FOREWORD

This report is the fifth in the series to be published on the 1990 Census. The first was published in November 1990 and contained the results of the Housing Census which preceded the Population Census by a few months. The previous three reports on the Population Census dealt with demographic and fertility characteristics, economic characteristics and educational characteristics of the population. This report deals with household characteristics.

Some of the tables published in the various reports have been prepared down to the level of Municipal Council Wards or Village Council Areas. Localities outside these administrative areas have been grouped together in a number of zones within each district, and data are shown separately for each of these zones as well. It is hoped that the regional data will be useful not only to those persons and organisations who have expressed the need for such information, but also to administrators, planners and policy makers in general. A code in the left hand margin of the table of contents indicates whether the data are tabulated at the country, island, district or regional level.

Like all census data, the figures presented in the tables may still contain slight inaccuracies which will be too costly to identify and correct. However, these do not in any way detract from the quality of the data and their usefulness.

This report is the result of the efforts of many persons and organisations and I am grateful to all of them. In particular, I would like to thank members of the public for their co-operation, the census fieldstaff, the Mauritius College of the Air, the Mauritius Broadcasting Corporation, the Government Printer, the Manager of the Data Processing Division and his Punch Operators, and my own staff, especially of the Census and Cartography Division.

Last but not least, it is with great pleasure that I again put on record my appreciation of the co-operation and contribution of the Economic Commission for Africa, the United Nations Fund for Population and its local office, the UN Department of Technical Co-operation for Development and the UN Statistical Office. Special mention must be made of Mr. Robert de Clercq, UN Data Processing Advisor and subsequently ECA Regional Advisor in Data Processing, without whom the census data could never have been edited and tabulated.

CONTENTS (Cont'd)

Introduction

1. Background

In 1990 Mauritius successfully conducted its sixteenth Census of population. Under normal circumstances the country takes a census every ten years; however, the Census which would be due in 1993 was advanced to 1990 because of a pressing need for detailed up-to-date data in the wake of rapid socio-economic changes.

2. Strategy

The Census which cost 32 million rupees and mobilised some 5,000 officers, was taken in two rounds: a Housing Census was conducted from February to April 1990 and also provided an exhaustive list of heads of households and addresses which served as frame for the Population Census which was itself taken two months later. Census night was the night of 1 July 1990.

The Housing Census questionnaire was filled in by fieldstaff. The Population Census questionnaire, a copy of which appears at the end of the report, was filled in by the head of household or the person in charge of a communal establishment; field enumerators had to provide assistance if needed and to check every questionnaire for completeness and consistency.

The processing of the census data was done on microcomputers using the Integrated Microcomputer Processing System (IMPS) for Censuses and Surveys, which has been developed by the International Statistical Programs Center of the US Bureau of the Census.

3. Territorial scope

The Housing Census covered the Islands of Mauritius and Rodrigues only. The Population Census covered the Islands of Mauritius, Rodrigues, Agalega and St. Brandon. The remoteness of Agalega and St. Brandon from the mainland coupled with the absence of frequent transport facilities to these islands made it impossible to apply to them the same procedures as were used in Mauritius and Rodrigues. Furthermore, the very small size of the population did not justify the prohibitive costs of conducting a full census in the two islands. The meteorological officers in post in the islands were instructed by radio to collect essential information on usual address, sex, age, citizenship, marital status, religion, educational attainment and occupation.

4. Population enumerated

The Census counted all persons present on Census night in all private households and communal establishments, but, unlike preceding censuses, information was also collected on usual residents who were absent on Census night. Hence it is possible, for the first time, to obtain a count of the resident population in any area as well as the population present in that area. Previous Census counts relate only to the more easily measurable but rather less realistic concept of "de facto" population, that is the population present in an area on Census night.

islands was as follows:

At the 1990 Census the "de facto" population was 1,055,523 in the State of Mauritius whereas the resident population was 1,056,827. Most Census tables show the resident population, whose distribution between the different islands was as follows:

