DIGEST OF DEMOGRAPHIC STATISTICS - 1991

F O R E W O R D

This is the seventh issue of a regular publication of the Central Statistical Office on Demographic Statistics. It presents statistics on population, live births, still births, marriages, deaths and divorces. A set of projections and life-tables is also included.

A novel feature of this issue is that data for the country are presented not only at the level of the two main islands but for the republic as well.

It is hoped that the data assembled in this report will be of valuable help to the public in general and to planners and policy makers in particular.

Most of the data required for the preparation of this report were obtained from the Civil Status Division, except for Divorce Statistics which were supplied by the Judicial Department. The assistance and cooperation of these departments are gratefully acknowledged.

D. Zmanay
Director of Statistics

Introductory notes	(i) - (iii)
 <u>SECTION 1 - POPULATION</u>	
Table 1.1 - Estimated resident population of Mauritius as at 31st December 1990 and 1991 based on the 1990 population census data	1
1.2 - Evolution of the resident population of the Republic of Mauritius as from the 1990 census to 1st July 1991	1
1.3 - Population growth in intercensal periods - Republic of Mauritius, 1951 - 1990	2
1.4(a) - Population enumerated at each census by population group and sex - Island of Mauritius, 1846 - 1952	3
1.4(b) - Population enumerated at each census by community and sex - State of Mauritius, 1962 - 1990	4
1.5 - Rate of increase of the population of Mauritius compared with other countries, 1985 - 1989	5
1.6 - Evolution of the population of the Republic of Mauritius by geographical district and sex between the 1983 and 1990 censuses	6
1.7 - Estimated resident population of the Republic of Mauritius by geographical district and sex, 1990 & 1991 (Mid-year estimates)	7
1.8 - Estimated resident population of the Republic of Mauritius by geographical district and sex, 1990 & 1991 (End-of-year estimates)	8
1.9 - Evolution of the population by urban/rural residence and sex between the 1983 and 1990 censuses, Republic of Mauritius	9
1.10 - Estimated resident population by urban/rural residence and sex - Republic of Mauritius, 1990 & 1991 (Mid-year estimates)	10
1.11 - Estimated resident population by urban/rural residence and sex- Republic of Mauritius, 1990 & 1991 (End-of-year estimates)	11
1.12(a) - Estimated resident population of the Republic of Mauritius by district, Municipal Council Area (MCA) and Village Council Area (VCA) as at the 1990 census	12
1.12(b) - Estimated resident population of the Republic of Mauritius by district, Municipal Council Area (MCA) and Village Council Area (VCA) 1st July 1991	16

Vital registration forms	
--------------------------	--

INTRODUCTORY MATTER

Section 1 - Population

For the first time this issue of the Digest deals with the resident population of the country rather than "de facto" or present population.

Prior to 1990, censuses were taken on a "de facto" basis, which counts all persons present in a household or institution on census night. This method is simple and reduces the risk of omissions and double counts, but it includes non-residents present on census night and excludes residents who were away. For the 1990 census, a series of questions were asked which allow a count of the resident population to be made by excluding foreign visitors and including residents who were temporarily away on census night.

The resident population base is expected to be more realistic than the "de facto" base of past years and has therefore been used for making post-censal population estimates after 1990. It may be noted that the 1990 census count of residents was 1,056,827 as compared to a "present" population count of 1,055,527.

Section 2 - Vital Statistics

The statistics of births, deaths and marriages have been compiled from raw data supplied by the Civil Status Division, Prime Minister's Office while statistics of divorce have been obtained from the Office of the Master and Registrar, Supreme Court.

The Vital Registration Forms for the recording of live births, still births, deaths and marriages occurring in Mauritius are shown at the end of this report.

Section 3 - Live births

Formerly, the birth statistics published in the Annual Digest of Statistics for any year related only to births which were registered in that year. Although, not all births occurring in a year are registered within that year because a delay of 45 days is allowed for registration, the differences between birth statistics tabulated by year of registration and year of occurrence are not expected to be large. In this report and as recommended by the United Nations, an additional series of tabulations which present birth statistics according to year of occurrence, have been included.

All fertility and reproduction rates, whether of previous reports or the present one, are based on births occurred during the year. The only exception is the crude birth rate which is based on total births registered during the year.

