

Gender Statistics - 2020

1. Introduction

This is the twelfth issue of Economic and Social Indicators (ESI) on gender statistics. It presents a portrait of women and men in the Republic of Mauritius and includes their demographic profile, health, family status, educational attainment and labour force characteristics.

The ESI is based on latest available sex disaggregated data from administrative sources, household surveys and censuses. Some of the statistics presented therefore refer to years earlier than 2020.

2. Highlights

- (i) In 2020, the population comprised 639,712 women compared to 626,028 men. Women outnumbered men by 13,684 as they lived on average 6.8 years longer than men.
- (ii) Diabetes mellitus, heart disease, cerebrovascular disease and hypertensive disease together accounted for 51.6% of all deaths among men against 55.6% among women.
- (iii) Only 11.9% of working women were heads of business compared to 18.6% among men.
- (iv) Unemployed women are generally more qualified than their male counterparts: 22.0% among women possessed tertiary qualifications compared to 17.5% men.
- (v) Women are largely under-represented in decision making at higher sphere of society: the number of female ministers was only 3 out of 24.
- (vi) The proportion of women in the most senior positions in government services (Senior Chief Executive, Permanent Secretary, Deputy Permanent Secretary, Director, Manager, Judge and Magistrate) was 39.7%.
- (vii) Among victims of domestic violence, 87.3% were women and 12.7% were men.
- (viii) Some 4,887 men were victims of homicides and assaults compared to 4,229 women whereas 521 women were victims of sexual violence and sexual exploitation compared to 48 men.
- (ix) Women participated less than men in sports as high level athletes (65.9% men against 34.1% women).
- (x) According to the Global Gender Gap Index (GGI) of the World Economic Forum, Mauritius was ranked 115 out of 153 countries worldwide. The GGI measures gender equality across four key areas, namely: (a) economic participation and opportunity, (b) educational attainment, (c) health and survival and (d) political empowerment.

3. Population

Prior to 1950 women were fewer than men in number. However, the female population has been growing at a faster rate such that in the 50's there were almost equal numbers of men and women. This balance in the population has been maintained for some 40 years. As from 1990, women have been increasingly outnumbering men over the years.

In 2020, there were 13,684 more women than men. Out of a total population of 1,265,740, there were 639,712 women against 626,028 men, i.e., 98 men for every 100 women (Table 1).

Though women were more numerous in the total population, this was not the case in all age groups. At the younger ages (under 50 years), men were more numerous, mainly due to more births of baby boys than girls. In 2020, there were 105 male births for every 100 female births.

At ages 50 years and above, women outnumbered men and their proportion increased at higher ages. The male-female ratio stood at around 103 for those aged between 40 to 49 years compared to around 55 among those aged 80 years and over; there were around 2 women for every man in this age group. The main reason for this imbalance is that women live longer than men.

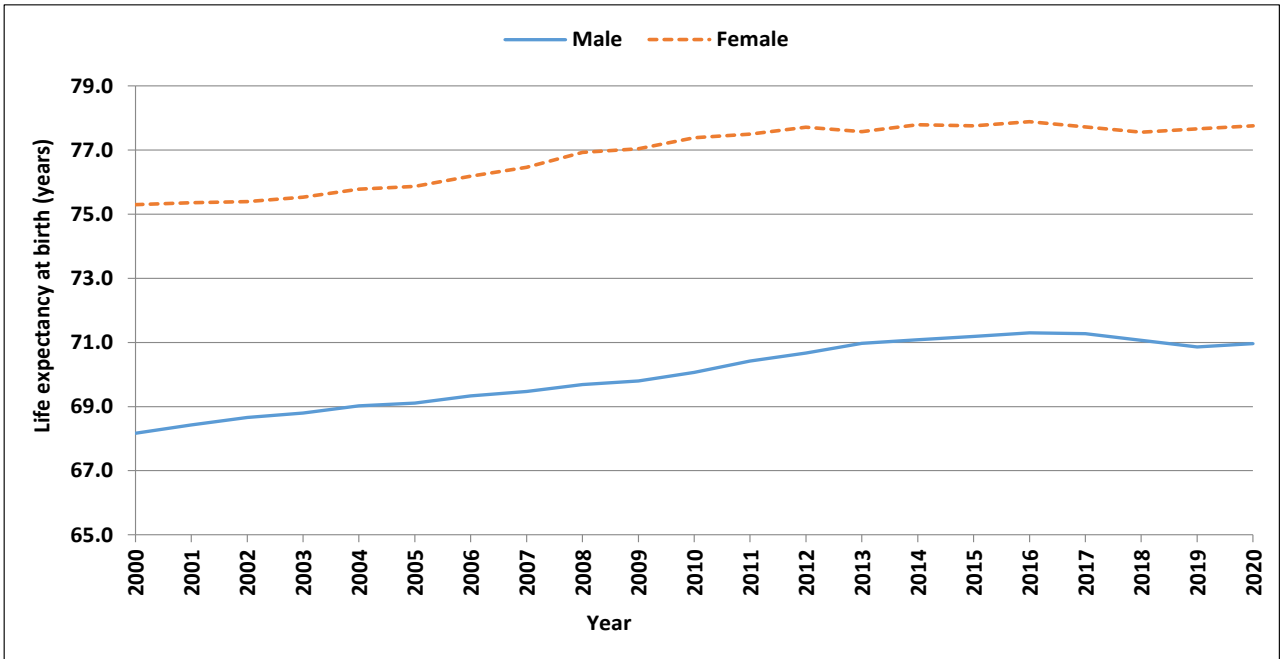

Table 1 – Population by age and sex, Republic of Mauritius, 1st July 2020

Age Group (years)	Male	Female	Both sexes	Sex ratio (males per 100 females)
Under 10	67,905	65,547	133,452	103.6
10 - 19	90,286	87,715	178,001	102.9
20 - 29	98,128	95,656	193,784	102.6
30 - 39	89,058	86,673	175,731	102.8
40 - 49	89,994	87,663	177,657	102.7
50 - 59	88,356	89,982	178,338	98.2
60 - 79	93,147	109,760	202,907	84.9
80+	9,154	16,716	25,870	54.8
Total	626,028	639,712	1,265,740	97.9

Source: Statistics Mauritius

Women have a higher life expectancy than men. In fact, women live some 6.8 years longer than men. In 2020, life expectancy at birth for women was 77.8 years compared to 71.0 years for men. Life expectancy at birth has improved over the years for both men and women and over the past eight years, the gap between life expectancy of men and women has decreased from 7.3 years in 2010 to 6.8 years in 2020 (Chart 1).

