

Labour force, Employment and Unemployment – Third quarter 2016

Introduction

1. This issue of Economic and Social Indicators (ESI) presents a set of estimates of labour force, employment and unemployment for the third quarter of 2016, based on the results of the Continuous Multi-Purpose Household Survey (CMPHS) from July to September 2016. The estimates refer to the Mauritian population aged 16 years and above.
2. Annual estimates of labour force including foreign workers derived after integrating data from CMPHS with other sources are given at Annex 3.

Key figures

	Q3 2015	Q2 2016	Q3 2016 ¹	Change	
				Q3 2016- Q3 2015	Q3 2016 - Q2 2016
Labour force	579,100	580,100	580,700	1,600	600
Employment	536,500	537,000	536,300	-200	-700
Unemployment	42,600	43,100	44,400	1,800	1,300
Unemployment rate (%)	7.4	7.4	7.6	0.2	0.2
Seasonally adjusted unemployment rate (%)	7.6	7.1	7.8	0.2	0.8

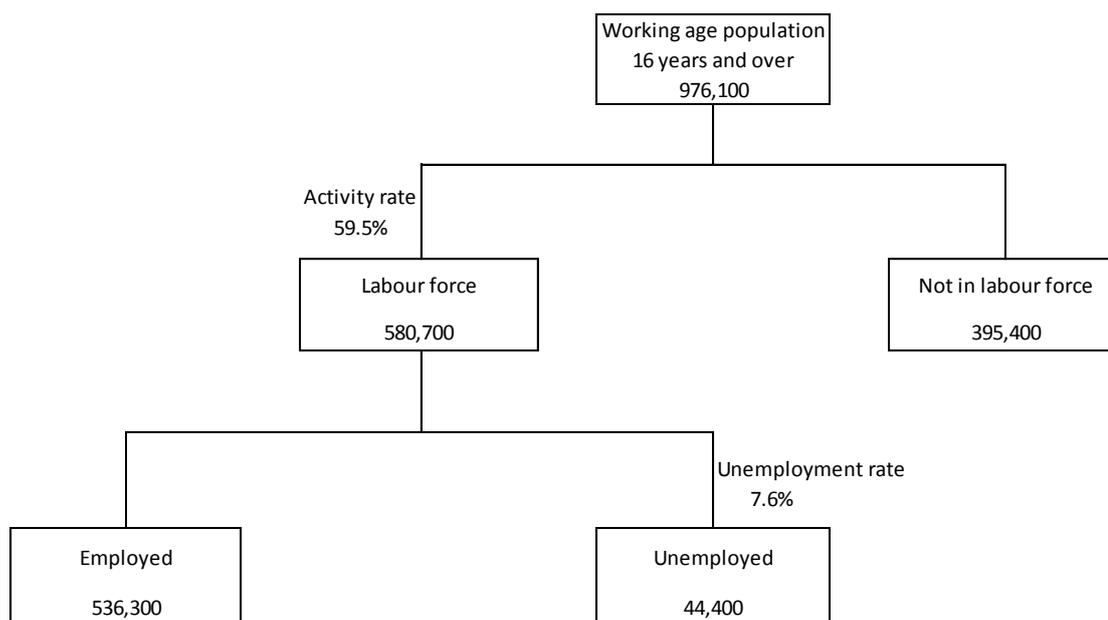

¹Provisional

Labour market overview, third quarter 2016

3. Compared with the corresponding quarter of 2015, there has been an increase in the labour force (1,600); employment decreased by 200 while unemployment increased by 1,800.
4. Compared with the previous quarter, labour force increased by 600; employment decreased by 700 while unemployment increased by 1,300.

NOTE: The increase or decrease in employment represents the net change in employment level i.e the combined effect of employment gains and losses during the period under reference.

Chart 1: The Labour Market, 3rd quarter 2016

Labour force participation

	Q3 2015	Q2 2016	Q3 2016	Change	
				Q3 2016 - Q3 2015	Q3 2016 - Q2 2016
Activity rate (%)					
Both sexes	59.8	59.5	59.5	-0.3	-
Male	74.7	74.1	74.9	0.2	0.8
Female	45.6	45.5	44.8	-0.8	-0.7

- The activity rate for the third quarter 2016 was 59.5%, down by 0.3 percentage point from 59.8% in the corresponding quarter one year earlier. The male activity rate increased by 0.2 percentage point to 74.9% and the female activity rate decreased by 0.8 percentage point to 44.8%.
- Compared with the previous quarter, the activity rate remained at the same level of 59.5%. However, the male activity rate increased by 0.8 percentage point from 74.1% to 74.9% and the female activity decreased by 0.7 percentage point from 45.5% to 44.8%.

