

## Labour force, Employment and Unemployment - Second quarter 2011

### Introduction

1. This issue of Economic and Social Indicators (ESI) presents a set of estimates of labour force, employment and unemployment for the second quarter of 2011, based on the results of the Continuous Multi-Purpose Household Survey (CMPHS) from April to June 2011. The estimates refer to the Mauritian population aged 16 years and above.
2. Annual estimates of labour force including foreign workers derived after integrating data from CMPHS with other sources are given at Annex 3.

### Key figures

	Q2 2010	Q1 2011	Q2 2011	Change	
				Q2 2011 - Q2 2010	Q2 2011 - Q1 2011
Labour force	586,700	584,100	577,600	-9,100	-6,500
Employment	541,900	535,600	531,400	-10,500	-4,200
Unemployment	44,800	48,500	46,200	+1,400	-2,300
Unemployment rate (%)	7.6	8.3	8.0	+0.4	-0.3
Seasonally adjusted unemployment rate (%)	7.1	7.7	7.5	+0.4	-0.2

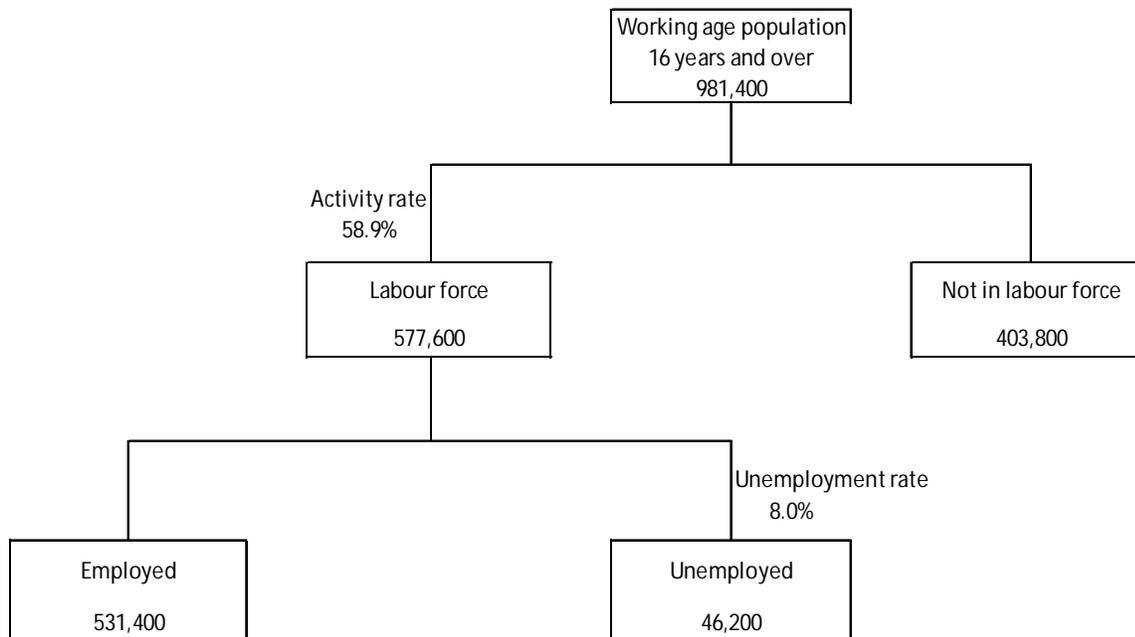

### Forecasts of employment and unemployment - Year 2011

	Year 2010	Forecast Year 2011	Change
Employment	536,100	540,600	+4,500
Unemployment	45,200	45,900	+700
Unemployment rate (%)	7.8	7.8	-

## Labour market overview, second quarter 2011

3. Compared with the corresponding quarter of 2010, there has been a decrease in the labour force (-9,100); employment decreased by 10,500 while unemployment increased by 1,400.
4. Compared with the previous quarter, labour force decreased by 6,500 with a fall in both employment (-4,200) and unemployment (-2,300).

