Road Transport and Accident Statistics

(January - June 1993)

1.1 Vehicles registered as at June 1993

There were some 161,550 vehicles registered at the National Transport Authority (N.T.A) as at the end of June 1993, compared to 155,320 at the end of December 1992, showing a net addition of about 6,200 vehicles during the first semester of 1993.

Nearly half of the fleet consisted of motorised two-wheelers (81,900): autocyles (63,900), motorcycles (18,000). Passenger cars inclusive of dual purpose vehicles (D.P.V) constituted 35% (55,200) of the fleet, goods vehicles, 11% (17,200), and buses 1% (2176).

1.2 Net additions

During the period January to June 1993, the fleet was strengthened with the addition of 8,400 vehicles (6,800 new and 1,600 second hand), but as some 2,200 were put off the road, the net increase works out to 6,200 only. This figure, however, is lower than the increase of about 8,000 registered during the corresponding semester of 1992 and is, in fact explained by a reduction of about 1000 in the registration of new vehicles and an increase of 800 in vehicles put off the road.

Net additions by type of vehicles are as follows (Table 1.2): two-wheelers + 4100; passenger cars +1,260; goods vehicles +700; buses +80 ; and other vehicles + 90.

1.3 Passenger transport

During the first semester of 1993, 1200 new and 900 second hand passenger cars were licensed which increased the fleet size to 55,200. Registration of new passenger cars which had increased substantially by around 7% annually during the previous two years, increased by only 2% during the first semester of 1993. The total comprised 38,300 motor cars and 16,900 D.P.V's.

During the same period, 153 new buses were registered, while 75 were put off the road bringing the total number of buses at June 1993 to 2175.

2.1 Road accidents

Between January and June 1993, 6950 accidents were reported at the Police Stations showing a slight increase of about 1% over the first semester of 1992. The accident rate, i.e the number of accidents per 100,000 population remained at the 1992 level of 661 and the number of accidents per 1000 registered motor vehicles dropped slightly to 44 from 46 in 1992.

2.2 Casualties

Whilst the number of casualties stood at the same level of about 2050 as during the first six months of 1992, the number of fatal cases increased considerably from 53 to 84. Cases involving serious injuries dropped by 14% from 173 to 159 in 1993, and those with slight injuries by 2% during the corresponding period.

Casualties by class of road users show that riders of motor and auto cycles remained the most vulnerable, accounting for 33% of the total number, followed by pedestrians 28%, passengers 23% and pedal cyclists 8%.

It is recalled that during the whole year 1992, a total of 14,371 road traffic accidents was reported which resulting in 4,395 casualties of which 119 were fatal.

2.3 Vehicles involved

There were 11,832 vehicles involved in road accidents during the period, almost the same number as during the corresponding period of last year. Nearly half (5,830) were passenger cars of which 4,979 were private cars and 851 taxis; motorised two-wheeler's accounted for 21% or 2,432. An increase of 5% was noted in accidents involving private cars whilst those involving goods vehicles rose by 10%.
