by municipal council area, marital status and sex	49
12 - Percentage distribution of heads of households by age group, sex and marital status	50
13 - Headship rate by age group, sex and marital status	51
14 - Households by geographical district and type, cross-classified by sex and age group of head	52
15 - Households by municipal council area and type, cross-classified by sex and age group of head	82
16 - One parent households with unmarried children only by sex, geographical district and age group of head	97
17 - One parent households with unmarried children only by sex, municipal council area and age group of head	100

Introduction

1. Background

In 1983 Mauritius successfully conducted its fifteenth census of population according to provisions laid down in the Statistics Act 1951. The count was made on a "de facto" basis. All persons alive in the State of Mauritius at midnight on the night of 2 - 3 Jul, 1983 were enumerated irrespective of whether they were residents or not. Generally speaking, persons were enumerated in the household, whether private or institutional, in which they were present on census night. A list of such households has been compiled at the Housing Census taken about three months earlier than the Population Census.

2. Total population enumerated

The total population enumerated at the census was 1,000,432 broken down as follows:

	-----Population-----			Number of private households
	Male	Female	Both sexes	
Island of Mauritius	481,368	485,495	966,863	199,712
Island of Rodrigues	16,552	16,530	33,082	6,674
Agalega	200	150	350	89
St. Brandon	137	-	137	Not applicable
Mauritius	498,257	502,175	1,000,432	

Out of the 966,863 persons enumerated in the Island of Mauritius, 961,412 were living in private households and 5,451 were residents of hotels and institutions.

3. Census fieldwork

At the previous census in 1972, the Island of Mauritius had been divided into 376, and the Island of Rodrigues into 12, enumeration areas of about 500 households each. These areas were further sub-divided in 1983 to meet certain specific needs in town and country planning and to provide clusters of roughly the same size for future sample surveys. Thus, for the 1983 census, there were about 2700 new enumeration areas in the Island of Mauritius and about 100 in Rodrigues. Each contained roughly 80 households in the rural and 100 households in the urban regions.

The fieldstaff consisted of 4,271 officers of whom 2 Chief Supervisors, 9 Senior Supervisors, 85 Supervisors, 607 Chief Enumerators and 3,568 Enumerators.

At the Housing Census, each Chief Enumerator was assigned a number of enumeration areas in which he had to enumerate all buildings, housing units, households and commercial and industrial establishments. After completion of the Housing Census, an addressed population census form was prepared for each household identified, each vacant housing unit and also for housing units under construction.

At the Population Census each Enumerator was given a list of about 70 such households and housing units together with the corresponding census questionnaires. The Enumerator was also supplied with a number of unaddressed blank questionnaires for new households that might have been formed, or that might have moved into the housing units since the Housing Census.

Census night was the night of 2 - 3 July 1983. The questionnaires were distributed to households by Enumerators from 25 to 30 June. Heads of households were requested to complete all items, except those on economic characteristics, in respect of every person who spent census night on the premises, or who joined the household or institution on 3 July without having been counted elsewhere. The questionnaires were collected from 3 to 8 July. Enumerators had to check the entries made by households, complete the columns on economic characteristics, and also complete all questionnaires and columns which the household had not been able to fill in.

4. Data processing

The editing and coding of the census data was done by a team of about 68 officers recruited at clerical officer level. Processing of census data is the responsibility of the Data Processing Division of the Ministry of Finance. Data were transferred to discs through key-edit stations and stored on magnetic tapes. Validation, creation of data files and tabulation are being done on an ICL ME 29 - 37 computer.

5. Census budget

Government expenditure on the census project is estimated at about 12 million Rupees, inclusive of costs attributable to existing infrastructure and services not paid for from the census budget. Thus the cost per person enumerated is 12 Rupees. Furthermore, the United Nations Fund for Population Activities has contributed about 700,000 Rupees for strengthening the capability of the Central Statistical Office and the Data Processing Division. The census project has also benefitted from the advisory services of the Economic Commission for Africa.

6. Publication programme

The programme for the publication of census results has been further delayed because of problems concerning the reproduction of tables for the reports. The revised publication plan now stands as follows:

Volume	I	-	Methodological Report	October	1984
Volume	II	-	Demographic characteristics - Island of Mauritius	November	1984
Volume	III	-	Geographical and Migration characteristics - Island of Mauritius	February	1985
Volume	IV	-	Housing and Living conditions - Island of Mauritius	September	1985
Volume	V	-	Housing and Population Census Results - Island of Rodrigues	June	1985
Volume	VI	-	Households - Island of Mauritius	October	1985
Volume	VII	-	Fertility and Mortality - Island of Mauritius	November	1985
Volume	VIII	-	Economic characteristics - Island of Mauritius	December	1985

7. Analysis and evaluation

In the past, evaluation of census data has been done by United Nations experts. This time the exercise will be done by local staff who will, however, work under the guidance of a United Nations expert with international experience in Demographic Analysis. A series of analysis reports covering demographic characteristics, fertility, mortality, housing, manpower and migration will be published as and when they are completed in the course of 1986.

8. Concepts and definitions

The concepts and definitions used at the census are in accordance with the recommendations of the United Nations, as contained in the Statistical Paper entitled "Principles and Recommendations for Population and Housing Censuses". Sometimes slight modifications have been made to suit local conditions.

Although the census enumeration was essentially on an individual basis, the count of individuals was made within the framework of the household. A household was either a person living on his own and making his own provision for food and other essentials for living, or a group of two or more persons, whether related or not, who lived together and made common provision for food and other essentials for living. Varying degrees of common housekeeping were resolved by considering as one household if there was a regular arrangement to share at least one meal a day. The head of household was the person acknowledged as such by the other members.

In hotels, or institutions such as convents, hospitals and prisons, the guests or inmates were considered as members of what may be termed an institutional household. The person in charge of the hotel or institution at the time of the census was considered as the head.

Table 1 - Population in private households and population in hotels and institutions, number of private households and number of family nuclei by geographical district

Geographical district	Population			Number of private households	Average size of households	Number of family nuclei*
	Total	In private households	In hotels & Institutions			
All districts	966,863	961,412	5,451	199,712	4.8	206,978
Port Louis	133,702	132,628	1,074	29,142	4.6	29,121
Pamplemousses	90,466	90,022	444	17,973	5.0	19,101
Rivière du Rempart	80,993	80,930	63	15,868	5.1	16,817
Flacq	107,670	107,387	283	20,572	5.2	22,052
Grand Port	93,180	92,922	258	18,611	5.0	19,519
Savanne	58,789	58,748	41	11,866	5.0	12,532
Plaines Wilhems	303,993	301,218	2,775	65,895	4.6	67,132
Moka	61,209	61,106	103	12,265	5.0	13,024
Black River	36,861	36,451	410	7,520	4.8	7,680

* Excluding households with number of family nuclei unknown or not stated. The number of such cases for the whole island amounts to 188.
