## **DIGEST OF PUBLIC FINANCE STATISTICS**

### **FOR E W O R D**

This is the thirteenth issue of the Digest of Public Finance Statistics, a regular annual publication of the Central Statistics Office.

The digest contains detailed data on government operations for the financial years 1996/97 to 2001/2002. The tables have been prepared in accordance with the recommendations of the Government Finance Statistics (GFS) 1986 Manual of the International Monetary Fund.

It is hoped that the statistics will be useful to the public in general, and in particular, to planners and policy makers.

The Treasury, the municipalities, the district councils, the social security schemes and the extra budgetary units forming part of government provide information needed for the preparation of this report. This Office herewith acknowledges the valuable contribution of these institutions.

## Concepts and definitions

### **1. Concepts**

Detailed data on revenue, grants, expenditure, lending minus repayments, financing and debt of the general government sector have been prepared according to the concepts and definitions laid down in 'A Manual on Government Finance Statistics (GFS) 1986' of the International Monetary Fund.

Data on wages and salaries in the public sector and income tax analysis by range of liable income for individuals and companies are also provided.

### **2. Definition of main aggregates**

**Revenue** includes nonrepayable receipts from taxes (i.e. compulsory payments to Government), income from property such as interests and dividends, fees and other charges. Non repayable receipts from other Governments and international institutions are separately classified under grants.

**Expenditure** includes all nonrepayable payments made by Government, whether for current or capital purposes. Unlike the treatment in receipts, payments of grants or transfers are included within expenditure itself rather than forming a separate category.

**Lending minus repayments** consists of loans made by Government to public and private bodies net of repayments of past loans for purposes of public policy. Government's acquisition of equities for public policy purposes is also included here.

**Deficit or surplus** is defined as revenue and grants received less total expenditure and net lending. It is also equal (with an opposite sign) to the amount of net borrowing by the Government.

**Financing** represents the means by which a Government provides financial resources to cover a budget deficit or allocates financial resources arising from a surplus. It thus includes Government borrowing and amortization vis-à-vis all other sectors, domestic and foreign. According to the GFS manual, since transactions with the IMF are directly connected with management of the country's international reserves, they should be included in the functions of the Central Bank (Bank of Mauritius). Hence, receipts of funds from and payments to the IMF have been excluded from Government accounts and the net transactions treated as a net borrowing from the central bank. Similarly, in the tables relating to Central Government debt, borrowings from the IMF are included in domestic debt, i.e., from the central bank.

**Debt** represents the outstanding stock of liabilities of the Government to the rest of the economy and the world. It excludes borrowing and lending transactions among units forming part of central Government. For example, investment of the surpluses of the National Pensions Fund with Government, is not included in consolidated Central Government debt.

### **3. Coverage**

#### **3.1 The General Government Sector**

**Government** is defined as consisting of all units performing Government functions: that is, the implementation of public policy through the provision of primarily non-market services and the transfer of income, supported mainly by compulsory levies.

The **General Government** sector is made up of (i) Central Government and (ii) Local Government.

(i) **Central Government** covers all units that are agencies of the country's central authority. It consists of Budgetary Central Government, Extra Budgetary Units and Social Security Schemes.

**Budgetary Central Government** includes all ministries and departments with the exception of Civil Aviation, Postal services and Waste Water Authority.

The Consolidated Sinking Fund, which is made up of contributions provided by the Government for the gradual redemption of Government domestic debt, is also considered to form part of the Budgetary Central Government accounts.

**Extra Budgetary Units** are agencies responsible for the performance of specialised governmental functions in such fields as health, education, social welfare, construction and so on, under the authority of Central Government. (See List 4.1)

**Social Security Schemes** are schemes imposed, controlled or financed by the public authorities for the purpose of providing social security benefits for the community. Included are the National Pensions Fund, the Employees Welfare Fund and the National Savings Fund.

(ii) **Local Government** consists of municipalities and district councils/ village councils exercising an independent competence as government units.

#### **3.2 The Public Sector**

The **Public Sector** consists of the general government sector, non-financial public enterprises and public financial institutions.

An enterprise is considered as public if it is entirely or mainly owned and/or controlled by government itself or by some other public institutions.

'Own' is meant having all or a majority of the shares or other forms of capital participation. 'Control' implies having an effective influence in the main aspects of management.

**Non-Financial Public Enterprises** are government-owned or government-controlled units selling goods and services to the public on a large scale. (See List 4.2)

**Public Financial Institutions** are government-owned or government-controlled institutions primarily engaged in both incurring liabilities and acquiring financial assets in the market. (See List 4.3)
