## DIGEST OF DEMOGRAPHIC STATISTICS - 1993

### FOREWORD

This issue is the ninth of a regular publication of the Central Statistical Office on Demographic Statistics. It presents statistics on population, live births, still births, marriages, deaths and divorces. A set of population projections and life-tables is also included.

As in the previous issue, data for the country are presented not only at the level of the two main islands of Mauritius and Rodrigues but for the Republic as well.

It is hoped that the data published in this report will prove valuable to the public, particularly to planners and decision makers.

Most of the data required for the preparation of this report were obtained from the Civil Status Division, except for divorce statistics which were supplied by the Judicial Department. The data was processed by the Central Information Systems Division (CISD) of the Ministry of Finance. The assistance and cooperation of these departments are gratefully acknowledged.

	Page (i) - (v)
Introductory notes	
<b><u>SECTION 1 - POPULATION</u></b>	
Table 1.1 - Estimated resident population of Mauritius as at 31st December 1992 and 1993	1
1.2 - Evolution of the resident population of the Republic of Mauritius as from the 1990 census to 1st July 1993	1
1.3 - Population growth in intercensal periods - Republic of Mauritius, 1851 - 1990	2
1.4(a) - Population enumerated at each census by population group and sex - Island of Mauritius, 1846 - 1952	3
1.4(b) - Population enumerated at each census by community and sex - Republic of Mauritius, 1962 - 1990	4
1.5 - Rate of increase of the population of the Republic of Mauritius as compared with other countries, 1985 - 1990	5
1.6 - Evolution of the population of the Republic of Mauritius by geographical district and sex between the 1983 and 1990 censuses	6
1.7 - Estimated resident population by geographical district and sex - Republic of Mauritius, 1992 & 1993 (Mid-year estimates)	8
1.8 - Estimated resident population by geographical district and sex - Republic of Mauritius, 1992 & 1993 (End-of-year estimates)	9
1.9 - Evolution of the population by urban/rural residence and sex between the 1983 and 1990 censuses - Republic of Mauritius	10
1.10 - Estimated resident population by urban/rural residence and sex - Republic of Mauritius, 1991 - 1993 (Mid-year estimates)	12
1.11 - Estimated resident population by urban/rural residence and sex - Republic of Mauritius, 1991 - 1993 (End-of-year estimates)	13
1.12 - Estimated resident population by district, Municipal Council Area (MCA) and Village Council Area (VCA) - Republic of Mauritius, 1st July 1992 & 1993	14

## INTRODUCTORY NOTES

### Section 1 - Population

As in the previous issue of the Digest, this report deals with the resident population of the country rather than "de facto" or present population.

Prior to 1990, censuses were taken on a "de facto" basis, which counts all persons present in a household or institution on census night. This method is simple and reduces the risk of omissions and double counts, but it includes non-residents present on census night and excludes residents who were away. For the 1990 census, a series of questions were asked which allow a count of the resident population to be made by excluding foreign visitors and including residents who were temporarily away on census night.

The resident population base is expected to be more realistic than the "de facto" base of past years and has therefore been used for making post-censal population estimates after 1990. It may be noted that the 1990 census count of residents was 1,056,827 as compared to a "present" population count of 1,055,523.

### Section 2 - Vital Statistics

The statistics of births, deaths and marriages have been compiled from raw data supplied by the Civil Status Division, Prime Minister's Office while statistics of divorce have been obtained from the Office of the Master and Registrar, Supreme Court.

The Vital Registration Forms for the recording of live births, still births, deaths and marriages occurring in Mauritius are shown at the end of this report.

### Section 3 - Live births

Formerly, the birth statistics published in the Annual Digest of Statistics for any year related only to births which were registered in that year. Although not all births occurring in a year are registered within that year because a delay of 45 days is allowed for registration, the differences between birth statistics tabulated by year of registration and year of occurrence are not expected to be large. However, as recommended by the United Nations, an additional series of tabulations which present birth statistics according to year of occurrence have been included in this report.

All fertility and reproduction rates, whether in previous reports or in the present one, are based on births occurred during the year. The only exception is the crude birth rate which is based on total births registered during the year.