Area (sq. km)	Both sexes	Male	Female	Mauritius
Island of Mauritius	1,865	1,022,456	510,676	511,780
Island of Rodrigues	104	34,204	17,084	17,120
Agalega	70	167	91	76
St. Brandon	1	-	-	-
	2,040	1,056,827	527,851	528,976

None of the published tables include Agalega and St. Brandon. It was difficult to integrate them in the established data processing structure because of the special census procedures adopted for the enumeration in these islands. However, the exclusion of the very small resident population in Agalega does not affect the usefulness of the tables. As for St. Brandon, it is only a fishing outport with a meteorological station; it does not have any permanent residents although 94 men, mostly fishermen, were present on the island on Census night.

The Census tables have been structured so as to integrate the figures for Rodriguezes in the body of each table. Hence the grand total for Mauritius refers to the total for the Islands of Mauritius and Rodriguezes together. Subtotals for Island of Mauritius, and Island of Rodriguezes, have been included in all Census tables where they are relevant and useful, but in a few cases, Rodriguezes appears as a district coming immediately after the nine districts in the Island of Mauritius.

Several Census tables have been prepared down to the level of Municipal Council Wards or Village Council Areas. Regions outside these administrative areas have been delimited into a number of zones within each district, and data are shown separately for each of these zones as well. Maps showing all area units in coded form are included in the Appendices together with a description of the codes. All Municipal Ward and Village Council Area boundaries are given as they were on 1 July 1990, and all Census data are in relation to these boundaries.

The Housing Census data were published in November 1990 as Volume I of the 1990 Census reports. Volume II published in November 1991, dealt with demography and fertility characteristics, Volume III published in December 1991, showed the economic characteristics of the population which housed in January 1992 showed the educational statistics. This volume deals with household characteristics. In the coming months additional reports will be published showing information on migration and disability characteristics.

7. Concepts, definitions and classifications

(a) Household	A household is either a person living on his own and making his own provision for food and other essentials for living, or a group of two or more persons, whether related or not, who live together and make common provision for food and other essentials for living. Cases of persons having varying degrees of housekeeping have been considered as one household if there is any arrangement to share at least one meal a day.
(b) Household type	
Single	Households living in housing units are referred to as private households to distinguish them from households in communal establishments such as hotels, infirmaries, hospitals and other institutions. A household has been referred to as single when its members occupy a single housing unit; when the members are lodged in rooms located in two or more buildings then household is referred to as combined.
Combined	
(c) Head of household	The head of household is any adult member, whether male or female, who is acknowledged as such by the other members.
(d) Family nucleus	A family nucleus is either a couple with or without unmarried children, or a lone parent with unmarried children.
(e) Enumerated population	This category includes all persons who spent census night in the household (whether private or communal) as well as persons who usually live in the household but were absent on census night.
(f) Present population	This category includes all persons who spent census night in the household.
(g) Resident population	The resident or usually resident population includes all persons who usually live in the household whether they were present or absent on census night.
(h) Languages read and written (literacy)	Persons were asked to state the language(s) in which they could, with understanding, both read and write a simple statement in their everyday life. The categories tabulated and their meaning, are given below. Each person has been counted in one category only. <ul style="list-style-type: none">(i) None - illiterate(ii) Creole only - literate in Creole only(iii) Bhojpuri only - literate in Bhojpuri only(iv) Creole and Bhojpuri only - literate in Creole and Bhojpuri only

(i) **Educational attainment**

(vii) European and Oriental Languages - Literate in both European and Oriental Languages with or without Creole or Bhojpuri.

(vi) European Languages - Literate in European Languages only or in European Languages as well as Creole and/or Bhojpuri, but excluding Oriental Languages.

(v) Oriental Languages - Literate in Oriental Languages only or in Oriental Languages as well as Creole and/or Bhojpuri, but excluding European Languages.

