# DIGEST OF AGRICULTURAL STATISTICS - 1995

## FOREWORD

This is the twelfth issue of a regular publication of the Central Statistical Office on Agricultural Statistics for the island of Mauritius.

The digest is designed to bring together in a single report as many statistical series as possible on Agricultural Statistics. It thus contains information on the sugar, tea, tobacco, foodcrops, livestock and fisheries sectors. It also includes a series of yearly "Food Balance Sheets" showing the pattern of food consumption of the population.

The data published normally cover the last five years (1991-1995) and are the latest available as at end of July 1996. Some of the figures are therefore provisional and subject to revision in later issues. Figures in successive issues of the digest supersede those appearing in previous ones.

It is hoped that the statistics which have been assembled in this digest will be useful to the public in general and to agricultural policy makers, planners and scientists in particular.

The preparation of this digest has required the cooperation of numerous organisations, both public and private. This co-operation is gratefully acknowledged here.

# AGRICULTURAL AND FISH PRODUCTION - YEAR 1995

## 1. Introduction

This issue presents data on agricultural and fish production for the year 1995.

## 2. Sugar Cane

The declining trend in total acreage under sugar cane continued in 1995 with a further decrease of 1,007 hectares (-1.4%) which brought the total area harvested to 72,010 hectares. Of this acreage, 2,500 hectares were harvested during the mini-harvest between 24 May and 10 June, 1995.

The 1995 crop, at the vegetative period, was affected by adverse climatic conditions, in particular the passage of cyclone Ingrid. It might be recalled that the 1994 crop was also affected by the adverse effects of cyclone Hollanda which struck Mauritius early in February. In 1995, the production of sugar cane increased by 7.2% to reach 5,159,244 tonnes, including 178,956 tonnes produced during the mini-harvest.

The overall extraction rate increased marginally to 10.46% (normal harvest: 10.55% and mini-harvest: 8.01%) in 1995 from 10.39% in 1994. Sugar production went up to 539,521 tonnes in 1995, 7.9% above the 1994 production figure of 500,209 tonnes. The 1995 production of 539,521 tonnes included 14,334 tonnes produced during the mini-harvest to meet the 1994/95 quota obligations to the European Union.

## 3. Tea

In 1995, the area under tea cultivation was further reduced by 951 hectares (-31.4%), and stood at 2,077 hectares against 3,028 hectares in the previous year. This sharp decline is mainly due to the fact that the acreage devoted to tea contracted as growers switched to other field crops, particularly sugar cane. As a result, the quantity of green leaves produced declined to 21,419 tonnes (-21.3%) in 1995 as compared to 27,204 tonnes in 1994.

The production of black tea also decreased to 3,785 tonnes (-25.6%) in 1995 against 5,089 tonnes in the preceding year. The average export price of black tea dropped by 14.5% from Rs 20.57 to Rs 17.58 per kg between 1994 and 1995.

## 4. Tobacco

The total acreage under tobacco in 1995 remained at the preceding year's level, at 691 hectares. Production of tobacco leaves in 1995 was 1,017 tonnes, almost the same as that of previous year (1,024 tonnes).

## 5. Foodcrops

Area under foodcrops harvested in 1995 increased by 6.7% to attain 6,769 hectares as compared to 6,342 hectares in 1994. In spite of the negative effects of cyclones in the first quarter of 1995, production of foodcrops picked up in the following months to attain 97,533 tonnes, a 19.7% increase over 1994. It might be recalled that the production of foodcrops in 1994 also suffered from the passage of cyclone Hollanda in February 1994.

Owing to a rise in area harvested and a better yield per hectare, substantial increases were noted in the production (Table 6) of the following foodcrops: cabbage (+57.1%), tomato (+47.1%), banana (+40.3%), chillies (-36.6%), creepers (+26.7%), beans (+27.6%), brinjal (+23.9%), cauliflower (+11.6%) and onion (+10.6%).

On the other hand, the production of the following foodcrops registered a decrease, mainly due to a decline in area harvested: maize (-67.2%) and garlic (-22.9%).

The apparent 11.7% decline in potato production in 1995 (from 17,800 to 15,718 tonnes) is largely explained by the late harvest of 3,657 tonnes from the 1993 crop at the beginning of 1994.

Maize production continued its downward trend and stood at 289 tonnes (-67.2%) in 1995 against 880 tonnes in the previous year.

Improvement in cultural practices pushed the production of ginger up by 20.5% from 516 to 622 tonnes between 1994 and 1995.

The production of other vegetables rose significantly by 33.0% from 6,034 to 8,024 tonnes mainly due to an increase in the area harvested.

