

External Trade – 3rd Quarter 2011

1. Introduction

This issue of the Economic and Social Indicator presents external trade statistics for the first three quarter of 2011 and for the year 2009 and 2010. These statistics are compiled from declarations lodged at Customs by importer and exporter. Some of these declarations are at times revised at a later period and corrections made accordingly on the computerised database of the Mauritius Revenue Authority (MRA) - Customs Department.

It is to be noted that figures for 2009 published in this indicator are final while those for 2010 and 2011 are subject to revision as and when the MRA - Customs Department submits latest amendments to the Statistics Mauritius.

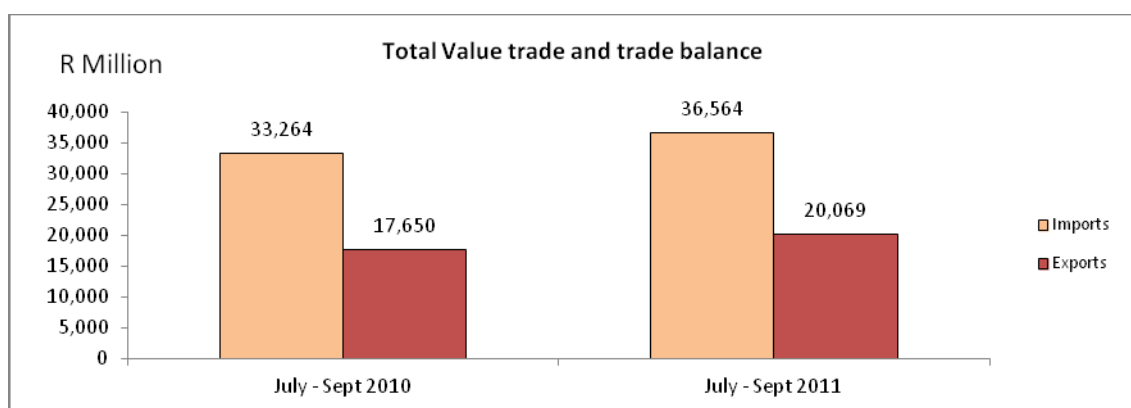

Data on international trade are compiled as per the recommendations of the United Nations General Trade System. According to this system, all goods entering and leaving the national frontier, including trading activities of the Freeport zone should be accounted for. However, it was not possible prior to 2002 to include Freeport transactions in our general trade statistics because of different processing systems at the Customs Department and at the Mauritius Freeport Authority. Since mid-October 2001, transactions of the Freeport are being lodged through the Customs Management System (CMS), thus making it possible to integrate data of the Freeport zone with those of Customs.

Hence, as from 2002, data on imports and exports include transactions through the Mauritius Freeport. It is to be noted that all exports of the Freeport are included in re-exports of Mauritius because it is not possible to distinguish between domestic exports and re-exports of freeport licensees. It is estimated that for the third quarter of 2011 some 27% of freeport exports were sourced locally.

2. Total value of trade and trade balance

Total international trade for the third quarter of 2011 was valued at R 56,633 million, i.e. 6.5% higher than the previous quarter and 11.2% higher than the corresponding quarter of 2010.

During the third quarter of 2011, total exports were valued at R 20,069 million against imports of R 36,564 million. This resulted in a trade deficit of R 16,495 million, compared to deficits of R 16,299 million (+1.2%) for the previous quarter and R 15,614 million (+5.6%) for the corresponding quarter of 2010.

Notes

(1) Coverage

Trade figures are compiled according to the **General Trade System** as recommended by the United Nations. Using the national boundary as the statistical frontier, the General Trade System is a record of all goods entering (imports) and leaving the country (exports).

- Imports include goods brought in directly for domestic consumption plus goods imported into customs bonded warehouses
- Exports cover domestic exports and re-exports which include re-exports from customs bonded warehouses. Domestic exports are defined as goods of national origin. Re-exports are goods which are exported in the same condition as imported or after undergoing minor operations which leave them essentially unchanged.
- Ships stores and bunker are included in total exports and are shown separately.
- Trade by parcel post is also included in imports and exports

(2) Valuation

Imports are valued on a C.I.F. (Cost, Insurance and Freight) basis whilst exports on a F.O.B. (Free On Board) basis.

C.I.F. value is the value in the market at the Customs frontier of a country of her imports of merchandise, other goods, etc. including all charges for transporting and insuring the goods from the country of exports to the given country but excluding the cost of unloading from the ship, aircraft etc. unless it is borne by the carrier.

F.O.B. value is the value in the market at the Customs frontier of a country of her exports of merchandise and other goods, including all costs of transporting the goods to the Customs frontier, export duties and the cost of loading the goods on to the carrier unless the latter cost is borne by the carrier.

(3) Classification

(i) Commodity Code

Commodities are coded according to the Harmonised Commodity Description and Coding System Nomenclature (HS2007). However, for the purposes of economic analysis and to facilitate international comparison of trade by commodity data, the commodities are also classified according to the Standard International Trade Classification (Revision 4) or SITC Rev. 4. The HS and the SITC Rev. 4 are six and five digit codes respectively but have been extended to eight and seven digits to accommodate national requirements.
