DIGEST OF AGRICULTURAL STATISTICS - 1991

F O R E W O R D

This is the eighth issue of a regular publication of the Central Statistical Office on Agricultural Statistics for the Island of Mauritius.

The digest is designed to bring together in a single report as many statistical series as possible on agricultural statistics. It thus contains information on the sugar, tea, tobacco, foodcrops, livestocks and fisheries sectors. It also includes a series of yearly "Food Balance Sheets" showing the pattern of food consumption of the population.

The data published normally cover the last five years (1987-1991), and are the latest available as at end of April 1992. Some of the figures are therefore provisional and subject to revision in later issues. Figures in successive issues of the digest supersede those appearing in previous ones.

It is hoped that the statistics which have been assembled in this digest will be useful to the public in general and to agricultural policy makers, planners and scientists in particular.

The preparation of this digest has required the co-operation of numerous organisations, both public and private. This co-operation is gratefully acknowledged here.

D. Zmanay  
Director of Statistics

Central Statistical Office,  
Ministry of Economic Planning  
and Development,  
PORT LOUIS.

July 1992

## **CONTENTS**

<b><u>SECTION 1 - SUMMARY TABLES - AGRICULTURAL SECTOR</u></b>	<b>PAGE</b>
Table 1.1 - Share of agriculture in the economy, 1987 - 1991	2
1.2 - Production account of agriculture, 1987 - 1991	3
1.3 - Value added at factor cost of agriculture (at current prices), by main products groups, 1987 - 1991	3
1.4 - Index of agricultural production, 1990 - 1991	4
1.5 - Agricultural crops: area harvested and production, 1990 - 1991	5
1.6 - Production of agro-industrial products, 1990 - 1991	5
1.7 - Exports of agricultural and food products, 1987 - 1991	7
1.8 - Employment in agricultural, industrial and services sector, 1982 - 1991	8
1.9 - Employment in the agriculture sector (large establishment), 1987 - 1991	9
1.10 - Employment in the agriculture sector (large and small establishments), June 1991	10

## **SECTION 2 - SUGAR INDUSTRY**

Table 2.1 - Production account of the sugar industry, 1990	11
2.2 - Area under sugar cane cultivation as at 30th June, 1990 - 1991	12
2.3 - Area harvested, cane production, cane yield for estates, metayers and owner-planters, 1982 - 1991	14
2.4 - Area harvested, cane production, cane yield of estates, metayers and owner-planters by region, 1990 - 1991	15
2.5 - Sugar crop 1990 (area harvested, canes produced, yield and sugar production by factory area)	16
2.6 - Sugar crop 1991 (area harvested, cane produced, yield and sugar production by factory area)	17
2.7 - Frequency distribution of owner and tenant planters, 1990 - 1991	18
2.8 - Mechanical loading and harvesting of canes. 1982 - 1991	19

# **SUMMARY TABLES**

## **AGRICULTURAL SECTOR**

## Agricultural Production - Year 1991

### 1. Sugar

Sugar production in 1991 amounted to 611,340 tonnes as compared to 624,302 tonnes the previous year. The 1991 crop, for the second consecutive year, suffered from the effects of drought conditions that prevailed at the vegetative stage, mostly in the northern regions. In addition, a further reduction of 300 hectares was reported in total cane area harvested which brought the total area to about 76,000 hectares. It should be noted that total area under cane has been reduced by some 900 hectares over the last three years.

Yield of sugar cane per hectare, however, improved slightly to 74.0 tonnes from 72.7 tonnes in 1990 bringing the total cane harvested to 5,621.110 tonnes i.e. 1% higher than in 1990. On the other hand, the extraction rate was lower than the previous year and stood at 10.88% compared to 11.25% in 1990.

### 2. Tea

Area cultivated under tea decreased slightly by some 35 hectares to 2,870 hectares in 1991 yielding 30,635 tonnes of green leaves, a slightly higher crop than the previous year when it amounted to 29,863 tonnes. The black tea produced therefrom went up by 3% to reach 5,930 tonnes.

The average export price of black tea in 1991 dropped by about 6% selling at Rs 18.30 per Kg against Rs 19.40 per Kg in 1990.

### 3. Tobacco

Area under tobacco remained at around 620 hectares, but due to favourable climatic conditions that prevailed in the southern regions, the yield per hectare improved by about 10%. Consequently, a higher crop was harvested in 1991, amounting to 875 tonnes as compared to 800 tonnes the preceding year.