For persons not attending school, this refers to the highest level of education whereas for persons attending school it refers to the standard, form or course being attended. The groupings used for tabulation are such that the following levels of the International Standard Classification of Education can be easily obtained:

Level 0 = Nil + Pre-primary

Level 1 = Primary, including Certificate of Primary Education

Level 3 = University degree, including post-graduate degree

Level 2, second stage = Form IV - Form VI, including Higher School Certificate

Level 2, first stage = Secondary up to and including Form III

(j) **Disability**

Persons were asked to list all disabilities that they had. After examination of a sample of the returns, it was found that most disabled persons fell in one of the categories listed below. These categories were therefore retained for tabulation, and any person not falling in one of them was counted in a residual "Other" category. Hence each disabled person was counted only once.

(i) **Incomplete use of Legs/feet.**

- (ii) Incomplete use of arms/fingers.
- (iii) Incomplete use of legs/feet as well as arms/fingers.
- (iv) Partial or total loss of sight even with glasses.
- (v) Partial or total loss of hearing.
- (vi) Partial or total loss of sight as well as hearing.
- (vii) Partial or total loss of speech.
- (viii) Partial or total loss of hearing as well as speech.
- (ix) Slow development/learning difficulties.
- (x) Behaviour problems/mental disability.
- (xi) Loss of consciousness, fits, blackouts.

(k) Currently employed

This category includes (i) any person, aged 12 years and over who worked for at least one hour during the week from Monday 25 June to Sunday 1 July 1990, and (ii) any person who held a job during that week although he/she did not do any work. Work means any work for pay, profit or family gain, including self-employment with or without employees as well as work without pay in a family enterprise or farm; but it excludes housework in one's own home.

(l) Currently unemployed

These are persons aged 12 years and over who had not worked for at least one hour during the week from Monday 25 June to Sunday 1 July 1990, and did not hold a job during that week, and took active steps to look for work anytime during the previous 8 weeks, and were available for work during the week ending 1 July 1990.

(m) Currently active

This category consists of the currently employed and the currently unemployed population.

(n) Currently inactive

This category consists of persons who were neither currently employed nor unemployed.

(o) Occupation

This was the job at which the person worked the most hours during the reference period. The 1988 International Standard Classification of Occupations was used for coding.

2 Persons in respect of whom the return is to be made

- (i) All persons who spend census night 1-2 July 1990 on the premises whether they are members of the household, visitors, guests, boarders or servants;

- (ii) all persons who arrive on the premises and join the household on Monday 2 July 1990 without having been enumerated elsewhere; and

- (iii) all temporarily absent members of the household, i.e. all persons who usually live in the household, but who are away on census night, for example, on a business trip, on vacation, in hospital or studying abroad; include them even if you know that they are being enumerated elsewhere

3 Legal provisions

- (i) The Census is taken by the Central Statistical Office under the Statistics Act. Every person is required by law to give to the person responsible for making the return such information as may be necessary to enable the return to be made. No use may however be made of such information by the person to whom it is given except for the purpose of making the return

- (ii) Any person who refuses or neglects to fill in the form or to supply the particulars required therein or who knowingly makes in this form any statement which is untrue in any material particular shall commit an offence under the Statistics Act, and shall, on conviction, be liable to imprisonment for a term not exceeding one year and to a fine not exceeding Rs. 1,000

- (iii) All information obtained in the course of the Census is treated as CONFIDENTIAL. No information about named individuals is ever passed on by the Central Statistical Office to ANY other Government Department or to any other Authority or person. All enumerators and other officers engaged in the taking of the Census are under oath and are liable to prosecution if they improperly disclose any information which has come to their knowledge while performing their duties

4 Completion of the form

The form should be completely filled in by the person designated in section 1 above. If any difficulty is experienced, particularly with columns 24 to 37, guidance should be sought from the Enumerator when he calls to collect the form. If the answers are incomplete or inaccurate, the enumerator will ask any questions necessary to enable him to complete or correct the form.

The information should be entered in the space provided using ink or a ball-point pen. Nothing should be written in the boxes which are reserved for codes

5 Collection of the form

The form will be collected on 2 or 3 July 1990 by the appointed enumerator

BEFORE COMPLETING THE CENSUS FORM, PLEASE CONSULT THE GUIDE WHICH IS IN BOTH ENGLISH AND FRENCH