Banana production has completely recovered from the adverse effects of cyclone Hollanda in February 1994 and production jumped to 9,437 tonnes (+40.3%) in 1995 from 6,725 tonnes in 1994.

## 6. Livestock and Poultry

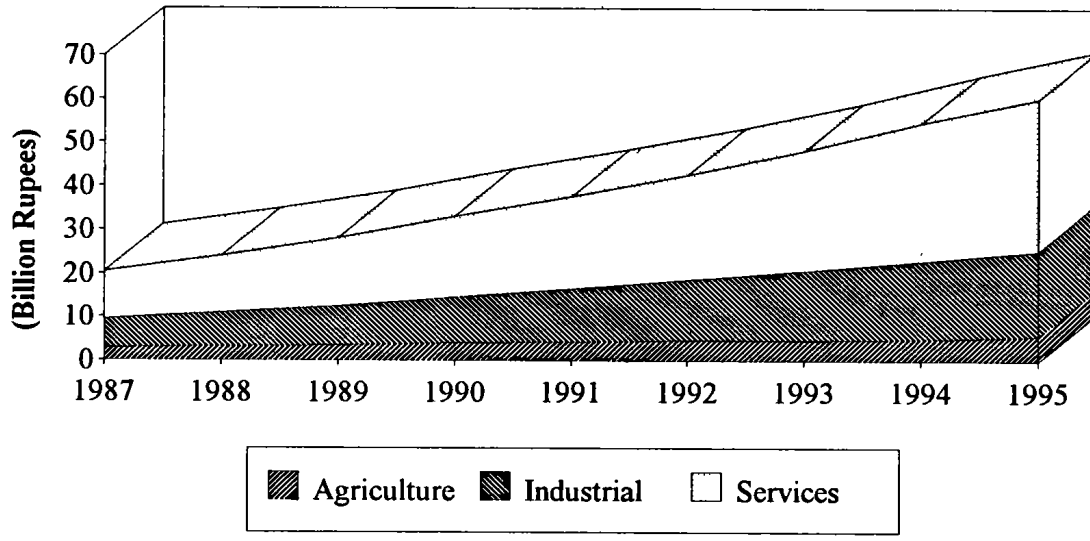

The production of beef dropped by 12% in 1995 to reach 2,296 tonnes against 2,609 tonnes in 1994. This decrease is mainly attributable to a decline of 23.2% in the slaughter of imported live cattle which fell to 1,704 tonnes in 1995 from 2,218 tonnes in 1994. On the other hand, following an increase in the imports of weaners for fattening purposes, beef production from the slaughter of local cattle, including that from Rodrigues, rose significantly by 51.4% from 391 tonnes in 1994 to 592 tonnes in 1995. The share of imports which accounted for 85% of total production in 1994 went down to 74.2% in 1995.

Production of goat meat and mutton was 127 tonnes in 1995, i.e a decrease of 14.2% as compared to the 1994 figure of 148 tonnes. The production of goat meat was down by 14.6% to 117 tonnes in 1995 from 137 tonnes in 1994. This decrease is mainly the result of a marked reduction of 31.7% (from 82 in 1994 to 56 tonnes in 1995) observed in goat meat from imported live animals. Local production, itself, showed an increase of 10.9% from 55 tonnes in 1994 to 61 tonnes in 1995.

1994/95	500.2	5,794.7	470.3	5,674.7	29.9	120.0
1995/96	539.5	6,953.2	535.5	6,937.2	2.7	16.0

Notes: (1) Harvesting generally extends from June to December, while export and local sales are spread over the period 1st July to 30th June the following year.

(2) Production may not tally with exports and local sales due to loss or surplus in storage.

(3) For the period 1995/1996, 36,000 tonnes of refined sugar were imported for the local market.

**FOOD**  
**BALANCE SHEET**

## Food Balance Sheet

### General Notes

1. All data relate to the Island of Mauritius only (not its dependencies).
2. Quantity is in tonnes unless otherwise specified.
3. (a) Gross imports include imports from dependencies.  
(b) Gross exports include exports to dependencies.
4. Estimated changes in stock:

A plus sign indicates that there has been a decrease in stock, that is, an increase in supply. A negative sign would mean the converse.

5. Data on production of foodcrops may not tally with production data published in other section since allowance has been made here for backyard production.
6. Local production of meat include imported live animals slaughtered in Mauritius. Estimates for off-abattoir slaughters have been included.
7. Data on fish and crustaceans are given in terms of wet-weight equivalent.
8. As from 1989 onward, population includes Mauritian residents and Mauritians residing abroad.