Chart 1: The Labour Market, 2nd quarter 2011

## Labour force participation

5. The activity rate for second quarter 2011 was 58.9%, down by 1.6 percentage points from 60.5% in the corresponding period one year earlier. The activity rates for male and female decreased respectively by 2.2 percentage points to 74.4% and by 1.0 percentage point to 43.9%.
6. Compared with the previous quarter, the activity rate also decreased by 0.8 percentage point (from 59.7% to 58.9%) with a decrease of 1.9 percentage points in the male activity rate and an increase of 0.2 percentage point in the female activity rate.

## **Employment**

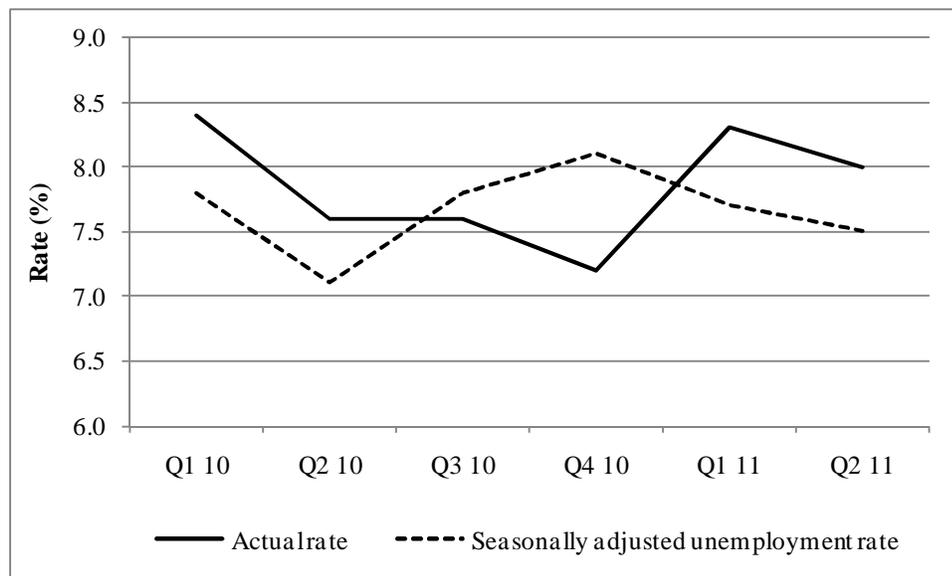

7. From second quarter 2010 to second quarter 2011, employment decreased by 10,500 (-1.9%) to 531,400; male and female employment decreased respectively by 8,200 to 338,100 and by 2,300 to 193,300.
8. Compared with the previous quarter, employment decreased by 4,200 with a fall of 9,000 in male employment and a rise of 4,800 in female employment.

## **Unemployment**

9. From second quarter 2010 to second quarter 2011, the number of unemployed persons increased by 1,400 to 46,200. This rise was the combined effect of an increase of 1,600 in the number of unemployed males and a decrease of 200 in the number of unemployed females.
10. The main characteristics of the unemployed as at second quarter 2011 were as follows:
  - (i) The 46,200 unemployed comprised 19,700 males (43%) and 26,500 females (57%).
  - (ii) Around 16,000 (35%) of them were aged below 25 years.
  - (iii) About 47% (21,700) of the unemployed were single. Among males, the majority (75%) was single while among females, the majority (74%) was ever married.
  - (iv) Some 8,700 or 19% had not reached the Certificate of Primary Education (CPE) level or equivalent and a further 20,200 (44%) did not have the Cambridge School Certificate (SC) or equivalent.
  - (v) Around 28,500 (62%) had been looking for work for up to one year and the remaining 17,700 (38%) for more than one year.
  - (vi) About 31,500 (68%) had working experience and 14,700 (32%) were looking for a job for the first time.
  - (vii) Around 18,400 (40%) were registered at the Employment Service.
  - (viii) There were 7,600 (16%) young persons aged 16 to 24 years, not yet married and looking for a first job. Some 3,300 (43%) of them had not passed SC.
  - (ix) Ever married (including widowed, divorced or separated) unemployed persons aged 25 to 44 years and having worked before numbered 12,300. Among them, about 9,600 (78%) had not passed SC.
  - (x) 5,100 or 11% of the unemployed were heads of households.
  - (xi) 7,200 (16%) lived in households with no employed persons.