Chart 1 - Life Expectancy at birth, Republic of Mauritius, 2000 – 2020

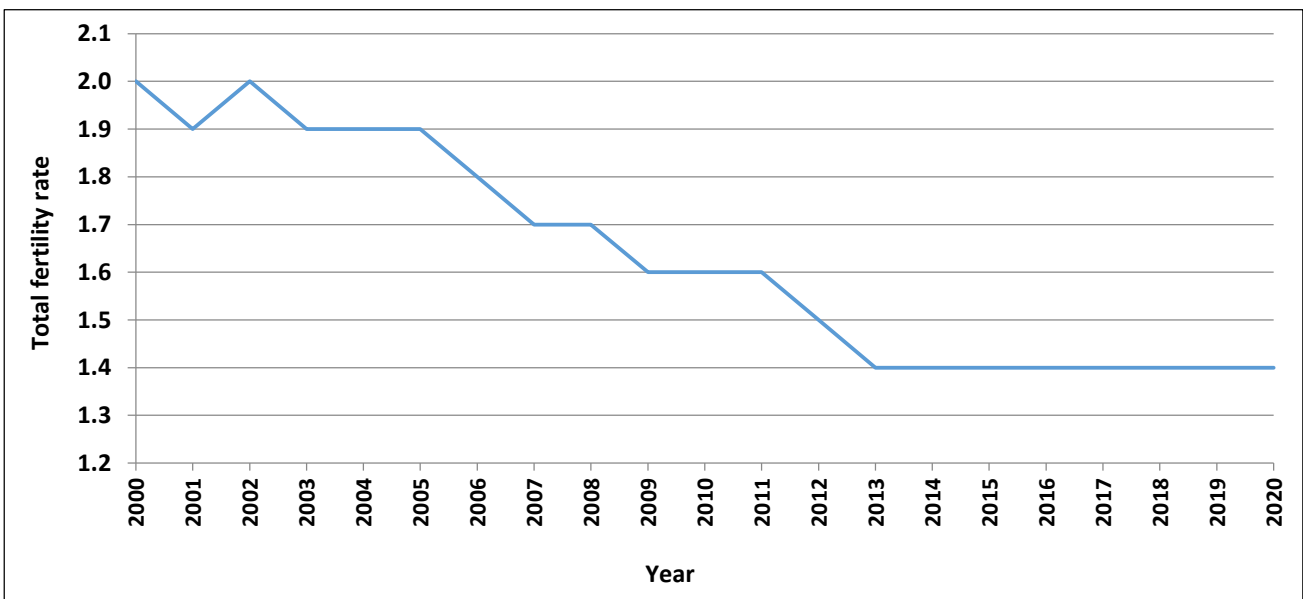

Source: Statistics Mauritius

4. Fertility and Contraceptive Use

Women continue to give birth to fewer children than in the past. The total fertility rate, which is an indication of the average number of babies born to a woman during her childbearing period, has maintained a general decreasing trend after 2002. Compared to 2002, the average number of children born to a woman dropped by nearly one child to reach a total fertility rate of 1.4 from 2013 to 2020 (Chart 2).

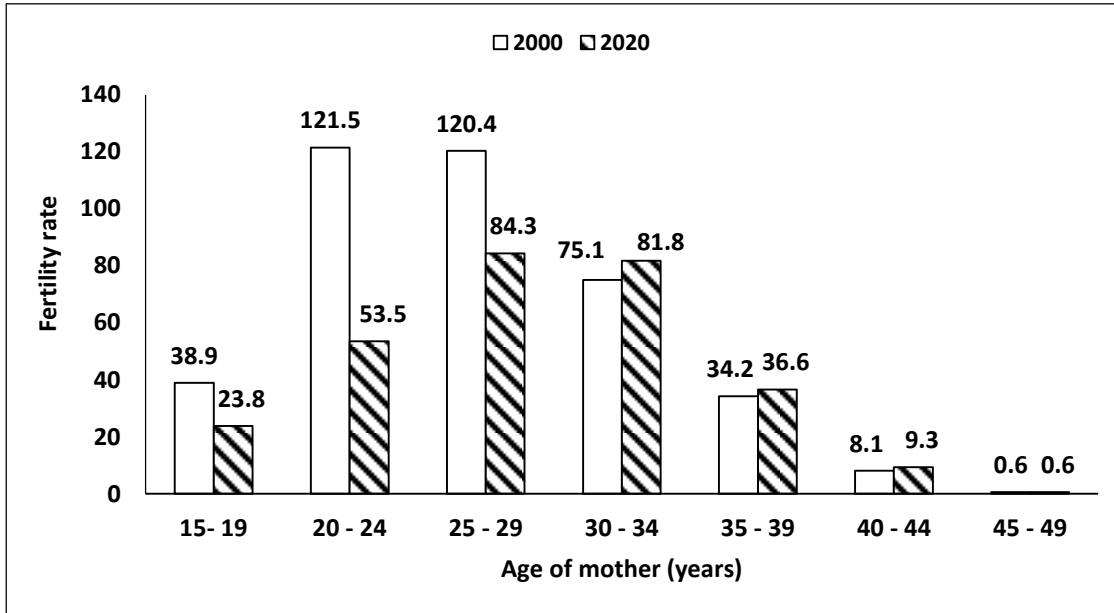

Chart 2 - Total Fertility Rate, Republic of Mauritius, 2000 – 2020

Source: Ministry of Health and Wellness

In 2000, women in the age bracket 20-24 years had the highest fertility with 121 births per 1,000 women of that age group (Chart 3). In 2020, the peak fertility rate is observed in the age bracket 25-29 years with 120 births per 1,000 women in that age group. One of the reasons explaining this shift is that women are getting married at an older age.

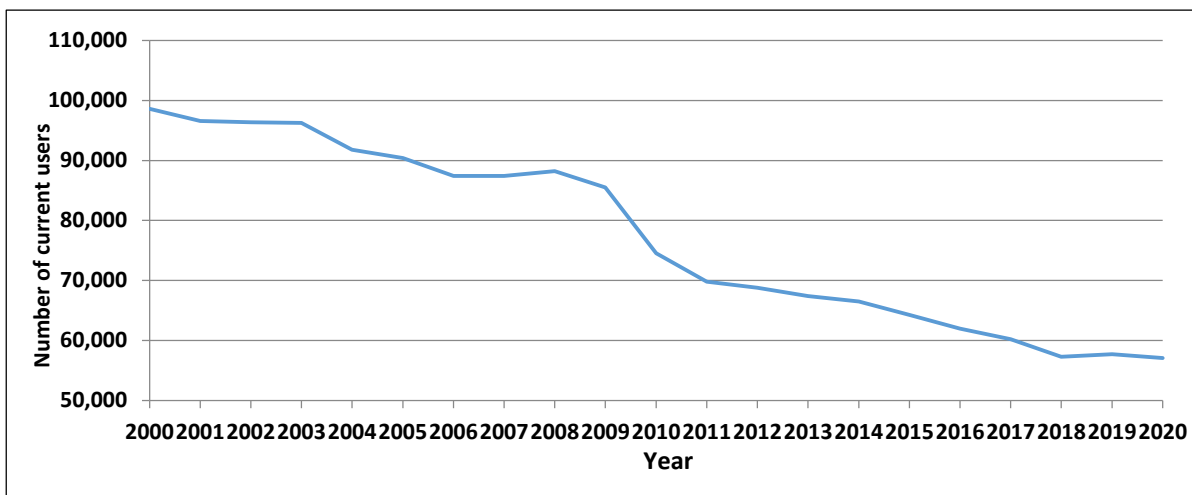

Chart 3 – Fertility Rate by age of mother, Republic of Mauritius, 2000 and 2020

Source: Ministry of Health and Wellness

In 2020, Government Family Planning Clinics, Mauritius Family Planning & Welfare Association and “Action Familiale” registered a total of some 57,092 current users of contraceptive methods in the Island of Mauritius, a decrease of 632 compared to 57,724 in 2019 (Chart 4).

Chart 4 – Number of current users of contraceptives, Island of Mauritius, 2010 – 2020

Source: Ministry of Health & Wellness

New acceptors of contraceptive methods registered in 2020 numbered 3,059, of whom 441 had sympto-thermal. A declining trend was observed in the number of new acceptors from 11,164 in 2000.