#### **Section 4 - Still births**

Data on still births are compiled only according to date of registration. Since still births are normally registered within 24 hours of occurrence, there is not much difference between the data tabulated by date of registration and those tabulated by date of occurrence

#### **Section 5 - Deaths**

The death statistics for any year are based on events registered during that year. Like still births, there is no significant difference between the number registered or occurred since death registration also take place within 24 hours of occurrence.

The main tables included in this section are the life tables for the years 1983, 1990, 1991 (Rodrigues only) and 1992 (excluding Rodrigues) and the tables showing deaths due to selected causes.

#### **Section 6 - Marriages**

Prior to 1982, the statistics of marriages for any given year comprised civil marriages and marriages by legally authorised religious persons.

With the introduction of the Civil Status Act of 1981 which came into operation on 1st January 1982, the figures for marriages for the period January 1982 to November 1987 included:

- (a) Civil marriages
- (b) Religious marriages having civil effect
- (c) 'Past religious marriages', i.e. marriages celebrated before 1982 (either in Mauritius or abroad) but registered during the year; and
- (d) Muslim religious marriages (i.e. marriages under Muslim Personal Law)

On the 14th November 1987, the Civil Status Act was amended and since then marriage statistics no longer include Muslim religious marriages under Muslim Personal Law.

It is to be noted that from January 1982 to date, some double counting may be present in the marriage statistics. This occurs because some couples married under Muslim Personal Law during the period January 1982 to November 1987 subsequently marry civilly as well. It is estimated that between 10 to 40 such cases may have been registered annually from 1982 onwards. The total number of marriages celebrated under the Muslim Personal Law during the period when it was in force was 2,580.

## **Section 7 - Divorces**

The number of divorces for any year relate to provisional decrees of divorce which are granted when the Court is satisfied that the petitioner has established his case. Three months after a provisional decree is made, any of the two parties may apply to the Court for the provisional decree to be made permanent.

## **Section 8 - Projections of the resident population**

In the past, regular population projections by sex and age have been prepared either for the Island of Mauritius or more recently, for the Republic as a whole. Given the small population size of Rodrigues separate projections for the island were generally restricted to the total population only. Recently there has been more and more pressing demand for projections by sex and age for the two islands separately. An attempt has therefore been made to prepare such projections and the results are presented in this digest. The projection for the Republic has been obtained by summing the separate projections for the islands of Mauritius and Rodrigues. It has not been possible to integrate Agalega and Saint Brandon islands which together had a resident population of 170 (90 males and 80 females) at the 1990 census.

Up to now, projections published by this office have not gone beyond a range of 20 years. However, there is now more and more interest in long term perspective studies, and in particular the long term implications of ageing with respect to health and pensions issues. It has therefore been decided to carry forward the projections over a period of 40 years and to publish the results although their reliability is expected to diminish over the long range.

It is desirable to prepare projections under different sets of assumptions. However, it has been observed that publication of the different variants often leads to confusion: different users may use different variants and still wish to compare results whilst the same user may use different variants at different times without realising the fact. Hence, although this time three variants have been prepared (medium, high and low), only the medium variant, which is considered to be the most likely, is published in this digest. The relatively few users and analysts who wish to work with the other two variants can obtain them upon request together with technical notes concerning the assumptions.

The base for all projections is the estimated 1993 resident population by sex and age. The estimate has been obtained by adding the balance of births, deaths, and migration to the 1990 census population adjusted for underenumeration of young children.

The estimates by single year of age as figured in tables 8.4(a), 8.4(b) and 8.4(c) have been obtained by appropriate splitting of the projected population by five year age group. Although the figures are given to the last digit, it is recommended that because of the limitations on their reliability, they be rounded before use.

