DIGEST OF AGRICULTURAL STATISTICS

1 9 8 4

This is the first issue of a regular publication of the Central Statistical Office on agricultural statistics.

It is designed to bring together in one single report as many statistical series as possible on agricultural statistics. The digest thus contains information on the sugar, tea, tobacco, foodcrops, livestock and fisheries sectors. It also includes a section on the Food Balance Sheet which reveals the pattern of food consumption of the population.

It is hoped that the statistics which have been assembled in this digest will be useful to the public in general and to agricultural policy makers, planners and scientists in particular.

The preparation of this digest has required the co-operation of numerous organisations, both public and private. This co-operation is gratefully acknowledged here.

FOOD

BALANCE SHEET

Food Balance Sheet (1979 - 1983)

General Notes

1. All data relate to the Island of Mauritius only (not its dependencies)
2. Quantity is in metric tons unless otherwise specified.
3. (a) Gross imports include imports from dependencies
(b) Gross exports include exports to dependencies
4. Estimated changes in stock:
A plus sign indicates that there has been a decrease in stock, that is an increase in supply. A negative sign would mean the converse.
5. Data on production of foodcrops may not tally with production data published in other sections since allowance has been made here for backyard production.
6. Local production of meat includes imported live animals slaughtered in Mauritius. Estimates for off-abattoir slaughters have been included.
7. Data on fish and crustaceans are given in terms of wet-weight equivalent.
