KEY INDICATORS OF THE LABOUR MARKET (KILM) 2011-2018

The Key Indicators of the Labour Market (KILM) is a collection of 18 *key" indicators of the Labour market (bucking on employment and other variables relating to employment (status, sector, hours, flows etc.), the lack of work and the characteristics of jobseekers, education, wages and compensation costs, labour productivity and working powers. KILM's objective is to present a core set of labour market indicators to monitor emerging trends in the labour market landscape.

The first set of KILM for the Republic of Mauritius have been compiled from data already available from sources such as household surveys (e.g. Continuous Multipurpose Household Survey (CMPHS), Survey of employment and Earnings (SEE), poverty statistics), administrative data (e.g. Ministry of labour) and Housing and population census.

Key Indicator	Definition	Data sources	Unit	Remarks		Indicator					Period			
KILM 1. Labour force	The total Labour Force comprises all Mauritians and foreigners aged 16+ who are employed and unemployed during the reference period.	Continuous			1.1.1 Labour for	ce by sex, 2011-2018	2011	2012	2013	2014	2015	2016	2017	20
		Multipurpose				Total Labour force (Mauritian and Foreigners)								
		Household Survey	Number (000)			Both Sexes	571.6	580.3	597.5	604.0	612.9	609.6	615.3	613.
		(CMPHS),	(===)											
		Annual Survey of Employment				Male	356.7	361.1	366.9	371.1	371.9	372.9	376.6	374.

						18.1.1.Poverty rat	te (%) among employed population in relative poverty	2012	2017			
	Employment by economic class	Proportion of employed persons, aged 16 years and over, living below the Relative Poverty Line (RPL)			Mauritius does not have a national poverty line. However, on the basis of available household survey data, relative poverty measures are derived. The Relative Poverty Line is defined as half of the median monthly household income per adult equivalent. It is estimated at Rs. 5,652 and Rs. 7,497 in 2012 and 2017 respectively. The household income comprises disposable income, and imputed rent for renting households. Note: (i) 2017 figures are provisional (ii) Poverty inideators are restricted to a certain level of disaggregation because of few observations in survey data.
