ANNUAL DIGEST OF STATISTICS 2010

FOREWORD

This is the twenty-sixth issue of the Annual Digest of Statistics. It presents in a concise and readily accessible form, important statistical information available on the demographic, economic and social characteristics of Mauritius.

All data in the digest are the latest available as at end of June 2011. Some of them are provisional and are therefore subject to revision in later issues. Figures in each issue of the digest supersede and replace those appearing in previous ones.

Where necessary, figures have been rounded off to the nearest digit, and hence in some tables there may be slight discrepancies between the sum of the constituent items and the total given.

It is hoped that the data presented will prove useful to a wide range of users, policy makers and planners as well as the general public.

Readers interested in more comprehensive data may wish to consult the different publications of this office on each subject.

Regular publications, including the Economic and Social Indicators, series as well as ad hoc reports issued by this office are uploaded on our website at the following address: <http://statsmauritius.gov.mu>.

The co-operation and assistance given by public and private organisations in providing information for the preparation of this issue, are gratefully acknowledged.

Note: At the 1962 census each household was asked for the first time, to state the population group to which each member of his household claimed to belong.

Prior to 1962, it is probable that from one census to another, different criteria have been used in classifying the population by population groups.

Figures are therefore not strictly comparable from one census to another, before 1962.

Note: The increase in the number of civil marriages as from 1982 is due largely to improved registration of religious marriages with the coming into force of a new Civil Status Act as from January 1982.

Base: 2010 resident population estimated by adding the balance of births, deaths, and migration to the 2000 census population adjusted for underenumeration of young children.

Assumptions:

- (i) Fertility: The Total Fertility rate is 1.63 for the period 2005 - 2015 and thereafter stabilizes to 1.62 till 2050.
- (ii) Mortality: (a) The life expectancy at birth for males improves from 69.26 in the period 2005 - 2010 to 73.67 in the period 2025 - 2030 and then to 75.85 in the period 2045 - 2050.
(b) The life expectancy at birth for females improves from 76.32 in the period 2005 - 2010 to 78.88 in the period 2025 - 2030 and then to 80.24 in the period 2045 - 2050.
- (iii) Migration: A net yearly outmigration of 250 males and 200 females during 2010 - 2015; 200 males and 150 females during 2015 - 2020; 100 males and 100 females during 2020 - 2025 and 50 males and 50 females in the period 2025 - 2030 and then none afterwards

¹ As from January 1994, data on passenger traffic are being compiled from all embarkation and disembarkation cards. Prior to this period, they were based on a 10% sample of such cards. They include:

- (a) emigrants to and immigrants from the dependencies; and
- (b) movement of military personnel as from the 1962 Population Census but excludes those transit passengers who did not leave the airport.

SECTION 4 - PUBLIC FINANCE

Tables on Government Finance Statistics published in this report have been compiled according to the Government Finance Statistics Manual 2001(GFSM 2001) of the International Monetary Fund (IMF). The tables relate to Budgetary Central Government comprising all ministries and their departments.

Additional tables on General Government comprising of Consolidated Central Government (Budgetary Central Government, Extra Budgetary Units and the National Pensions Fund), Local Government and Rodrigues Regional Assembly are available in The Digest of Public Finance Statistics.

Data sets up to 2007/08, compiled according to the concepts and definitions as set down in the previous manual of the IMF, GFSM1986, are available in past issues of the Annual Digest of Statistics and The Digest of Public Finance Statistics as well as on the web site of the CSO at <http://statsmauritius.gov.mu>.

Budgetary Central Government Expense and Acquisition of Non Financial Assets includes all expenditure incurred (recurrent and capital) by ministries and their departments to provide goods and services to the community.

The economic classification (Table 4.3) identifies the different types of expenditure incurred, that is, wages and salaries, use of goods and services, social benefits, grants, etc., to provide the goods and services to the community. The classification by function (Table 4.4) shows total outlay (recurrent and capital expenditure) incurred in different areas: health, education, social protection, etc.

SECTION 7 – NATIONAL ACCOUNTS AND QUARTERLY NATIONAL ACCOUNTS

1. Introduction.

National Accounts data are compiled according to the recommendations of the 1993 System of National Accounts (SNA93). Concepts and terminologies used are defined below.

Quarterly National Accounts (QNA) estimates starting from the first quarter of 1999 are published by the Central Statistics Office. These quarterly estimates are compiled according to guidelines provided in the IMF manual entitled “Quarterly National Accounts Manual – Concepts, Data sources and Compilation”, which is itself based on the SNA 93.

Gross Domestic Product (GDP)

GDP is the aggregate money value of all goods and services produced within a country out of economic activity during a specified period usually a year, before provision for the consumption of fixed capital.

GDP at basic prices

GDP at basic prices is obtained as the difference between output and intermediate consumption whereby output is valued at basic prices and intermediate consumption at purchasers' prices.

The basic price is the amount receivable by the producer exclusive of taxes on products and inclusive of subsidies on products. The equivalent for imported products is the c.i.f. value, i.e. the value at the border of the importing country.

The purchasers' price is the amount payable by the purchaser exclusive of deductible taxes on products (e.g. deductible value added tax).

GDP at market prices

GDP at market prices is equal to the GDP at basic prices plus taxes (net of subsidies) on products.

Gross National Income (GNI)

GDP added to net primary income from abroad gives Gross National Income (GNI).

Gross National Disposable Income (GNDI)

Gross National Income (GNI) net of transfers from the rest of the world gives Gross National Disposable Income (GNDI).