The assumptions for the medium variant projections are as follows:

(i) **Fertility (expressed in terms of total fertility rate)**

	<u>1988-93</u>	<u>1993-98</u>	<u>1998-03</u>	<u>2003-08</u>	<u>2008-33</u>
Republic of Mauritius	2.28	2.25	2.05	1.90	1.85
Island of Mauritius	2.28	2.25	2.05	1.90	1.85
Island of Rodrigues	2.60 <sup>1/</sup>	2.40	2.20	2.10	2.10

1/ The TFR is for 1993

(ii) **Mortality: Sex and age-specific survival ratios improve from current levels in accordance with the Revised Coale and Demeny West Model Life Tables. The implied life expectancies at birth are as follows:**

<u>Period</u>	<u>Republic</u>		<u>Island of Mauritius</u>		<u>Rodrigues</u>	
	<u>Male</u>	<u>Female</u>	<u>Male</u>	<u>Female</u>	<u>Male</u>	<u>Female</u>
1988 - 1993	66.07	73.71	66.04	73.73	67.06	73.11
1993 - 1998	67.49	74.69	67.48	74.69	67.80	74.63
1998 - 2003	68.38	75.89	68.36	75.89	68.83	76.01
2003 - 2008	69.20	76.90	69.17	76.89	70.04	77.17
2008 - 2013	69.92	77.80	69.88	77.79	71.14	78.20
2013 - 2018	70.56	78.67	70.51	78.65	72.03	79.15

1944	143,056	67,136	75,920	265,247	136,382	128,865	10,882	6,808	4,074
1952	148,238	70,370	77,868	335,327	171,241	164,086	17,850	10,421	7,429

Note: At the 1962 census each householder was asked for the first time, to state the population group to which each member of his household claimed to belong.

Prior to 1962, it is probable that from one census to another, different criteria have been used in classifying the population by population groups. Figures are therefore not strictly comparable from one census to another, before 1962.

Note:

- (i) Estimates are based on the 1990 Census population.
- (ii) Estimates of population at the district level and for Municipal Council Areas (MCA) have been updated by allowing for births, deaths and migration. However, in the case of Village Council Areas (VCA), the estimates have been obtained by assuming a rate of increase of population of the same order as for the geographical district of which they form part.
- (iii) The population estimates for Municipal Council Areas (MCA) and Village Council Area (V) are given according to new boundaries which came into effect on 1st July 1991 for the MCAs and 16th June 1992 for the VCAs.

1/ excluding Agalega & Saint Brandon.

2/ figures for 1963-1971 have been revised in the light of the final 1972 population census data; figures for 1973-1982 and 1984-1989 have been respectively revised in the light of the 1983 and 1990 population census data adjusted for underenumeration of young children.

Note: The increase in the number of civil marriages as from 1982 is due largely to improved registration of religious marriages with the coming into force of a new Civil Status Act as from January, 1982.

1993	1,062,810	20.4	6.8	19.6	15.1	21.4

1/ figures for 1963 - 1971 have been revised in the light of the final 1972 population census data: figures for 1973 - 1982 and 1984 - 1989 have been respectively revised in the light of the 1983 and 1990 census data adjusted for underenumeration of young children.

2/ the rate reached 188.0 in 1945 when there were poliomyelitis and dysentery epidemics

3/ the rate reached 186.2 in 1948 when there was an epidemic of whooping cough

1/  
**Table 2.2(c) - Population and vital statistics rates - Island of Rodrigues, 1961 - 1993**

Year	Population at mid- year 2/	Crude birth rate	Crude death rate	Infant mortality rate	Still birth rate	Marriage rate
1961	18,089	46.8	12.8	93.7	31.3	16.8

1992	34,434	20.9	5.1	26.5	10.6	9.8
1993 3/	34,495	19.2	4.6	21.1	6.0	11.2

1/ because of the small number of vital events, the rates have been calculated by taking the average for three years in order to remove wide fluctuations in the yearly data

2/ figures for 1973 - 1982 and 1984 - 1989 have been respectively revised in the light of the 1983 and 1990 population census data.

3/ for the year 1993 only

1/ according to proclaimed boundaries altered in 1963 (procl. No 12 & 13), in 1965 (procl. No 23) and in 1967 (procl. No 2).