11. The unemployment rate increased by 0.4 percentage point to 8.0% from second quarter 2010 to second quarter 2011. Male unemployment rate increased by 0.5 percentage point to 5.5% whilst female unemployment rate increased marginally by 0.1 percentage point to 12.1%.
12. When compared with first quarter of 2011, the number of unemployed persons decreased by 2,300 (+700 males and -3,000 females) and the employment rate by 0.3 percentage point.

Chart 2: Actual and seasonally adjusted unemployment rate by quarter, 1<sup>st</sup> quarter 2010 – 2nd quarter 2011

13. Unemployment rate is usually higher in the first half of the year because of school leavers joining the labour market, and lower in the second half with more casual jobs being available mainly in the trade sector (street vendors, salespersons in shops, etc.) at the end of the year. In order to observe the real trend over time, adjustments have to be made for seasonal fluctuations. Seasonally adjusted unemployment rate for the second quarter of 2011 was 7.5%, lower than the rate of 7.7% for the first quarter of 2011 but higher than that of 7.1% for the second quarter of 2010.

### **Economically inactive population**

14. The number of persons aged 16 years and over, not forming part of the labour force (inactive population) was estimated at 403,800 at second quarter 2011.

15. The inactive population was made up of 123,400 males and 280,400 females. Among inactive males, 43% were 'retired or old persons' and 35% were students. Among females, 55% were homemakers and 16% students.

### **Sampling errors**

16. The estimates in this publication are based on the results of a sample survey and are thus subject to sample variability. Standard errors and confidence intervals give an indication of this variability.

17. The standard error of the estimates and the 95% confidence interval which represent a 95% chance that the true value lies within that interval, are given in the tables that follow.

Estimated labour force, employment and unemployment by sex, 2nd quarter 2010 –  
2nd quarter 2011

Both Sexes

		Estimates	Standard Error	95% confidence interval	
				Lower limit	Upper limit
Labour force

## NOTES

### **Release of Labour Force data**

Labour Force statistics are compiled and published in the “Economic and Social Indicators” in March, June, September and December according to an advance calendar posted on the website of Statistics Mauritius (<http://statsmauritius.gov.mu>). This issue provides data for the second quarter 2011 compared to the same quarter a year ago.

However, where appropriate, historical series are also provided for the main indicators.

### **The CMPHS Survey methodology**

#### **Data collection**

Face to face interviews of household members are carried out by qualified interviewers recruited by the office.

#### **Frequency of data collection**

Data collection is carried out monthly except in 2004 when it was carried out every quarter. Up to 2005, the reference period for data on labour force was the last week of the survey month. As from 2006, the reference week has been changed to the second week of the survey month so that estimates can be published within one quarter of the reference period, as required by the IMF Special Data Dissemination System (SDDS) to which the country expects to graduate by December 2011.

#### **Scope and coverage of collection**

All private Mauritian households in the islands of Mauritius and Rodrigues are covered.

#### **Sampling method**

A Stratified two-stage sampling design is used. At the first stage, Primary Sampling Units (PSUs) are selected with probability proportional to size and at the second stage, a fixed number of households is selected from each selected PSU.

Prior to 2005, the first stage stratification factors were urban, semi urban and rural geographical locations. As from 2005, the Relative Development Index (RDI) is used as the spatial stratification factor. This index is based on 12 variables encompassing housing and living conditions, literacy and education, and employment derived from the 2000 Housing and Population Census to rank PSUs. A set of RDIs for administrative regions has been published in the series "Economic and Social Indicators" - Issue No. 393.

The second stage stratification criteria are community, household size and average monthly expenditure of the household.

### **Sample size**

From 1999 to 2003, around 6,500 households were covered each year. In 2004, the sample was increased to 8,640 so that reliable quarterly estimates of labour force, employment and unemployment could be worked out. As from 2005, the sample for the year has been further increased to 11,280. Furthermore, in order to measure quarterly changes, 50% of the households sampled in a quarter are re-interviewed in the following quarter; for example, 50% of the households sampled in the first quarter of 2005 have been re-interviewed in the second quarter of 2005.