Section 4 - Still births

The tables in this report are more detailed than those appearing in the Annual Digest of Statistics.

Data on still births are compiled only according to date of registration. Since still births, like deaths, are normally registered within 24 hours of occurrence, there is not much difference between the data tabulated by date of registration and those tabulated by date of occurrence.

Section 5 - Deaths

The death statistics for any year are based on events registered during that year. Among the main tables included in this section are the life tables for the Census years 1983 and 1990 and two tables showing deaths due to selected causes, one for the whole population and the other one for children aged under one year.

Section 6 - Marriages

Prior to 1982, the statistics of marriages for any given year comprised civil marriages and marriages by legally authorised religious persons.

With the introduction of the Civil Status Act of 1981 which came into operation on 1st January 1982, the figures for marriage for the period January 1982 to November 1987 included

- (a) Civil marriages
- (b) Religious marriages having civil effect
- (c) 'Past religious marriages', i.e. marriages celebrated before 1982 (either in Mauritius or abroad) but registered during the year; and
- (d) Muslim religious marriages (i.e. marriages under Muslim Personal Law)

On the 14th November 1987, the Civil Status Act was amended and since then marriage statistics no longer include Muslim religious marriages under Muslim Personal Law.

It is to be noted that from January 1982 to date, some double counting may be present in the marriage statistics. This occurs because some couples married under Muslim Personal Law during the period January 1982 to November 1987 subsequently marry civilly as well. It is estimated that between 10 to 40 such cases may have been registered annually from 1982 onwards. The total number of marriages celebrated under the Muslim Personal Law during the period when it was in force was 2,580.

Section 7 - Divorces

The number of divorces for any year relate to provisional decrees of divorce which are granted when the Court is satisfied that the petitioner has established his case. Three months after a provisional decree is made, any of the two parties may apply to the Court for the provisional decree to be made permanent.

Section 8 - Projections of the resident population

Two series of population projections have been prepared; the first without migration (Variant I) and the second assuming net yearly outmigration of 1,200 males and 1,300 females (Variant II). The demographic implications of the second variant are presented in tables 8.3 and 8.4.

1931	115,666	54,733	60,933	268,649	139,533	129,116	8,923	6,343	2,580
1944	143,056	67,136	75,920	265,247	136,382	128,865	10,882	6,808	4,074
1952	148,238	70,370	77,868	335,327	171,241	164,086	17,850	10,421	7,429

Note: At the 1962 census each householder was asked for the first time, to state the population group to which each member of his household claimed to belong.

Prior to 1962, it is probable that from one census to another, different criteria have been used in classifying the population by population groups. Figures are therefore not strictly comparable from one census to another, before 1962.

Table 1.4(b) - Population enumerated at each census by community and sex - Republic of Mauritius^{1/}, 1962-1990

Year of census	Community	Republic of Mauritius			Island of Mauritius			Island of Rodrigues

¹ the population estimates are given according to new boundaries: Proclamation No 8 of 1990, which came into force on 1st July 1991.

Note:

- (i) Estimates are based on the 1990 Population Census data.
- (ii) Estimates of population at the district level and for Municipal Council Areas (MCA) have been updated by allowing for births, deaths and migration. However, in the case of Village Council Areas (VCA), the estimates have been obtained by assuming a rate of increase of the same order as for the geographical district of which they form part.

1990	1,058,775	22,602	7,031	462	365	11,425	549
1991	1,070,128	22,197	7,027	413	400	11,295	707

1/ figures for 1963 - 71 have been revised in the light of the final 1972 population census data; figures for 1973 - 82 and 1984 - 89 have been revised in the light of the 1983 and 1990 population census data adjusted for underenumeration of young children

Note: The increase in the number of civil marriages as from 1982 is due largely to improved registration of religious marriages with the coming into force of a new Civil Status Act as from January, 1982.

BASE : 1990 Census adjusted for underenumeration (1,329 males and 786 females at ages 0-5) and pro-rated for "not stated" ages (30 males and 42 females)

ASSUMPTIONS :

- (i) Fertility : Gross reproduction rate declines from 1.14 in 1990 to 0.99 in 2000 and 0.90 in 2010.
- (ii) Mortality : The expectation of life is assumed to increase by about 1.5 years for males and 2.5 years for females during 1990-2000.
- (iii) Migration : Net yearly outmigration of 1,200 males and 1,300 females during 1990-2000 and none afterwards.