Employment

Employment	Q3 2015	Q2 2016	Q3 2016	Change	
				Q3 2016 - Q3 2015	Q3 2016 - Q2 2016
Both sexes	536,500	537,000	536,300	-200	-700
Male	336,000	334,400	338,000	2,000	3,600
Female	200,500	202,600	198,300	-2,200	-4,300

7. From third quarter 2015 to third quarter 2016, employment decreased by 200 to 536,300; male employment increased by 2,000 to 338,000 and female employment decreased by 2,200 to 198,300.

8. Compared with the previous quarter, employment decreased by 700 with an increase in male employment (+3,600) and a decrease in female employment (-4,300).

Unemployment

Unemployment	Q3 2015	Q2 2016	Q3 2016	Change	
				Q3 2016 - Q3 2015	Q3 2016 - Q2 2016
Both sexes	42,600	43,100	44,400	1,800	1,300
Male	17,100	18,400	18,900	1,800	500
Female	25,500	24,700	25,500	0.0	800
Unemployment rate (%)					
Both sexes	7.4	7.4	7.6	0.2	0.2
Male	4.8	5.2	5.3	0.5	0.1
Female	11.3	10.9	11.4	0.1	0.5

3rd Quarter 2015 to 3rd Quarter 2016

9. From third quarter 2015 to third quarter 2016, the number of unemployed persons increased by 1,800 (+1,800 males while that of females remained unchanged).

10. The unemployment rate increased by 0.2 percentage point from 7.4% in the third quarter 2015 to 7.6% in the third quarter 2016. During that same period, male unemployment rate increased by 0.5 percentage point to 5.3% while female unemployment rate increased by 0.1 percentage point to 11.4%.

2nd Quarter 2016 to 3rd Quarter 2016

11. When compared with the second quarter of 2016, the total number of unemployed persons increased by 1,300. Male increased by 500 and female by 800.
12. From second quarter 2016 to third quarter 2016, the unemployment rate increased by 0.2 percentage point with an increase of 0.1 percentage point in male unemployment rate and an increase of 0.5 percentage point in female unemployment rate.

Unemployment and unemployment rate of the youth aged 16-24 years

	Q3 2015	Q2 2016	Q3 2016	Change	
				Q3 2016 - Q3 2015	Q3 2016 - Q2 2016
Youth unemployment					
Both sexes	20,700	19,300	19,100	-1,600	-200
Male	9,500	9,100	8,500	-1,000	-600
Female	11,200	10,200	10,600	-600	400
Youth unemployment rate (%)					
Both sexes	25.6	24.9	24.0	-1.6	-0.9
Male	20.5	20.7	18.6	-1.9	-2.1
Female	32.4	30.3	31.3	-1.1	1.0

13. At the third quarter 2016, youth unemployed aged 16 to 24 years numbered 19,100 (8,500 males and 10,600 females) compared to 20,700 (9,500 males and 11,200 females) at the corresponding quarter of 2015 and 19,300 (9,100 males and 10,200 females) at the previous quarter.
14. The youth unemployment rate decreased by 1.6 percentage points from 25.6% in the third quarter 2015 to 24.0% in the third quarter 2016. During the same period, the youth unemployment rates for both male and female decreased by 1.9 percentage points to 18.6 % and by 1.1 percentage points to 31.3%.
15. Compared with the previous quarter, the youth unemployment rate decreased by 0.9 percentage point from 24.9% to 24.0% with a decrease of 2.1 percentage points in the male youth unemployment rate and an increase of 1.0 percentage point in the female youth unemployment rate.

