

**PRODUCER PRICE INDEX - MANUFACTURING (PPI-M)**  
**Food, Beverages and Tobacco**  
**(October - December 1996)**

**Introduction**

The Producer Price Index - Manufacturing (PPI-M) measures the average change in the selling prices received by manufacturers for the part of their output that is sold on the domestic market. This issue of the "Economic Indicators" presents changes in the indices for the "Food, beverages and tobacco" sector during the fourth quarter of 1996. Revised figures for the previous months are also given. It is recalled that the indices are computed using calendar year 1993 as the reference period.

**2. PPI-M: Food, Beverages and Tobacco**

**2.1 Monthly change**

The overall Producer Price Index for "Food, beverages and tobacco" stood at 129.1 at the end of December 1996 following slight increases of 0.1% in November and 0.2% in December. In October, the index remained at almost the same level as in September 1996 with insignificant changes at the sub-group level. The index for the "Food" sector rose by 0.1% in both October and November whilst in December 1996 the increase was of the order of 0.4% following a 4.9% rise in prices received for prepared animal feeds. On the other hand, the index for "Beverages and Tobacco", with nearly 45% of the total weight, remained quite stable throughout the fourth quarter of 1996. Table 1 shows the evolution of the monthly indices by industry group since April 1996.

**2.2 Quarterly change**

Table 2 gives the evolution of the Producer Price Index on a quarterly basis, the quarterly index being the average of the monthly indices. The average index for the fourth quarter of 1996 rose by 0.7% over the previous quarter as a result of the combined effect of a 0.7% rise in the "Food" sector and another 0.6% in "Beverages and tobacco".

Compared to the corresponding quarter of last year, the index rose by 11.0% following price increases of 13.3% in the "Food" sector and 8.0% in "Manufacture of beverages and tobacco". The increase in the "Food" sector was led by a 45.9% rise in "Manufacture of grain mill products", 23.7% in " Manufacture of prepared animal feeds" and 13.1% in " Slaughtering, preparation and preserving meat" . Within the " Beverages and tobacco" sector prices of wine products moved up by 6.5% and those of spirits by 4.7%. Other details on changes that have occurred at the group and sub-group level are given in Table 2.
