

## **PRODUCER PRICE INDEX - MANUFACTURING (PPI-M)**

### **Food, Beverages and Tobacco**

**1st Quarter 2001**

#### **1. Introduction**

This issue of the "Economic and Social Indicators" presents producer price indices for the "Food, beverages and tobacco" sector for the period January to March 2001 as well as revised figures for previous months. It is recalled that the Producer Price Index (PPI-M) measures the average change in the selling prices (including excise duties but excluding value added tax) received by manufacturers for the part of their output that is sold on the domestic market. The indices are computed using calendar year 1993 as the reference period.

#### **2. PPI-M: Food, Beverages and Tobacco**

##### **2.1 Monthly index**

The overall index for "Food, beverages and tobacco", which stood at 159.4 in December 2000, increased by 2.3 points in January 2001, kept this level in February and increased again by 0.4 point in March.

The sub-index for the "food" sector increased from 139.1 in December to 140.0 in January (+0.6%) mainly because of a 5.5% increase in the producer prices of "grain mill products". In February no increases were registered in the prices of items falling under this sector. However, the index went up by 0.3% in March to reach 140.3, following an increase of 1.7% in the producer prices of "bakery products".

The monthly sub-index for "beverages and tobacco", which was 184.9 in December, increased by 2.2% to reach 188.9 in January. This increase was mainly due to an 8.8% rise in the production prices of soft drinks. The sub-index remained at the same level in February but increased again by 0.3% in March to reach 189.4, following a 1.1% increase in prices of "distilling, blending and bottling of spirit".

The evolution of the monthly index by ISIC group for the period 1993 to 2000 is given in Tables 2 and 3.

## 2.2 Quarterly index

Table 4 gives the evolution of the Producer Price Index on a quarterly basis, the quarterly index being the average of the monthly indices. The average index, which stood at 158.3 for the last quarter of 2000 rose to 161.8 during the first quarter of 2001. This 2.2% rise was mainly the effect of price increases of 10.5% in the "manufacture of bakery products" and 8.9% in the "manufacture of soft drinks".

Compared to the corresponding quarter of 2000, the overall index for the first quarter rose by 4.1% as a result of price increases of 4.8% in "manufacture of beverages and tobacco" and 3.4% in "manufacture of food". The increase in prices of "beverages and tobacco" was derived from increases of 11.1% in "soft drinks" and 5.6% in "wine", coupled with a decline of 3.7% in "distilling, blending, bottling of spirit". Within the "food" sector, price increases were registered for the following manufactured products: "grain mill products" (13.8%), "dairy products" (11.2%), "bakery products" (8.7%), "canning and processing of fish and similar products" (4.3%). On the other hand a decrease of 8.6% was noted in the prices of "vegetables, animal oils and fats". Other details on changes that have occurred at the group and sub-group level are given in Table 4.
