ANNUAL DIGEST OF STATISTICS 1995

FOREWORD

This is the eleventh time that the Digest of Statistics is being published on an annual basis. It is designed to present in a concise and readily accessible form the more important statistical series available on the demographic, economic and social characteristics of Mauritius.

All figures in the digest are the latest available as at end of June 1996. Some of the figures are therefore provisional and subject to revision in later issues. Figures in each issue of the digest supersede and replace those appearing in previous ones.

Where necessary, figures have been rounded off to the nearest final digit, and in some tables there may be discrepancies between the sum of the constituent items and the total as shown.

It is hoped that the data presented will suit a wide range of users, policy makers, planners as well as the general public.

The assistance given by public and private organisations in providing data for publication in this issue is gratefully acknowledged.

Note. At the 1962 census each householder was asked for the first time, to state the population group to which each member of his household claimed to belong.

Prior to 1962, it is probable that from one census to another, different criteria have been used in classifying the population by population groups. Figures are therefore not strictly comparable from one census to another, before 1962.

- (a) emigrants to and immigrants from the dependencies;
- (b) movement of military personnel as from the 1962 Population Census but excludes those transit passengers who did not leave the airport; and
- (c) the very small number of engaged or discharged seamen up to 1985.

SECTION 8 - EMPLOYMENT AND EARNINGS

Tables 8.1 - 8.6 show figures of employment and earnings derived from the Survey of Employment and Earnings. The figures, therefore, relate to large establishments only, defined as:

- (a) Agricultural establishments comprising:
 - (i) Sugar plantations of 10 hectares or more,
 - (ii) Tea plantations of 2 hectares or more,
 - (iii) All 'flue-cured' tobacco establishments, irrespective of acreage,
 - (iv) Other agricultural establishments employing at least 10 persons on the day of the survey.
 - (b) Non-agricultural establishments employing at least 10 persons on the day of the survey. It is to be noted that 'outworkers', i.e. piece-rate workers who, although employed by an establishment, are working in their homes on materials provided by the establishment are excluded.
 - (c) All Central and Local Government departments.
2. Tables 8.10 - 8.13 show figures of average wages/salaries and earnings of typical occupations, derived from the Survey of Employment, Earnings and Hours of work. This survey is carried out among a sample of large establishments in September of each year.
3. It is to be noted that apart from increases in salaries and wages, fluctuations in earnings may be due to:
- (a) changes of different magnitude in the various categories of employees e.g. a large intake of employees at the lower end of the wage scale (as occurs when a new factory starts operation) has the effect of lowering the average earnings. On the other hand, a large intake of professionals by, say, an architectural firm can cause a sudden increase in the average monthly earnings.
 - (b) changes in overtime, regular bonuses and commissions.