Financial intermediation services indirectly measured (FISIM)

FISIM is obtained as the difference between interest received and interest paid by banks excluding those received on own funds. The total amount of FISIM was previously recorded as the intermediate consumption of a nominal industry. As recommended by the 1993 SNA, it is now allocated to users as follows: intermediate consumption of businesses, final consumption of households and government, and a component of exports of services.

Gross Domestic Fixed Capital Formation (GDFCF)

GDFCF is the net additions to the physical assets of the country in a year. These consist mainly of investment in buildings, plants, machinery and transport equipment, all valued at market prices.

Change in inventories

Change in inventories includes the value of the physical change in inventories of raw materials, work in progress, and finished goods held by producers

Consumption expenditure

Consumption expenditure is made up of final consumption expenditure of households and of government.

Government final consumption expenditure is further disaggregated into collective and individual consumption expenditure. **Collective** expenditure consists of the services which government provides to the community as a whole, for example, security and defence whereas **individual** expenditure is made up of expenses incurred in providing services which are mostly beneficial to individuals, mainly in respect of health and education.

Actual Government final consumption expenditure refers to expenditure incurred for the provision of collective services.

Actual final consumption expenditure covers goods and services supplied to households, irrespective of whether these goods and services are actually paid by government or households themselves. Consequently, it consists of expenditure incurred by households and government on the provision of individual services.

Gross National Saving

Gross National Disposable Income (GNDI) less total consumption gives Gross National Saving.

Exports and Imports of goods and services

Both exports and imports of goods are measured f.o.b. Insurance and freight, which represent the difference between the c.i.f and f.o.b values of imports of goods are recorded as imports of services.

Exports and imports of goods are compiled according to the General Trade System, using the national boundary as the statistical frontier. All goods entering the country are recorded in imports and goods leaving the country in exports.

2. Status of figures

2.1 National Accounts

National Accounts estimates are as at June 2011. Data for years 2009 to 2010 are “Revised” whilst those of year 2011 are “Forecast”.

The Main assumptions used in estimating 2011 figures are:

<u>Sector</u>	<u>Main assumption</u>	<u>Growth rate</u>
Sugarcane	Sugar production of 420,000 tonnes	-5.1%
EOE		+5.0%
Hotels and restaurants	Tourist arrivals: 980,000 Tourist earnings: R 42.5 billion	+4.0%
Construction		+1.0%
Transport, storage and communications		+5.5%
Financial intermediation	Higher growth expected in offshore activities	+5.7%

2.2 Quarterly National Accounts

Quarterly data for 2009 and up to the fourth quarter of 2010 are “Revised estimates” and those for the first quarter of 2011 are “First estimates”.

SECTION 10 - LABOUR STATISTICS

- (a) Prior to 2004, estimates of labour force, employment and unemployment that were published, were based on the latest Population Census or Labour Force Sample Survey, updated with data from surveys of establishments and information from various administrative sources. The estimates refer to population aged 12 years and over.
 - (b) As from 2004, the Continuous Multi Purpose Household Survey (CMPHS) is being used to measure labour force, employment and unemployment. This follows the recommendations of a Technical Committee set up to analyse the findings of a World Bank study on unemployment in Mauritius. With the amendment to the Labour Act in December 2007, whereby the minimum legal working age has been raised from 15 to 16 years, and the subsequent recommendation of ILO to be in line with the Act, the lower age cut-off point for the labour force is 16 years as from 2007.
2. Tables 10.2 to 10.8 show figures of employment and earnings derived from the **March** Survey of Employment and Earnings. The figures relate to **large establishments** only, defined as:
- (a) Agricultural establishments comprising:
 - (i) Sugar plantations of 10 hectares or more,
 - (ii) Tea plantations of 2 hectares or more,
 - (iii) All 'flue-cured' tobacco establishments, irrespective of acreage,
 - (iv) Other agricultural establishments employing at least 10 persons during the reference period (March 2010).
 - (b) Non-agricultural establishments employing at least 10 persons during the reference month. It is to be noted that 'outworkers', i.e. piece-rate workers who, although employed by an establishment, are working in their homes on materials provided by the establishment are excluded.
3. (a) Classification used is according to the National Standard Industrial Classification, which is an adaptation of the International Standard Industrial Classification Rev. 3 (ISIC Rev. 3) of 1990.
- (b) Establishments previously lumped under 'Central Government' are now allocated to their relevant industry groups according to their activities.

4. It is to be noted that apart from increases in salaries and wages, fluctuations in earnings (tables 10.4 to 10.8) may be due to:
 - (a) changes of different magnitude in the various categories of employees e.g. a large intake of employees at the lower end of the wage scale (as occurs when a new factory starts operation) has the effect of lowering the average earnings. On the other hand, a large intake of professionals by, say, an architectural firm can cause a sudden increase in the average monthly earnings.
 - (b) changes in overtime, regular allowances, bonuses and commissions.
5. Tables 10.9 - 10.12 show figures of wages/salaries and earnings by occupation. The figures shown in table 10.10 have been derived from the Quarterly Survey of Employment, Earnings and Hours of work carried out among a sample of **large establishments**. Large fluctuations noted in certain occupations are mainly due to changes in allowances and overtime.

¹ Black River Gorges National Park was proclaimed in 1994 and data on the area enclosed by the boundaries of the park were not available until 1997.² Islet National Park was proclaimed in 1994.³ Bras DEau & Poste La Fayette Reserves were proclaimed in 2002 and data of the area is included as from the year 2004.⁴ Includes Plantations, forest lands, scrub and grazing lands. Forest area was decreasing gradually. New estimates in private lands worked out in 2004.
