

WAGE RATE INDEX (WRI)

(Base: fourth quarter 2016 = 100)

Third Quarter 2019

1. Introduction

This issue of the Economic and Social Indicators (ESI) on wage rate index presents data for the third quarter of 2019 using as base the fourth quarter of 2016 (Q₄ 2016 = 100).

The wage rate index measures changes in the price of labour, i.e., changes in the average rates actually paid by employers to their employees for work during normal working hours.

The methodology used for computing the index is given in the technical note at Annex 1.

2. Movement of the overall wage rate index

The wage rate index (Base = fourth quarter 2016) increased by 0.8% or 0.9 point to reach 113.3 in the third quarter 2019 from 112.4 in the second quarter 2019. (Table 1 and 2)

Compared to the 3rd quarter 2018, the wage rate index, which stood at 108.9, increased by 4.0% or 4.4 points. (Table 3)

3. Movement of the sub-indices, 2nd Quarter 2019 to 3rd quarter 2019

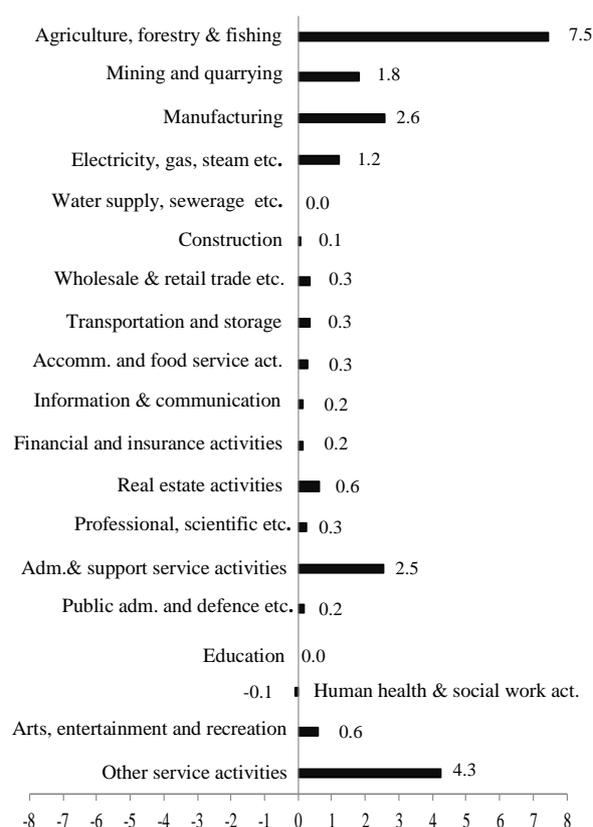

Increases were registered in all sectors except for 'Human health and social work activities'.

Main increases were in the following industry groups (Chart 1 & Table 2):

<i>Agriculture, forestry and fishing</i>	7.5%
<i>Other service activities</i>	4.3%
<i>Manufacturing</i>	2.6%
<i>Administrative and support service activities</i>	2.5%
<i>Mining and quarrying</i>	1.8%
<i>Electricity, gas, steam and air conditioning supply</i>	1.2%

A decrease, mainly explained by the recruitment of new employees, was noted in 'Human health and social work activities' (-0.1%).

Chart 1: % Change in Wage Rate Index from 2nd Quarter 2019 to 3rd Quarter 2019

The wage rate index for the General Government sector which comprises Ministries, Government departments and agencies operating under them, municipalities, district councils and Rodrigues Regional Assembly remained at 105.6 in the second and third quarters 2019. This sector accounts for around 34% of the total weight of the wage rate index.

4. Movement of the sub-indices, 3rd Quarter 2018 to 3rd quarter 2019

Table 3 compares the indices for the third quarter 2019 with those for the corresponding quarter 2018. Increases were observed in all industry groups, except for 'Agriculture, forestry and fishing', which registered a decrease of -5.7% due to mechanical harvesting of sugar cane.

Main increases were as follows:

<i>Admin. and support service activities</i>	11.4%
<i>Manufacturing</i>	8.7%
<i>Mining and quarrying</i>	8.0%
<i>Water supply; sewerage, waste management and remediation activities</i>	7.2%
<i>Financial and insurance activities</i>	6.3%
<i>Transportation and storage</i>	6.1%

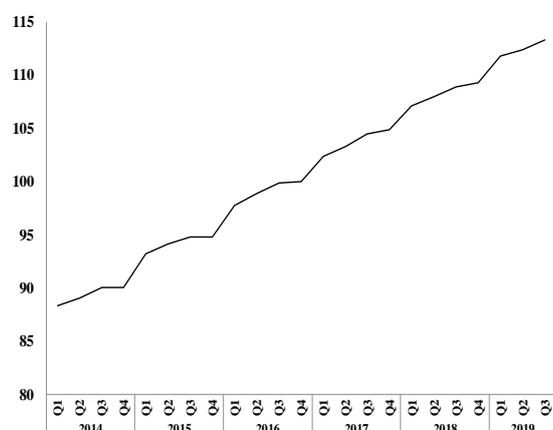

5. Past trend

Table 4 presents the quarterly indices from first quarter 2007 to third quarter 2019 with different base periods. As from 2017, the base period used is fourth quarter 2016.

