1990  
Housing and Population Census  
of  
MAURITIUS

VOLUME II : Demographic and Fertility Characteristics

November 1991

( Price : Rs 200 )

## **FOREWORD**

This report is the second in the series to be published on the 1990 Census. The first was published in November 1990 and contained the results of the Housing Census which preceded the Population Census by a few months. The present report shows the demographic and fertility characteristics of the population. The longer delay in producing these tables is due to the larger volume and greater complexity of the population data as compared to the housing data.

As was done for the Housing Census, some tables in this report have been prepared down to the level of Municipal Council Wards or Village Council Areas. Localities outside these administrative areas have been grouped together in a number of zones within each district, and data are shown separately for each of these zones as well. It is hoped that the regional data will be useful not only to those persons and organisations who have expressed the need for such information, but also to administrators, planners and policy makers in general. A code in the left hand margin of the table of contents indicates whether the data are tabulated at the country, island, district or regional level.

Like all census data, the figures presented in the tables may still contain slight inaccuracies which will be too costly to identify and correct. However, these do not in any way detract from the quality of the data and their usefulness.

This report is the result of the efforts of many persons and organisations and I am grateful to all of them. In particular, I would like to thank members of the public for their co-operation, the census fieldstaff, the Mauritius College of the Air, the Mauritius Broadcasting Corporation, the Government Printer, the Manager of the Data Processing Division and his Punch Operators, and my own staff, especially of the Census and Cartography Division.

Last but not least, it is with great pleasure that I again put on record my appreciation of the co-operation and contribution of the Economic Commission for Africa, the United Nations Fund for Population and its local office, the UN Department of Technical Co-operation for Development and the UN Statistical Office. Special mention must be made of Mr. Robert de Clercq, UN Data Processing Advisor and subsequently ECA Regional Advisor in Data Processing, without whom the census data could never have been edited and tabulated.

(D. Zmanay)  
Director of Statistics

Central Statistical Office,

## **Introduction**

### **1. Background**

In 1990 Mauritius successfully conducted its sixteenth Census of population. Under normal circumstances the country takes a census every ten years; however, the Census which would be due in 1993 was advanced to 1990 because of a pressing need for detailed up-to-date data in the wake of rapid socio-economic changes.

### **2. Strategy**

The Census which cost 32 million rupees and mobilised some 5,000 officers, was taken in two rounds: a Housing Census was conducted from February to April 1990 and also provided an exhaustive list of heads of households and addresses which served as frame for the Population Census which was itself taken two months later. Census night was the night of 1 July 1990.

The Housing Census questionnaire was filled in by fieldstaff. The Population Census questionnaire, a copy of which appears at the end of the report, was filled in by the head of household or the person in charge of a communal establishment; field enumerators had to provide assistance if needed and to check every questionnaire for completeness and consistency.

The processing of the census data was done on microcomputers using the Integrated Microcomputer Processing System (IMPS) for Censuses and Surveys, which has been developed by the International Statistical Programs Center of the US Bureau of the Census.

### **3. Territorial scope**

The Housing Census covered the Islands of Mauritius and Rodrigues only. The Population Census covered the Islands of Mauritius, Rodrigues, Agalega and St. Brandon. The remoteness of Agalega and St. Brandon from the mainland coupled with the absence of frequent transport facilities to these islands made it impossible to apply to them the same procedures as were used in Mauritius and Rodrigues. Furthermore, the very small size of the population did not justify the prohibitive costs of conducting a full census in the two islands. The meteorological officers in post in the islands were instructed by radio to collect essential information on usual address, sex, age, citizenship, marital status, religion, educational attainment and occupation.

### **4. Population enumerated**

The Census counted all persons present on Census night in all private households and communal establishments, but, unlike preceding censuses, information was also collected on usual residents who were absent on Census night. Hence it is possible, for the first time, to obtain a count of the resident population in any area as well as the population present in that area. Previous Census counts relate only to the more easily measurable but rather less realistic concept of "de facto" population, that is the population present in an area on Census night.

At the 1990 Census the "de facto" population was 1,055,523 in the State of Mauritius whereas the resident population was 1,056,827. Most Census tables show the resident population, whose distribution between islands was as follows:

Area (sq. km)	Both sexes	Male	Female
Island of Mauritius	1,865	1,022,456	510,676
Island of Rodrigues	104	34,204	17,084
Agalega	70	167	91
St. Brandon	1	-	-
Mauritius	2,040	1,056,827	527,851

None of the published tables include Agalega and St. Brandon. It was difficult to integrate them in the established data processing structure because of the special census procedures adopted for the enumeration in these islands. However, the exclusion of the very small resident population in Agalega does not affect the usefulness of the tables. As for St. Brandon, it is only a fishing outport with a meteorological station; it does not have any permanent residents although 94 men, mostly fishermen, were present on the island on Census night.

The Census tables have been structured so as to integrate the figures for Rodriguezes in the body of each table. Hence the grand total for Mauritius refers to the total for the Islands of Mauritius and Rodriguezes together. Subtotals for Island of Mauritius, and Island of Rodriguezes, have been included in all Census tables where they are relevant and useful, but in a few cases, Rodriguezes appears as a district coming immediately after the nine districts in the Island of Mauritius.