Among the new acceptors in 2020, 3-month injectable (25.9%), condom (19.1%) and sympto-thermal (14.4%) were the three most preferred methods of contraception while for current users sympto-thermal (47.7%) was the preferred method (Table 2).

Table 2 – Method of family planning, Island of Mauritius, 2020

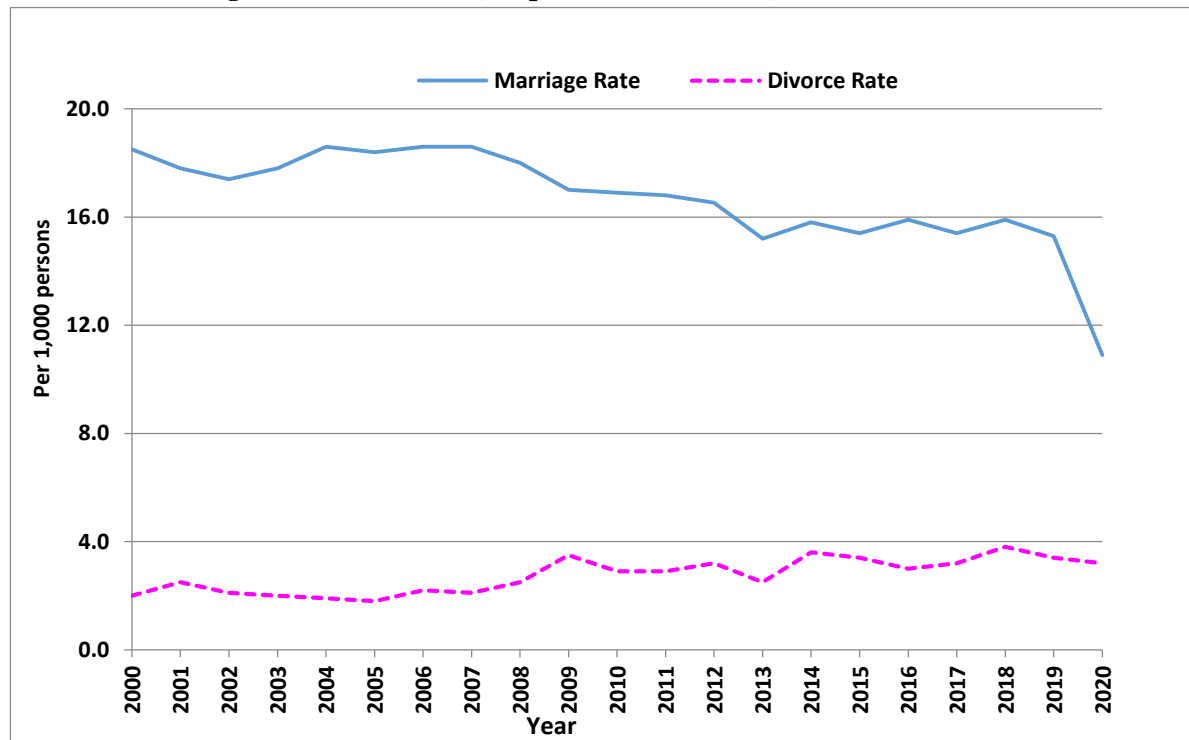

Methods	New Acceptors (%)	Current Users (%)
Pill	18.8	6.5
Tubal Ligation	15.6	23.9
Sympto-thermal	14.4	47.7
Condom	19.1	11.5
3-month injectable	25.9	5.1
Intra-Uterine Devices	1.5	3.0
1-month injectable	3.5	0.8
Implant	1.2	1.5
Total	100.0	100.0

5. Family Status

While marriage rate is declining, divorce rate is on the rise. The marriage rate, i.e., the number of persons married per 1,000 mid-year population, fell from 18.5 in 2000 to 10.9 in 2020. The number of divorced persons per 1,000 mid-year population increased from 2.0 in 2000 to 3.2 in 2020 (Chart 5).

Chart 5 – Marriage and Divorce Rate, Republic of Mauritius, 2000 – 2020

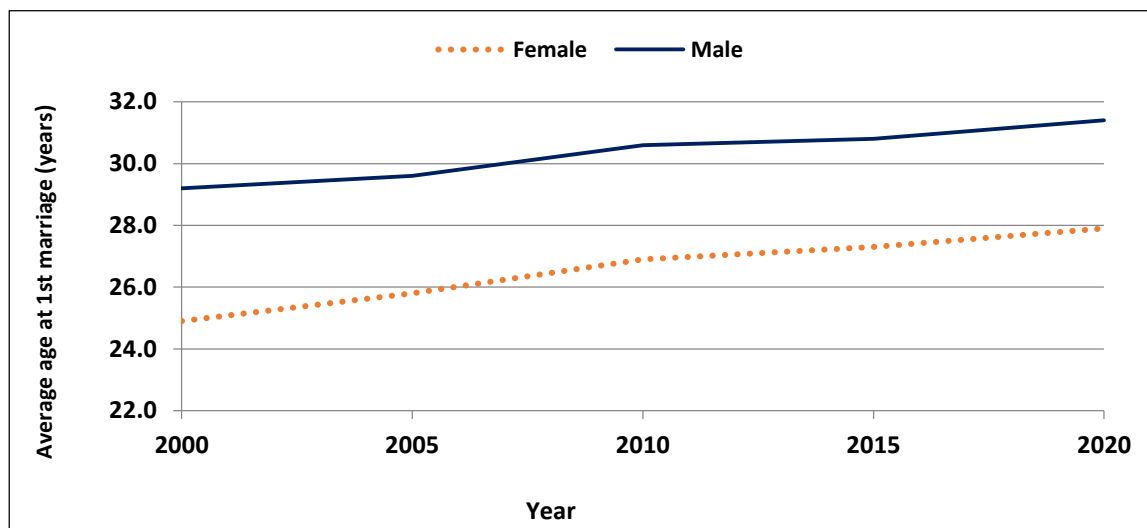

Source: Statistics Mauritius

Generally women tend to marry men who are older than them. However, over the past 20 years the age difference between husband and wife narrowed from 4.3 years in 2000 to 3.5 years in 2020 (Chart 6).

The average age at first marriage has been gradually increasing over the years for both women and men. The average age at first marriage for women increased from 24.9 years in 2000 to reach 27.9 years in 2020, while that for men increased from 29.2 to 31.4 during the same period.

Chart 6 – Average age at first marriage, Republic of Mauritius, 2000 – 2020

Source: Statistics Mauritius

Of the 1,995 divorces granted by the Supreme Court in 2020, women were the petitioners in 40.9% of the cases (Table 3).

Table 3 – Divorce by petitioner, Republic of Mauritius, 2019 & 2020

Petitioner	2019	%	2020	%
Husband	596	27.4	559	28.0
Wife	946	43.5	816	40.9
Joint petitioner (both husband & wife)	632	29.1	620	31.1
Total divorces	2,174	100.0	1,995	100.0

Source: The Judiciary

An analysis of the divorce statistics by single year duration of marriage indicate that couples had the highest tendency to divorce within the 5-10 years duration of marriage (Table 4).

Table 4 – Number of divorce by duration of union, Republic of Mauritius, 2020

Duration of union (years)	Number	%
< 1 year	5	0.3
1 and <3	144	7.2
3 and <5	203	10.2
5 and <10	518	26.0
10 and <15	419	21.0
15 and <25	491	24.6
25 or more	215	10.8
Total divorces	1,995	100.0

Source: The Judiciary

Some 36.6% of couples who divorced in 2020 did not have any children, while 53.9% of them had 1 to 2 children. There were 45 couples with 4 or more children (Table 5).