20-24	48,302	46,719	46,935	44,845	1,967	1,934

The estimates by single year of age have been obtained by appropriate splitting of the projected population by five year age group. Although the figures are given to the last digit, it is recommended that because of the limitations on their reliability, they be rounded before use.

Table 8.5(b) - Projections of the resident population under 25 years by single year of age and sex - Republic of Mauritius, Island of Mauritius and island of Rodrigues (Mauritius)

1st July 2000

Age (years)	Republic of Mauritius		Island of Mauritius		Island of Rodrigues	
	Male	Female	Male	Female	Male	Female

20 - 24	49,000	47,578	47,052	45,661	1,948	1,917

The estimates by single year of age have been obtained by appropriate splitting of the projected population by five year age group. Although the figures are given to the last digit, it is recommended that because of the limitations on their reliability, they be rounded before use.

G L O S S A R Y

Population

De facto population - a population enumerated or estimated on the basis of those present at a particular time, including temporary visitors but excluding residents temporarily absent.

Resident (De jure) population - a population enumerated or estimated on the basis of usual residence, including temporary visitors and excluding residents temporarily absent.

Natural Increase - the excess of births over deaths.

Rate of Natural Increase - the difference between the births and deaths occurring during a year per 1,000 mid-year population. The rate is the difference between the "crude birth rate" and the "crude death rate".

Age structure

Dependency ratio - the ratio of the combined child population (under 15 years) and aged population (65 years and over) to the population of intermediate age (15-64 years).

Median age - the age which divides the population into two equal size groups, one of which is younger and the other of which is older than the median.

Fertility

Crude birth rate - the number of live births registered in a year per 1,000 mid-year population.

Age specific fertility rate - the number of live births to women of a specified age-group per 1,000 women in that age-group.

General fertility rate - the number of live births occurring in a year per 1,000 women aged 15-49 years at mid-year.

Total fertility rate - the average number of children born to an average woman assuming that she survives to the end of her childbearing age and is subjected to a fixed schedule of age-specific fertility rates.

Gross reproduction rate - the average number of daughters born to an average woman assuming that she survives to the end of her childbearing age and is subjected to a fixed schedule of age-specific fertility rates.

Net reproduction rate - the extent to which an average woman will replace herself, assuming a fixed schedule of age-specific mortality and fertility rates, to prevail through her reproductive span of life.

Live birth order - the ordered number of a given live birth in relation to all previous live births of the same woman.

Mortality

Crude death rate : the number of deaths in a year per 1,000 mid-year population.

Age specific death rate : the number of deaths of a specified age group occurring in a year per 1,000 mid-year population in that age group.

Infant death : death of an infant aged under one year.

Infant mortality rate : the number of infant deaths in a year per 1,000 live-births during the year.

Still birth : a child born after the twenty-eighth week of pregnancy and not breathing or showing any signs of life at any time after being completely expelled from the mother.

Still birth rate : the number of still births in a year per 1,000 total births (live and still born) during the year.

Early neonatal mortality rate : the number of deaths of infants under 7 days of age in a year per 1,000 live births during a year.

Late neonatal mortality rate : the number of deaths of infants aged between 7 and 28 days in a year per 1,000 live births during a year.

Neonatal mortality rate : the number of deaths of infants aged less than 28 days in a year per 1,000 live births during the year.

Post neonatal mortality rate : the number of deaths in a year of infants aged between 28 days and under one year per 1,000 live births during the year.

Expectation of life at birth (l_0) : the average number of years that a new born child would be expected to live if subjected to the mortality conditions associated by a particular set of age-specific death rates.

Marriage

Marriage rate : the number of persons married in a year per 1,000 mid-year population.

Divorce

Divorce rate : the number of persons divorced in a year per 1,000 mid-year population.

International Migration

Net migration : because of the absence of reliable data on immigrants and emigrants, the net migration is taken as the difference between international arrivals and departures of residents.

Net migration rate : the net migration in a year per 1,000 mid-year population.