Several Census tables have been prepared down to the level of Municipal Council Wards or Village Council Areas. Regions outside administrative areas have been delimited into a number of zones within each district, and data are shown separately for each of these zones as well. Maps showing all small area units in coded form are given as they were on 1 July 1990, and all Census data are in relation to these boundaries. In the coming months several additonal reports will be published showing information on economic, education, population, and family characteristics of the population.

## 6. Publication of results

The Housing Census data were published in November 1990 as Volume I of the 1990 Census reports. The present report is the second in the series and contains data on the demographic and socio-economic characteristics of the population.

## 7. Concepts, definitions and classifications

(a) Household	A household is either a person living on his own and making his own provision for food and other essentials for living, or a group of two or more persons, whether related or not, who live together and make common provision for food and other essentials for living. Cases of persons having varying degrees of housekeeping have been considered as one household if there is any arrangement to share at least one meal a day.
(b) Household type	
Single	Households living in housing units are referred to as private households to distinguish them from households in communal establishments such as hotels, infirmaries, hospitals and other institutions. A household has been referred to as single when its members occupy a single housing unit; when the members are lodged in rooms located in two or more buildings then household is referred to as combined.
Combined	
(c) Head of household	The head of household is any adult member, whether male or female, who is acknowledged as such by the other members.
(d) Family nucleus	A family nucleus is either a couple with or without unmarried children, or a lone parent with unmarried children.
(e) Enumerated population	This category includes all persons who spent census night in the household (whether private or communal) as well as persons who usually live in the household but were absent on census night.
(f) Present population	This category includes all persons who spent census night in the household.
(g) Resident population	The resident or usually resident population includes all persons who usually live in the household whether they were present or absent on census night.
(h) Languages read and written (literacy)	Persons were asked to state the language(s) in which they could, with understanding, both read and write a simple statement in their everyday life. The categories tabulated and their meaning, are given below. Each person has been counted in one category only. <ul style="list-style-type: none"><li>(i) None - illiterate</li><li>(ii) Creole only - literate in Creole only</li><li>(iii) Bhojpuri only - literate in Bhojpuri only</li></ul>

(i) Educational attainment

- (iv) Creole and Bhojpuri only - Literate in Creole and Bhojpuri only
- (v) Oriental Languages - Literate in Oriental Languages only or in Oriental Languages as well as Creole and/or Bhojpuri, but excluding European Languages.
- (vi) European Languages - Literate in European Languages only or in European Languages as well as Creole and/or Bhojpuri, but excluding Oriental Languages.
- (vii) European and Oriental Languages - Literate in both European and Oriental Languages with or without Creole or Bhojpuri.
- For persons not attending school, this refers to the highest level of education completed, whereas for persons attending school it refers to the standard, form or course being attended. The groupings used for tabulation are such that the following levels of the International Standard Classification of Education can be easily obtained:
- Level 0 = N1 + Pre-primary
- Level 1 = Primary, including Certificate of Primary Education
- Level 2, first stage = Secondary up to and including Form III
- Level 2, second stage = Secondary up to and including Higher Secondary
- Level 3 = University degree, including post-graduate degree
- Post-secondary education of the type that leads to an award not equivalent to a first course has a "practical" orientation aimed at skilled and responsible employment if the university degree has been reported under vocational and technical training if the participation in individual and/or social activities which are considered normal for their age. A disability or handicap was taken to be long-term if it had lasted or was expected to last for six months or more.

(j) Disability

Persons were asked to list all disabilities that they had. After examination of a sample of the returns, it was found that most disabled persons fell in one of the categories listed below. These categories were therefore retained for tabulation, and any person not falling in one of them was counted in a residual "Other" category. Hence each disabled person was counted only once.

- (i) Incomplete use of legs/feet.
- (ii) Incomplete use of arms/fingers.
- (iii) Incomplete use of legs/feet as well as arms/fingers.
- (iv) Partial or total loss of sight even with glasses.
- (v) Partial or total loss of hearing.
- (vi) Partial or total loss of sight as well as hearing.
- (vii) Partial or total loss of speech.
- (viii) Partial or total loss of hearing as well as speech.
- (ix) Slow development/learning difficulties.
- (x) Behaviour problems/mental disability.
- (xi) Loss of consciousness, fits, blackouts.

(k) Currently employed

This category includes (i) any person, aged 12 years and over who worked for at least one hour during the week from Monday 25 June to Sunday 1 July 1990, and (ii) any person who held a job during that week although he/she did not do any work. Work means any work for pay, profit or family gain, including self-employment with or without employees as well as work without pay in a family enterprise or farm; but it excludes housework in one's own home.

(l) Currently unemployed

These are persons aged 12 years and over who had, not worked for at least one hour during the week from Monday 25 June to Sunday 1 July 1990, and did not hold a job during that week, and took active steps to look for work anytime during the previous 8 weeks, and were available for work during the week ending 1 July 1990.

(m) Currently active

This category consists of the currently employed and the currently unemployed population.

(n) Currently inactive

This category consists of persons who are currently neither employed nor unemployed.