Table 5 – Number of dependent children ¹, Republic of Mauritius, 2020

Number of children	Number	%
0	730	36.6
1	588	29.5
2	487	24.4
3	145	7.3
4	41	2.1
5 or more	4	0.2
Total	1,995	100.0

¹ dependent children are the living children who are dependent on either of the divorcees at the time the divorce petition is filed

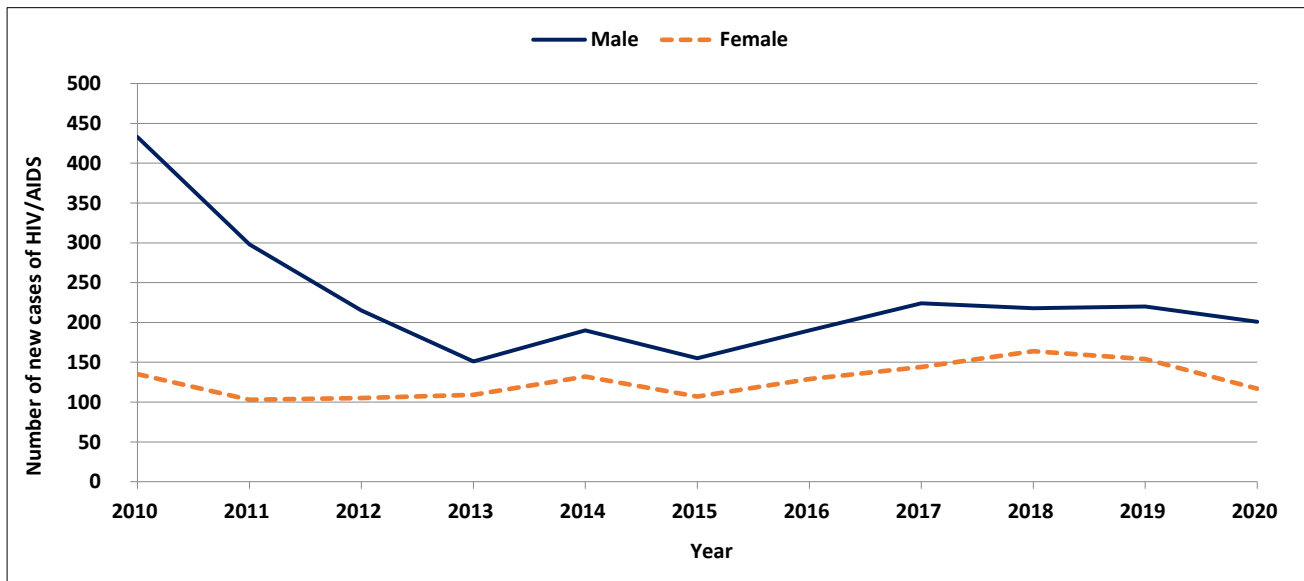

Source: The Judiciary

6. Health

Since the first cases of HIV/AIDS were registered in October 1987, the number has been increasing to reach 8,113 in December 2020, of whom 27.0% were women.

During 2020, 318 new cases of HIV/AIDS were registered among Mauritians and the proportion of women among the new cases was 36.8% compared to 23.8% in 2010.

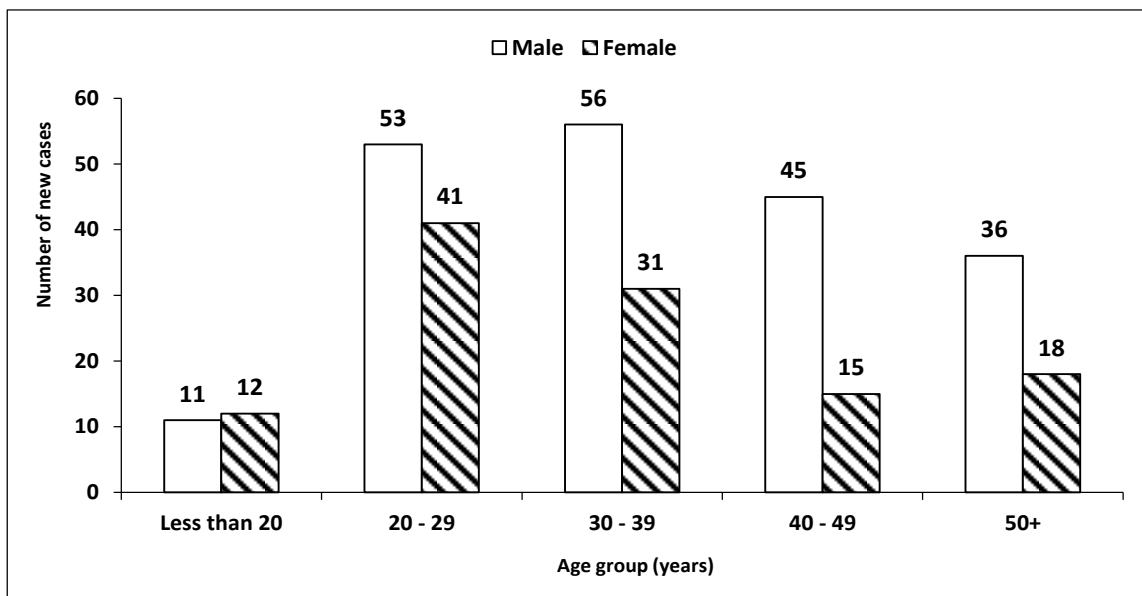

Chart 7 – New HIV/AIDS cases, Republic of Mauritius, 2010 – 2020

Source: Ministry of Health and Wellness

In 2020, out of the 117 new HIV/AIDS cases detected among females, 77.8% was mainly due to heterosexual as mode of transmission and 5.1% to drug injection. As regards males, among the 201 new cases, the mode of transmission mainly due to heterosexual and drug injection were respectively 57.2% and 31.8%.