Characteristics of the unemployed as at third quarter 2016

16. The main characteristics of the unemployed as at third quarter 2016 were as follows:

- (i) The 44,400 unemployed comprised 18,900 males (43%) and 25,500 females (57%).
- (ii) Around 26,200 (59%) of the unemployed were single. Among males the majority (75%) was single compared to 47% among the females.
- (iii) Some 5,000 or 11% had not reached the Certificate of Primary Education (CPE) level or equivalent and a further 16,200 (36%) did not have the Cambridge School Certificate (SC) or equivalent.
- (iv) Around 35,700 (80%) had been looking for work for up to one year and the remaining 8,700 (20%) for more than one year.
- (v) About 29,300 (66%) had working experience and 15,100 (34%) were looking for a job for the first time.
- (vi) Around 19,700 (44%) were registered at the Employment Service.
- (vii) There were 9,800 (22%) young persons aged 16 to 24 years, not yet married and looking for a first job. Some 2,200 (22%) of them had not passed SC.
- (viii) Ever married (including widowed, divorced or separated) unemployed persons aged 25 to 44 years and having worked before numbered 10,900. Among them, about 4,700 (43%) had not passed SC.
- (ix) 5,700 or 13% of the unemployed were heads of households.
- (x) 7,900 or 18% lived in household with no employed persons.

Seasonally adjusted unemployment rate

17. Seasonally adjusted unemployment rate for the third quarter of 2016 was 7.8%, higher than the rate of 7.6% at the corresponding quarter of 2015 and 7.1% at the second quarter of 2016.

Economically inactive population

18. The number of persons aged 16 years and over, not forming part of the labour force (inactive population) was estimated at 395,400 at the third quarter 2016 compared to 389,300 in the corresponding quarter of 2015 and 395,100 in the previous quarter.

19. The inactive population was made up of 119,600 males and 275,800 females. Among inactive males, around 48% were 'retired or old persons' and 32% were students. Among inactive females, 61% were homemakers; around 16% were 'Retired or old persons' and 14% were students.

Forecasts of Employment and Unemployment estimates - Year 2016

20. Based on the results of the survey for the first three quarters of the current year and other information available, the following are the forecasts of employment and unemployment for 2016:

	Year 2015	Year 2016 ¹	Change
Employment	538,300	536,500	-1,800 ²
Unemployment	46,300	42,900	-3,400
Unemployment rate (%)	7.9	7.4	-0.5

¹Forecast ²please see explanations in the box on page 1

CAUTION:

The estimate of unemployment rate for the year 2015 (7.9%) is NOT end of year estimate (i.e as at 31st December). It represents weighted averages of estimates based on sample data collected throughout the year under review.

21. The employment level of Mauritians is expected to decrease by 1,800 from 538,300 in 2015 to 536,500 in 2016. It is to be noted that this change in employment represents the net change in employment level, i.e the combined effect of employment gains and losses during the period under reference.
22. Based on latest available data, the forecast of unemployment rate for the year 2016 has been revised to 7.4%. The rate for year 2015 was 7.9%.

Sampling errors

23. The estimates in this publication are based on the results of a sample survey and are thus subject to sample variability. Standard errors and confidence intervals give an indication of this variability.
24. The standard error of the estimates and the 95% confidence interval which represent a 95% chance that the true value lies within that interval, are given in the tables that follow.

Estimated labour force, employment and unemployment by sex, 3rd quarter 2015 – 3rd quarter 2016

NOTES

Release of Labour Force data

Labour Force statistics are compiled and published in the “Economic and Social Indicators” in March, June, September and December according to an advance calendar posted on the website of Statistics Mauritius (<http://statsmauritius.govmu.org>). This issue provides data for the third quarter 2016 compared to the previous quarter and to the same quarter a year ago.

However, where appropriate, historical series are also provided for the main indicators.

The CMPHS Survey methodology

Data collection

Face to face interviews of household members are carried out by qualified interviewers recruited by the office.

Frequency of data collection

Data collection is carried out monthly except in 2004 when it was carried out every quarter. Up to 2005, the reference period for data on labour force was the last week of the survey month. As from 2006, the reference week has been changed to the second week of the survey month so that estimates can be published within one quarter of the reference period, as required by the IMF Special Data Dissemination System (SDDS) to which the country has graduated on 28 February 2012.

Scope and coverage of collection

All private Mauritian households in the islands of Mauritius and Rodrigues are covered.

Sampling method

A Stratified two-stage sampling design is used. At the first stage, Primary Sampling Units (PSUs) are selected with probability proportional to size and at the second stage, a fixed number of households is selected from each selected PSU.

Prior to 2005, the first stage stratification factors were urban, semi urban and rural geographical locations. As from 2005, the Relative Development Index (RDI) is used as the spatial stratification factor. This index is based on 12 variables encompassing housing and living conditions, literacy and education, and employment derived from the 2011 Housing and Population Census to rank PSUs. A set of RDIs for administrative regions has been published in the series "Economic and Social Indicators" - Issue No. 977.