To enable comparison between the two series, chain link series with fourth quarter 2016 as base has been worked out and is provided in Table 5. The series are not strictly comparable because of weighting patterns.

Chart 2 depicts the trend of the quarterly wage rate indices from 2014 to 2019 using fourth quarter 2016 as base period. It shows a general upward movement in the index throughout the period. The increase in the first quarter 2016 is mainly explained by salary revision in the Government Sector.

Chart 2: Wage rate indices
1st Quarter 2014 to 3rd Quarter 2019
(Base: fourth quarter 2016 = 100)

6. Indices for the Private and Public sectors, 3rd Quarter 2019

The index for the private sector, which accounts for around 54% of the total weight of the wage rate index, increased by 1.3% or 1.5 points from 114.8 in the second quarter 2019 to 116.3 in the third quarter 2019 (Tables 6 & 7).

Compared to third quarter 2018, the index for the private sector, which stood at 110.7, increased by 5.1% or 5.6 points (Table 8).

The index for the public sector which comprises General Government and Public enterprises and accounting for around 46% of the wage rate index, increased by 0.1% or 0.1 point from 109.6 in the second quarter 2019 to 109.7 in the third quarter 2019 (Tables 9 & 10).

Compared to third quarter 2018, the index for the public sector, which stood at 106.8, increased by 2.7% or 2.9 points (Table 11).

Technical Note

Methodology used for the compilation of the Wage Rate Index

1. Definition

The Wage Rate Index (WRI) measures changes in the price of labour, i.e., changes in the average rates actually paid by employers to their employees for work during normal working hours.

2. Approach adopted

To show genuine changes in the price of labour, it would have been necessary for wages of specific workers at specific establishments to be measured over time. Since this is not possible, the next best approach has been adopted, that is, to follow changes in the wages of groups of employees performing the same jobs. This gives a measure of changes in wage rates of specific occupations but has the following limitations:

- (i) any changes in the mix of employees within the selected occupations is bound to affect the calculated rates and hence the corresponding sectoral indices. Such changes occur, for example, with a new intake of employees in a specific group - when the wages of the new recruits pull down the average wages for the whole group from one period to the next.
- (ii) wage adjustments resulting from changes in the tasks associated with a particular occupation, which cannot be separated from pure price changes of labour.
- (iii) it is difficult to separate the effects of productivity from the overall change.

3. Coverage

The wage rate index is based on wage rates applicable in 'large' establishments only. Employment in these establishments accounted for around 56% of total employment in year 2018. 'Large' establishments comprise sugar cane plantations of 10 hectares or more; tea plantations of 2 hectares or more; other agricultural and non-agricultural establishments having 10 or more employees as well as General Government Services, i.e. ministries, government departments and agencies operating under them; municipalities; district councils and Rodrigues Regional Assembly.

Time-rated as well as piece-rated wage earners and salaried employees are covered. Apprentices, workers on probation, part-time workers and employees working on a temporary basis are excluded.

4. Sectors covered

Indices are disseminated by the Public and Private sectors.

The **Public sector** comprises Ministries, Government departments and agencies operating under them; municipalities; district councils, the Rodrigues Regional Assembly and Public enterprises.

5. Calculating the Wage Rate Index

A Laspeyres formula is used. The occupational structure is held constant with reference to the base period of the index, i.e. December 2016. The relative changes in average wage rates are measured at the occupational level and these changes are then weighted to give a combined measure of the change. The following formula is used

$$I_t = \frac{\sum w_i (R_i^t / R_i^o)}{\sum w_i} \times 100$$

where I_t = index for quarter t compared to base period o
 w_i = $N_i^o R_i^o$ which represents the total wages paid to all employees in the i^{th} occupation base period, December 2016
 R_i^o = wage rate of occupation i in base period, December 2016
 R_i^t = wage rate of occupation i in quarter t

The index is, first, calculated for each industry group and the overall index (covering all industry groups) is computed as a weighted average of the individual industry group indices.

6. Reference period

The base period for the index is quarter 4 2016 (i.e. Quarter 4, 2016=100) as from the first quarter of 2017. The wage rate indices, for the first, second, third and fourth quarters of 2007 and 2008, are based on wage rates applicable during the months of February, May, August and November respectively. As from 2009, the wage rate indices, for the first to fourth quarter, are based on wage rates applicable during the months of March, June, September and December respectively.

7. Weights

Two sets of weights are used:

- (i) **Weight for the industry groups** derived from the 'Survey of Employment & Earnings, March 2015' and
- (ii) **Weight for occupations** within each activity (NSIC) sectorwise. Questionnaires were sent to around 1,200 large establishments at the end of March 2016 to cater for number employed in each category of occupation.

8. Wage rates used

The wage/salary rates of specific occupations, used in the calculation of the index, are the rates paid for normal time work, comprising basic wages and salaries, cost of living allowances and other guaranteed and regular allowances paid at the end of each pay period. Overtime payments are, therefore, excluded.