Chart 8 – Number of new HIV/AIDS cases by sex and age, 2020

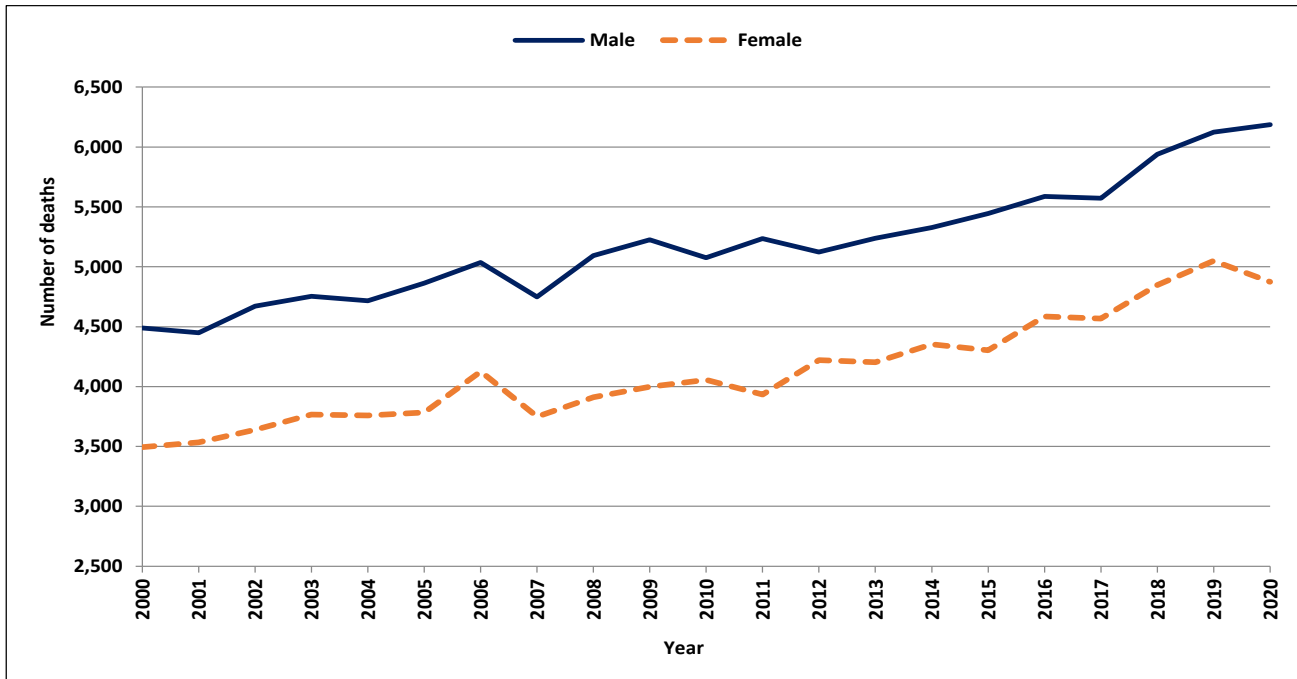

Source: Ministry of Health and Wellness

Among the newly detected cases in 2020, some 56.9% were in the age-group 20-39 years. However, women were predominant in the age-group 20-29 years with 35.0%, while men were mostly in the age-group 30-39 years with 27.9% (Chart 8).

7. Mortality

Though women are more numerous than men in the population, there are fewer deaths among women than among men. In 2020, 6,186 men compared to 4,874 women died (Chart 9). The crude death rate for 2020 was 9.9 for man and 7.6 for woman.

Chart 9 – Number of deaths by sex, Republic of Mauritius, 2000 – 2020

Source: Civil Status Division

In 2020, diabetes mellitus and heart disease were the leading causes of deaths among women and men. Diabetes mellitus and heart disease were respectively responsible for 22.4% and 19.1% of deaths among women and 19.7% and 19.4% of deaths among men. Cerebrovascular disease was responsible for 8.8% of deaths among women and 8.4% of deaths among men. Causes of death specific to women, such as breast and uterus cancer, were responsible for 5.8% of deaths among women while maternal deaths were responsible for another 0.2%. Compared to men, women were more likely to die of hypertensive disease and neoplasms but less likely to die of diseases of the liver and to commit suicide (Table 6).

Table 6 – Deaths (%) by cause and sex, Republic of Mauritius, 2020

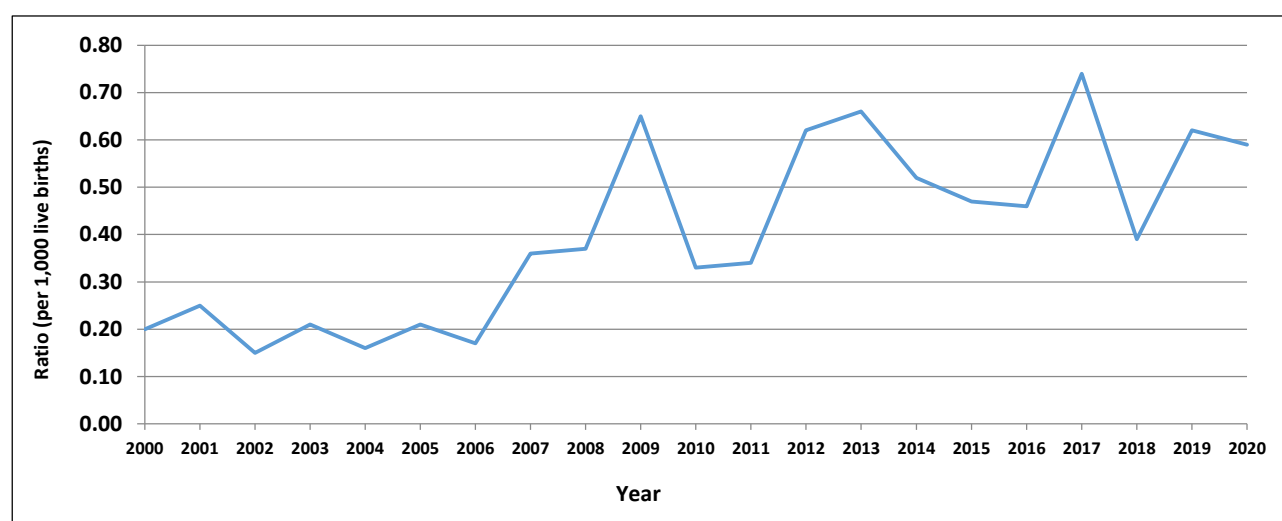

Cause of death	Male	Female
Diabetes mellitus	19.7	22.4
Heart disease	19.4	19.1
Hypertensive disease	4.1	5.3
Neoplasm:	11.0	15.4
of which: breast cancer (malignant)	0.0	3.7
uterus cancer (malignant)	Napp	2.1
Cerebrovascular disease	8.4	8.8
Diseases of liver	3.3	1.2
Suicide	1.9	0.3
Maternal death	Napp	0.2
Other	32.2	27.5
Total	100.0	100.0

Napp: Not Applicable

Source: Ministry of Health and Wellness

The risk of a woman dying as a result of pregnancy or childbirth during her lifetime has generally been declining over the years with slightly higher level of maternal deaths in recent years. From 2000 to 2006, the maternal mortality ratio declined from 0.20 maternal death per 1,000 live births to 0.17. After 2006, the maternal mortality ratio was on a rising trend to reach 0.66 in 2013, but then decreased to reach 0.46 in 2016. The maternal mortality ratio increased again in 2017 to 0.74 and it dropped to 0.39 in 2018, then rose to 0.62 in 2019 and fell to 0.59 in 2020 (Chart 10).

Chart 10 – Maternal Mortality Ratio, Republic of Mauritius, 2000 – 2020

Source: Ministry of Health and Wellness

8. Education

Boys and girls are equally likely to go to pre-primary and primary schools. The Gender Parity Index (GPI) which measures the relative educational participation of boys and girls was 1.0 for pre-primary, primary and secondary indicating no disparity (Table 7).

Table 7 – Gross Enrolment Rates (%) by sex, Republic of Mauritius, 2020

GER	Male	Female	Total	Gender Parity Index
Pre-Primary (4 - 5 years)	102	104	100	1.0
Primary (6 - 11 years)	95	95	96	1.0
Secondary (12 - 19 years)	72	69	76	1.0