As from 1st July 1991, boundaries have further been enlarged (procl. No 8 of 1990). Deaths for the periods July 1991 - December 1991 and Jan 1992 - June 1992 have been adjusted to take care of the new boundaries which came into effect on 1st July 1991.

2/ excluding Agalega and Saint Brandon

3/ data for July 1991 - June 1992 have been revised in the light of reliable vital statistics for new MCA boundaries available only as from July 1992

## GLOSSARY

### Population

De facto population : a population enumerated or estimated on the basis of those present at a particular time, including temporary visitors but excluding residents temporarily absent.

Resident (De jure) population : a population enumerated or estimated on the basis of normal residence excluding temporary visitors and including residents temporarily absent.

Natural Increase : the excess of births over deaths.

Rate of Natural Increase : the difference between the births and deaths occurring during a year per 1,000 mid-year population. This rate is the difference between the "crude birth rate" and the "crude death rate".

### Age structure

Dependency ratio : the ratio of the combined child population (under 15 years) and aged population (65 years and over) to the population of intermediate age (15 - 64 years).

Median age : the age which divides the population into two equal-size groups, one of which is younger and the other of which is older than the median.

### Fertility

Crude birth rate : the number of live births registered in a year per 1,000 mid-year population

Age specific fertility rate : the number of live births to women of a specified age-group per 1,000 women in that age-group.

General fertility rate : the number of live births occurring in a year per 1,000 women aged (15 - 49) years at mid-year.

Total fertility rate : the average number of children born to an average woman assuming that she survives to the end of her child-bearing age and is subjected to a fixed schedule of age-specific fertility rates.

Gross reproduction rate : the average number of daughters born to an average woman assuming that she survives to the end of her child-bearing age and is subjected to a fixed schedule of age-specific fertility rates.

Net reproduction rate : the extent to which an average woman will replace herself, assuming a fixed schedule of age-specific mortality and fertility rates to prevail through her reproductive span of life

Live birth order : the ordinal number of a given live birth in relation to all previous live births of the same woman.

## **Mortality**

**Crude death rate** : the number of deaths in a year per 1,000 mid-year population.

**Age specific death rate** : the number of deaths of a specified age-group occurring in a year per 1,000 mid-year population in that age-group.

**Infant death** : death of an infant aged under one year.

**Infant mortality rate** : the number of infant deaths in a year per 1,000 live-births during the year.

**Still birth** : a child born after the twenty-eighth week of pregnancy and not breathing or showing any signs of life at any time after being completely expelled from the mother.

**Still birth rate** : the number of still births in a year per 1,000 total births (live births and still births) during the year

**Early neonatal mortality rate** : the number of deaths of infants under 7 days of age in a year per 1,000 live births during a year.

**Late neonatal mortality rate** : the number of deaths of infants aged between 7 and 28 days in a year per 1,000 live births during a year.

**Neonatal mortality rate** : the number of deaths of infants aged less than 28 days in a year per 1,000 live births during the year

**Post neonatal mortality rate** : the number of deaths in a year of infants aged between 28 days and under one year, per 1,000 live births during the year.

**Expectation of live at birth ( $e_0$ )** : the average number of years that a new born child would be expected to live if subjected to the mortality conditions expressed by a particular set of age-specific death rates

## **Marriage**

**Marriage rate** : the number of persons married in a year per 1,000 mid-year population.

## **Divorce**

**Divorce rate** : the number of persons divorced in a year per 1,000 mid-year population

## **International Migration**

**Net migration** : because of the absence of reliable data on immigrants and emigrants, the net migration is taken as the difference between international arrivals and departures of residents

**Net migration rate** : the net migration in a year per 1,000 mid-year population.

## REGISTRATION OF LIVE BIRTHS (1)

Civil Status Office _____					
Serial No _____					
Date of Registration _____					
Surname of child					
Names					
<i>For Civil Status Office Use</i>		<i>Stat Codes only</i>			
Ethnical Group					
Sex					
Religion					
District of Residence					
Township (if applicable)					
Date of Birth					
Legitimacy					
District of C.S.O.					
No. of Regr. and page					
Plurality					

509712/87—50m

Maiden Surname of Mother