### **Questionnaire**

The CMPHS questionnaire comprises three modules: a basic module common to all rounds of the survey covering the general characteristics of the population (b) a second module covering labour force with in-depth investigation and a core set of questions which are kept constant at all rounds of the survey and (c) a third module grouping other topics of interest but investigated in less details.

### **Estimation and reliability of results**

Estimates worked out from household survey data are inevitably subject to sampling variability since they are based on information collected from only a sample of households rather than from all households. The Standard Error (S.E) which is a measure of this variability, used to set confidence intervals for any estimate (whether a total or a rate) derived from the sample. For example, a 95% confidence interval indicates that there is 95% chance that the upper and lower limits of the interval enclose the true value (which would be obtained if all households had been surveyed). Standard errors and confidence intervals are calculated for the main labour force estimates.

## **Definitions**

### **Household**

A household is defined as either a person living on his/her own or a group of two or more persons, who may or may not be related, but who live together and make common provision for food and other essentials for living.

### **Employment**

Employed population consists of Mauritians aged 16 years and above (16+) who have worked for pay, profit or family gain for at least one hour during the reference week of a month. It includes those who are temporarily absent from work for reasons such as leave with pay, leave without pay and temporary disorganisation of work (bad weather, break down of equipment, lack of order, etc.).

It is to be noted that as from year 2007, labour force estimates are based on population aged 16 years and above, following the amendment to the Labour Act in December 2006 whereby the minimum legal working age is 16 years, and the subsequent recommendation by the ILO to be in line with the amended Labour Act.

### **Unemployment**

Unemployed population comprises all Mauritians aged 16+ who are not working but who are looking for work and are available for work during the reference period.

### **Labour force**

Labour force or active population is made up of employed and unemployed population.

### **Unemployment rate**

Unemployment rate is the ratio (%) of unemployment to labour force.

### **Inactive population**

Inactive population includes all Mauritians aged 16+ years, not forming part of the labour force for reasons such as attendance at educational institutions, engagement in household duties, retirement, old age and infirmity/disablement.

### **Activity rate**

Activity rate is the ratio (%) of labour force to population aged 16+ (active and inactive population).

**Employer**

An employer is a person who operates his/her own business or trade and hires one or more employees.

**Own account worker**

An Own account worker is a person who operates his/her own business or trade but does not hire employees. He/She may be working alone or with the help of contributing family workers.

**Employee**

An Employee is a person who works for pay for someone else, even in a temporary capacity.

**Apprentice**

An Apprentice is a person being trained for a job or trade and does not receive pay or may just receive some pocket money; an apprentice is considered as an employee.

**Contributing family worker**

A Contributing family worker is a person who works without pay in an enterprise operated by a family member.

**Educational attainment**

*Primary*: comprises persons who have studied up to a “Standard” between Standard 1 and the Certificate of Primary Education (CPE) or equivalent.

*Secondary*: comprises persons who have studied up to a “Form” between Form 1 and the Higher School Certificate (HSC) or equivalent.

*Tertiary*: comprises persons who in addition to their secondary educational certificates (SC and HSC or equivalent) also possess either a certificate/diploma (which is above the HSC but below a first degree) or a degree.

## Annual labour force estimates based on data from different data sources, 2003 - 2011

**Note:**

The above figures have been worked out in order to give a set of comparable labour force estimates obtained from different sources. Users are cautioned in the use of these figures given that there are differences related to the reference period, coverage and methodology. The different sources from which these estimates have been obtained are as follows:

- i CMPHS for Mauritian labour force estimates which are subject to sampling variability as mentioned at paragraph 17.
- ii The Annual Survey of Employment and Earnings (SEE) carried out in March of each year. Employment figures refer to jobs in large establishments employing 10 or more persons and include both Mauritians and foreign workers.
- iii Employment in 'other than large' establishments has been estimated after reconciling data from CMPHS, SEE and administrative sources.

<sup>1</sup> Unemployment figures and rate refer to Mauritians

<sup>2</sup> Forecast