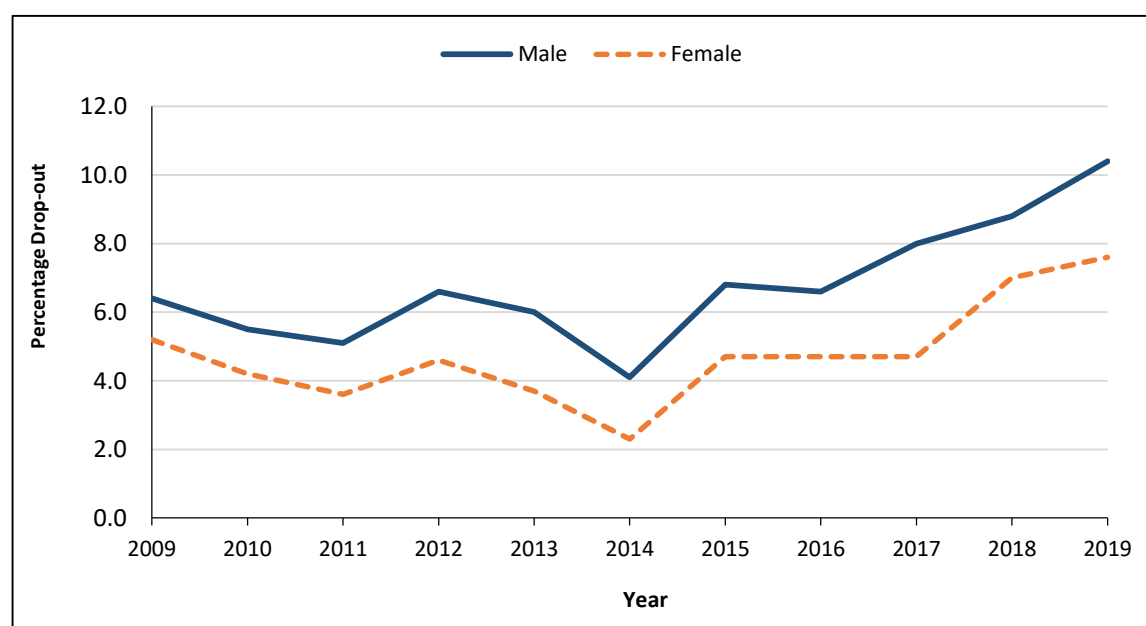

Source: Ministry of Education, Tertiary Education, Science and Technology

At the end of primary, girls generally perform better than boys at the Primary School Achievement Certificate (PSAC) examinations. In 2020, the pass rate for girls was 79.2% against 68.7% for boys.

At secondary level, boys are more likely to be enrolled than girls. The Gender Parity Index (GPI) in secondary enrolment, which measures the relative access to secondary education of males and females was 1.0 in 2020 showing no disparity.

Girls are less likely than boys to drop out from secondary academic stream, 7.6% against 10.4% for boys (Chart 11).

Chart 11 – Drop-Out Rate at secondary academic stream, Republic of Mauritius, 2009 – 2019

Source: Ministry of Education, Tertiary Education, Science and Technology

Girls generally perform better than boys at Higher School Certificate (HSC) examinations (Table 8).

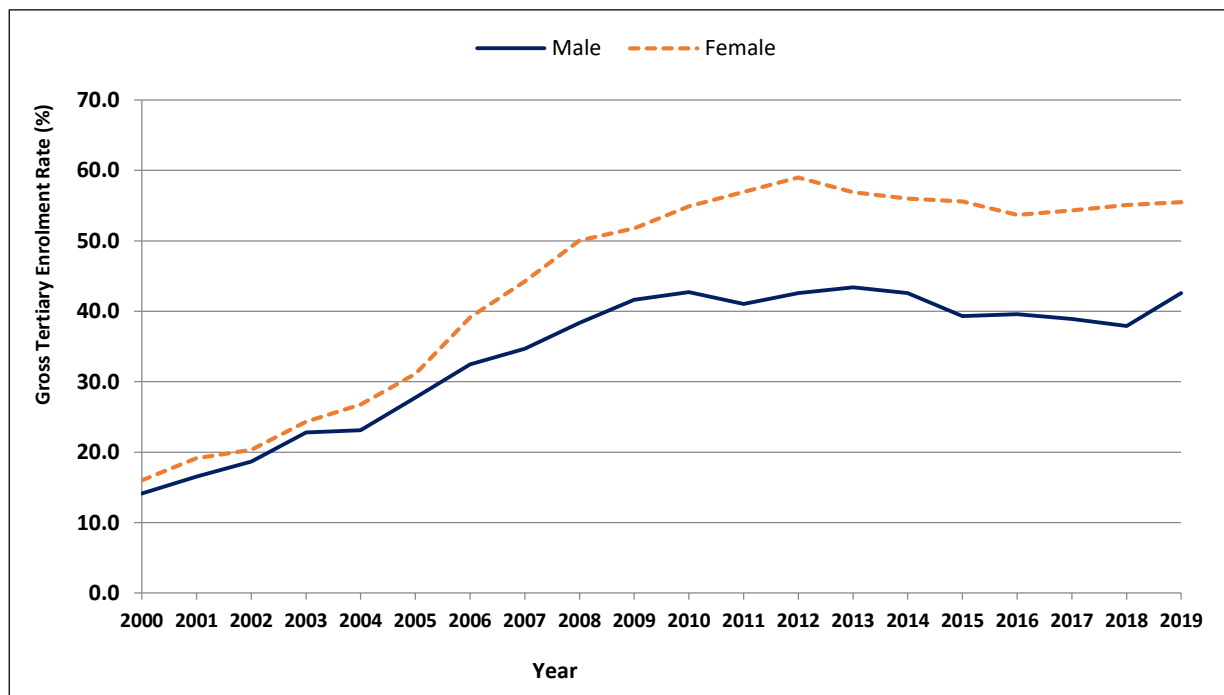

Table 8 – Pass Rate (%) at HSC, Republic of Mauritius, 2010 – 2019

Year	Male	Female
2010	73.7	81.7
2011	75.3	82.3
2012	74.8	82.2
2013	73.9	80.8
2014	70.0	79.1
2015	72.0	77.8
2016	70.9	78.7
2017	69.5	77.9
2018	70.6	78.0
2019	70.8	77.8

Source: Ministry of Education, Tertiary Education, Science and Technology

Consequently, more women than men are enrolled in tertiary institutions. Tertiary enrolment for both girls and boys increased over time but with a widening gap in favour of girls. Tertiary enrolment, as measured by Gross Tertiary Enrolment Rate (GTER), rose from 16.0 in 2000 to 55.5 per cent in 2019 women, and from 14.1 to 42.6 per cent for men during the same period (Chart 12). In 2019, women enrolled in public, private and overseas tertiary institutions numbered 27,624, representing 55.6% of the student population which stood at 49,653.

Chart 12 – Gross Tertiary Enrolment Rate (GTER), Republic of Mauritius, 2000 – 2019

Source: Ministry of Education, Tertiary Education, Science and Technology

Both men and women were mostly enrolled in Bachelor Degree (Table 9). There were fewer women than men at PhD, MPhil and DBA² levels, 244 women against 259 men in 2019. As a result, women continue to be under-represented in research.