### 4. Foodcrops

Foodcrop production in 1991 dropped by about 1,750 tonnes or 3% to 64,090 tonnes from 65,840 tonnes in 1990. Total area harvested was also reduced by some 200 hectares.

Significant decrease were reported in the production of the following foodcrops as a result of the drought conditions that prevailed or by diseases or by both:-

<u>Foodcrop</u>	<u>1990</u> (tonnes)	<u>1991</u>	<u>Decrease</u> (%)
Cauliflower	1,280	780	- 39%
Ginger	625	460	- 26%
Beans and peas	1,280	975	- 24%
Groundnut	1,755	1,380	- 21%
Tomato	11,570	9,385	- 19%
Potato	17,820	16,445	- 8%

Unavailability of bean and groundnut seeds led to a reduction in the area under these crops. Instead, more creepers were grown thereby pushing the production of these commodities by 32% to reach 12,345 tonnes against 9,330 tonnes in 1990.

Production of ginger came back to its normal level of about 460 tonnes after over production in 1990.

The adoption of high yielding varieties by traditional onion growers resulted in a crop which was 8% higher.

#### 5. Livestock and Poultry

Total beef production increased by 5% to around 2,160 tonnes. Production from local sources, exclusive of Rodrigues went up by 18%, whilst that from imported cattle remained at around 1,610 tonnes.

The share of local sources in total beef production is only 25%.

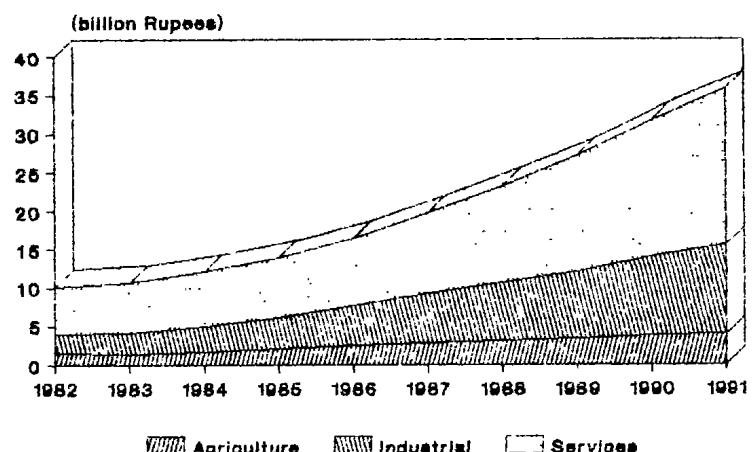

Production of goat meat and mutton in 1991 increased by 13% to reach 175 tonnes, whilst that of pork went up by 9% to attain 905 tonnes. Poultry production rose by 6% in 1991 and stood at 13,250 tonnes.

#### 6. Fisheries

Total fish production in 1991, recorded a significant growth of 34% increasing by nearly 5,000 tonnes to attain 17,700 tonnes. The overall growth resulted mainly from a 70% increase reported in tuna fishing with the coming into operation of an additional vessel.

Production of fresh fish (coastal) decreased by 3% and frozen fish, other than tuna, by 2%.

Note : (1) Harvesting generally extends from June to December, while export and local sales are spread over the period 1st July to 30th June the following year.

- (2) Production may not tally with exports and local sales due to loss or surplus in storage.
- (3) For crop year 1991/92, estimated figures are given.

**FOOD**

**BALANCE SHEET**

## Food Balance Sheet

### General Notes

1. All data relate to the Island of Mauritius only (not its dependencies).
2. Quantity is in tonnes unless otherwise specified.
3. (a) Gross imports include imports from dependencies  
(b) Gross exports include exports to dependencies
4. Estimated changes in stock:

A plus sign indicates that there has been a decrease in stock, that is an increase in supply. A negative sign would mean the converse.
5. Data on production of foodcrops may not tally with production data published in other sections since allowance has been made here for backyard production.
6. Local production of meat includes imported live animals slaughtered in Mauritius. Estimates for off-abattoir slaughters have been included.
7. Data on fish and crustaceans are given in terms of wet-weight equivalent.
8. As from 1989 onwards, population includes Mauritian residents and Mauritians residing abroad.
