

PRODUCER PRICE INDEX - MANUFACTURING (PPI-M)

Food, Beverages and Tobacco

4th Quarter 2001

1. Introduction

This issue of the "Economic and Social Indicators" presents producer price indices for the "Food, beverages and tobacco" sector for the period October to December 2001 as well as revised figures for previous months. It is recalled that the Producer Price Index (PPI-M) measures the average change in the selling prices (including excise duties but excluding value added tax) received by manufacturers for the part of their output that is sold on the domestic market. The indices are computed using calendar year 1993 as the reference period.

2. PPI-M: Food, Beverages and Tobacco

2.1 Monthly index

The overall index for "Food, beverages and tobacco" which stood at 169.6 in September 2001, increased successively by 0.1 point in October, by 1.1 point in November and by 1.4 point in December to reach 172.2 at the end of December 2001.

The sub-index for "Food" increased from 145.5 in September to 145.6 in October due to a rise of 6.7 % in the producer prices for "Other food products". In November, the index went up by 0.4 point to 146.0 as a result of increases of 1.3% in "Vegetable, animal oils and fats" and 0.2% in "Bakery products". The index rose further by 1.2 point to 147.2 in December due to a 6% increase in producer prices for "Vegetable, animal oils and fats".

The sub-index for "Beverages and tobacco", which stood at 199.8 in September, remained at the same level in October, followed by an increase of 2.0 points to reach 201.8 in November, as a result of a 7.4% rise in the production prices of "Soft drinks". The sub-index went up further to 203.5 in December due to an increase of 1.9% in producer prices for "Tobacco".

The evolution of the monthly index by ISIC group for the period 1993 to 2001 is shown in Tables 2 and 3.

2.2 Quarterly index

Table 4 gives the evolution of the Producer Price Index on a quarterly basis, the quarterly index being computed as the arithmetic mean of the monthly indices. The index, which stood at 169.5 for the third quarter of 2001 rose to 170.9 during the fourth quarter 2001. This 0.8% growth was mostly the overall effect of price increases of 3.4% for "Vegetable, animal oils and fats", 6.7% for "Other food products" and 5% for "Soft drinks", coupled with a drop of 5.6% in prices for "Canning & processing of fish and similar products".

Compared to the corresponding quarter of 2000, the overall index for the fourth quarter of 2001 increased by 7.9%, as a result of price increases of 6.6% for "Food" and 9.1% for "Beverages and tobacco". Changes in the "Food" sector were mostly due to the following manufactured products: "Grain mill products" (+16.0%), "Bakery products" (+12.4%) and "Other food products" (+17.8%). On the other hand a decrease of 9.9% was noted in the producer prices for "Canning, processing of fish and similar products". As regards prices for "Beverages and tobacco", the following increases were noted: 6.8% for "Distilling, blending, bottling of spirit", 7.6% for "Wine", 13.4% for "Soft drinks" and 7.9% for "Tobacco". Other details on changes that have occurred at the group and sub-group level are given in Table 4.