Table 9 – No. of student enrolled¹ in tertiary institutions by level, 2019

Level	Male	Female	Total
PhD	135	128	263
MPhil	101	107	208
DBA ²	23	9	32
Masters Degree	1,625	1,834	3,459
Post Graduate Diploma	113	124	237
Post Graduate Certificate	133	404	537
Professional	1,898	2,809	4,707
Bachelor Degree	8,769	12,676	21,445
Diploma	2,023	2,920	4,943
Certificate	151	126	277
Total	14,971	21,137	36,108

¹Enrolment in public and private institutions, including students studying through Distance Education mode but excluding overseas students

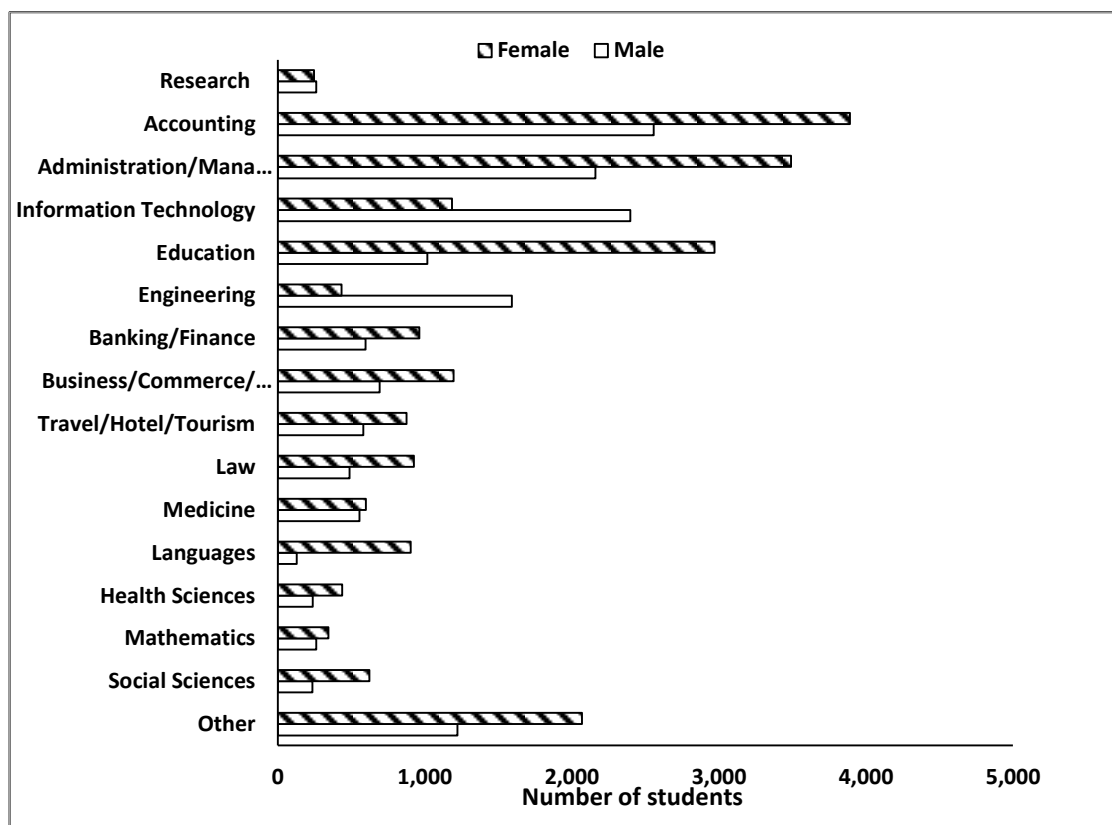

² Doctor of Business Administration

Source: Higher Education Commission

Accounting was the most popular field of study for both men and women (17.1% and 18.4% respectively). Information Technology was the second most popular subject for men (16.0%) followed by Administration and Management (14.4%) and Engineering (10.6%). Administration and Management was the second choice for women (16.5%) followed by Education (14.0%) and Business/Commerce and Marketing (5.7%)

Women were under-represented in science-related fields such as Engineering (2.0% against 10.6% for men) and Information Technology (5.6% against 16.0% for men) whereas men were under-represented in Education (6.8% against 14.0% for women) and Languages (0.9% against 4.3% for women) (Chart 13).

9. Economics Characteristics

In 2020, the active Mauritian population (aged 16 years and above) stood at 570,100 with 336,600 men and 233,500 women. Some 45.3% of women of working age were in the labour force compared to 69.3% of men.

The number of persons aged 16 years and over not forming part of the labour force (population outside the labour force) stood at 431,600 (149,400 males and 282,200 females).

During the period 2010 to 2020, male activity rate was consistently higher than female activity rate. However, the gap has been narrowing over time as the activity rate for men has been decreasing over the years from 75.6% in 2010 to 69.3% in 2020, while that of females has been generally increasing from 43.6% in 2010 to 45.3% in 2020 (Chart 14).

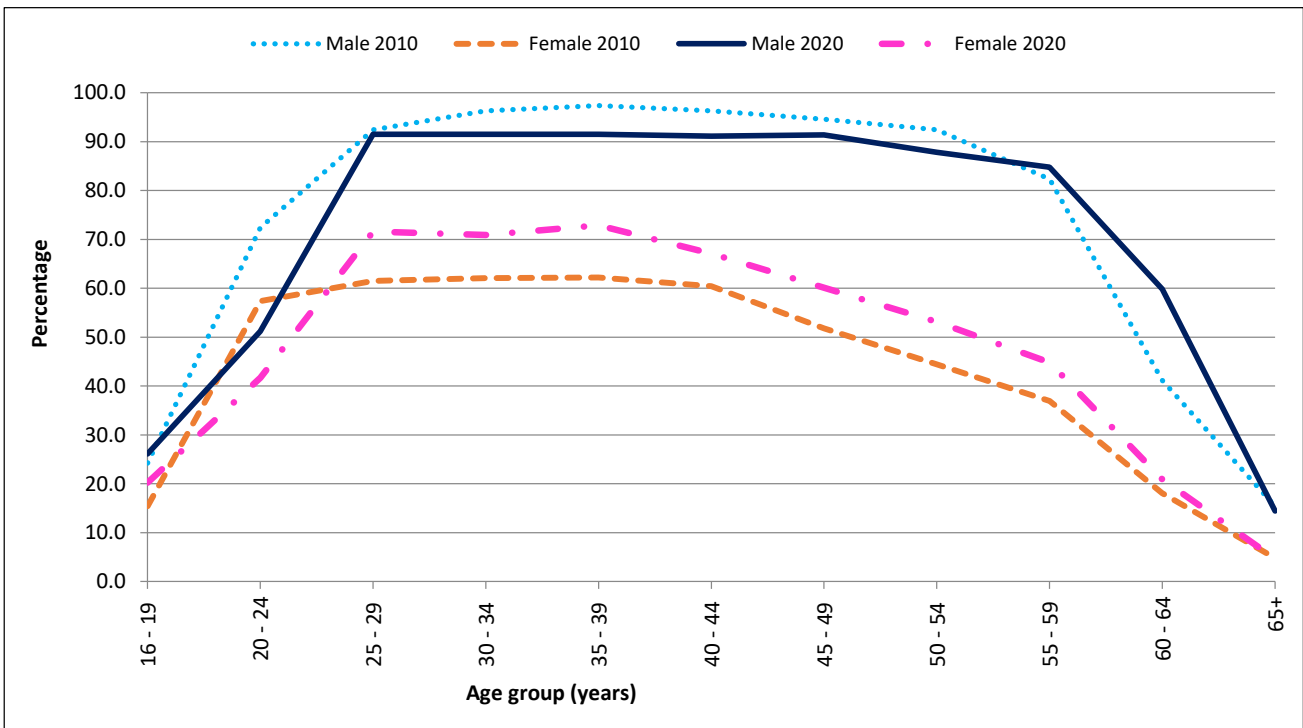

Chart 14 – Activity rate (%) by sex, 2010 – 2020

Source: Continuous Multi-Purpose Household Survey (CMPHS), Statistics Mauritius

Men and women have a similar age pattern of economic activity, i.e., less active at the younger and older age-groups (Chart 15). Over the years, the shape of the curve for female activity rate by age has been tending towards that of the male.