The second stage stratification criteria are community, household size and average monthly expenditure of the household.

Sample size

From 1999 to 2003, around 6,500 households were covered each year. In 2004, the sample was increased to 8,640 so that reliable quarterly estimates of labour force, employment and unemployment could be worked out. As from 2005, the sample for the year has been further increased to 11,280. Furthermore, in order to measure quarterly changes, 50% of the households sampled in a quarter are re-interviewed in the following quarter; for example, 50% of the households sampled in the first quarter of 2005 have been re-interviewed in the second quarter of 2005.

Questionnaire

The CMPHS questionnaire comprises three modules: a basic module common to all rounds of the survey covering the general characteristics of the population (b) a second module covering labour force with in-depth investigation and a core set of questions which are kept constant at all rounds of the survey and (c) a third module grouping other topics of interest but investigated in less details.

Estimation and reliability of results

Estimates worked out from household survey data are inevitably subject to sampling variability since they are based on information collected from only a sample of households rather than from all households. The Standard Error (S.E) which is a measure of this variability, used to set confidence intervals for any estimate (whether a total or a rate) derived from the sample. For example, a 95% confidence interval indicates that there is 95% chance that the upper and lower limits of the interval enclose the true value (which would be obtained if all households had been surveyed). Standard errors and confidence intervals are calculated for the main labour force estimates.

Definitions

Household

A household is defined as either a person living on his/her own or a group of two or more persons, who may or may not be related, but who live together and make common provision for food and other essentials for living.

Employment

Employed population consists of Mauritians aged 16 years and above (16+) who have worked for pay, profit or family gain for at least one hour during the reference week of a month. It includes those who are temporarily absent from work for reasons such as leave with pay, leave without pay and temporary disorganisation of work (bad weather, break down of equipment, lack of order, etc.).

It is to be noted that as from year 2007, labour force estimates are based on population aged 16 years and above, following the amendment to the Labour Act in December 2006 whereby the minimum legal working age is 16 years, and the subsequent recommendation by the ILO to be in line with the amended Labour Act.

Unemployment

Unemployed population comprises all Mauritians aged 16+ who are not working but who are looking for work and are available for work during the reference period.

Labour force

Labour force or active population is made up of employed and unemployed population.

Unemployment rate

Unemployment rate is the ratio (%) of unemployment to labour force.

Inactive population

Inactive population includes all Mauritians aged 16+ years, not forming part of the labour force for reasons such as attendance at educational institutions, engagement in household duties, retirement, old age and infirmity/disablement.

Activity rate

Activity rate is the ratio (%) of labour force to population aged 16+ (active and inactive population).

Employer

An employer is a person who operates his/her own business or trade and hires one or more employees.

Own account worker

An Own account worker is a person who operates his/her own business or trade but does not hire employees. He/She may be working alone or with the help of contributing family workers.

Employee

An Employee is a person who works for pay for someone else, even in a temporary capacity.

Apprentice

An Apprentice is a person being trained for a job or trade and does not receive pay or may just receive some pocket money; an apprentice is considered as an employee.

Contributing family worker

A Contributing family worker is a person who works without pay in an enterprise operated by a family member.

Educational attainment

Primary: comprises persons who have studied up to a “Standard” between Standard 1 and the Certificate of Primary Education (CPE) or equivalent.

Secondary: comprises persons who have studied up to a “Form” between Form 1 and the Higher School Certificate (HSC) or equivalent.

Tertiary: comprises persons who in addition to their secondary educational certificates (SC and HSC or equivalent) also possess either a certificate/diploma (which is above the HSC but below a first degree) or a degree.

¹ Unemployment figures and rate refer to Mauritians² Provisional**Note:**

1. The above figures have been worked out in order to give a set of comparable labour force estimates obtained from different sources. Users are cautioned in the use of these figures given that there are differences related to the reference period, coverage and methodology. The different sources from which these estimates have been obtained are as follows:

- i CMPHS for Mauritian labour force estimates which are subject to sampling variability as mentioned at Annex 1.
- ii The Annual Survey of Employment and Earnings (SEE) carried out in March of each year. Employment figures refer to jobs in large establishments employing 10 or more persons and include both Mauritians and foreign workers.
- iii Employment in 'other than large' establishments has been estimated after reconciling data from CMPHS, SEE and administrative sources.