Chart 15 – Activity rate (%) by age-group and sex, 2010 and 2020

Source: Continuous Multi-Purpose Household Survey (CMPHS), Statistics Mauritius

Table 10 – Employed persons by industrial sector and sex, 2020

Industrial sector	Male		Female	
	Number	%	Number	%
Primary	21,300	6.9	6,800	3.3
Secondary	90,200	29.1	30,800	14.8
Tertiary	198,800	64.1	170,000	81.9
All sectors	310,300	100.0	207,600	100.0

Source: Continuous Multi-Purpose Household Survey (CMPHS), Statistics Mauritius

Both women and men had a high proportion of their working population in the tertiary sector (covering trade, accommodation service, transportation, health, education and other service industries), 64.1% for men and 81.9% for women. The secondary sector (covering manufacturing, electricity & water and construction) accounted for 29.1% of the working men and 14.8% of the working women. The primary sector (comprising agriculture and mining & quarrying) employed 6.9% and 3.3% of the working men and women respectively (Table 10).

Table 11 – Distribution (%) of employed population by employment status and sex, 2020

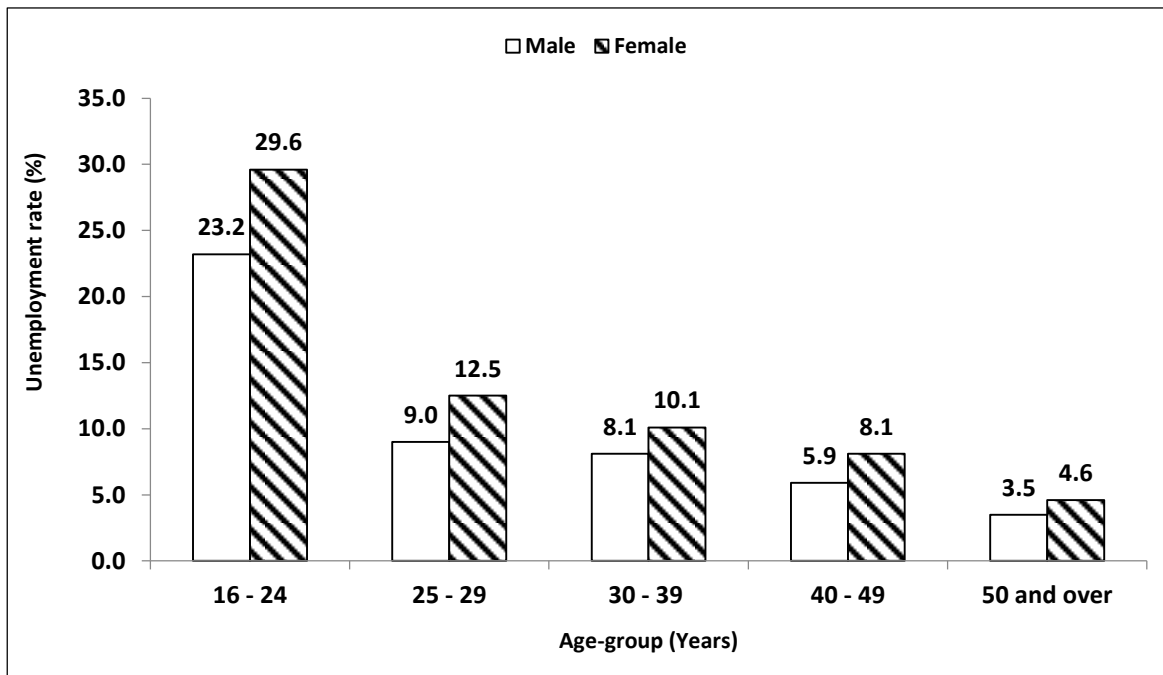

Employment status	Male (%)	Female (%)
Employer	1.2	0.7
Own Account Worker	17.4	11.2
Employee	79.4	83.4
Contributing Family Worker	2.0	4.7
All status	100.0	100.0

Source: Continuous Multi-Purpose Household Survey (CMPHS), Statistics Mauritius

Women were more likely than men to be employees, with 83.4% of the female workforce in that employment status as compared to 79.4% for the male workforce. Women were also less likely than men to work for themselves. Some 18.6% of working men were employers or own account workers compared to 11.9% for women (Table 11).

In spite of being fewer in the labour force (representing only 40.9%), women were over represented among the unemployed; they made up 49.6% of the total unemployed. Unemployed women numbered 25,900 in 20209 compared to 26,300 men. Female unemployment rate stood at 11.1%, much higher than the rate of 7.8% for male. The disparity between male and female unemployment rate was highest in the lower age-groups; the difference was nearly 6 percentage points among the unemployed below 25 years and around 1 percentage point among those aged 50 years and above (Chart 16).

Chart 16 – Unemployment rate (%) by age group and sex, 2020

Source: Continuous Multi-Purpose Household Survey (CMPHS), Statistics Mauritius

Unemployed women were generally more qualified than their male counterparts; 7,100 (27.4%) of them possessed the School Certificate (SC) or Higher School Certificate (HSC) against 6,700 males (25.4%). Also, 5,700 (22.0%) unemployed women attained tertiary level education compared to 4,600 (17.5%) unemployed men (Table 12).

Table 12 – Unemployed persons by educational attainment, 2020

Educational attainment	Male		Female	
	Number	%	Number	%
Primary	5,100	19.4	4,600	17.8
<i>Below CPE</i>	4,300	16.3	3,700	14.3
<i>Passed CPE</i>	800	3.0	900	3.5
Secondary	16,600	63.1	15,600	60.2
<i>Form I - V but not passed SC</i>	9,900	37.6	8,500	32.8
<i>Passed SC</i>	4,300	16.3	4,700	18.1
<i>Passed HSC</i>	2,400	9.1	2,400	9.3
Tertiary	4,600	17.5	5,700	22.0
Total	26,300	100.0	25,900	100.0

10. Poverty

Poor households are households found below the relative poverty line estimated from the Household Budget Survey (HBS). The poverty lines for 2012 and 2017 were estimated at Rs 5,652 and Rs 7,509 respectively (Table 13).

Women are more likely than men to live in poverty. In 2017, 11.0% of the female population was living below poverty line compared to 9.6% for the males. Out of 131,300 persons in relative poverty, 70,800 were females and 60,500 were males.

The 2017 HBS showed that poverty is more likely to be among female headed households than male headed households (15.9% compared to 7.6% in 2017).

Table 13 – Number of persons in relative poverty, 2012 and 2017

	2012	2017
Relative poverty line (Rs)	5,652	7,509
Persons in relative poverty		
Both sexes	122,700	131,300
Male	56,000	60,500
Female	66,700	70,800

Source: Household Budget Surveys, Statistics Mauritius

11. Social benefits and inmates of infirmaries

As at June 2020, out of 232,935 Basic Retirement pensioners, 55.3% were women (Table 14). During that period, the number of women receiving Basic Retirement Pension outnumbered their male counterparts by 24,491 and this number is expected to increase to around 30,700 by 2057. Both male and female pensioners were concentrated in the age-group 60 to 69 years. It is to be noted that 72.1% of the pensioners in the age group 90 to 99 were women. For every male centenary pensioner, there were 4 female centenary pensioners.

There were 18,460 recipients of Basic Widows Pension as at June 2020, a decrease of 13.4% compared to 21,323 in 2000. A large majority (69.1%) of widows were aged between 50 and 59 years.

Invalids pensioners numbered 31,599 as at June 2020, with a higher proportion of men (53.5%) compared to women (46.5%).

As at June 2020, some 326 children received Basic Orphans Pension, amongst whom 55.2% were girls.

Table 14 – Number of beneficiaries of selected benefits, 2000 and 2020

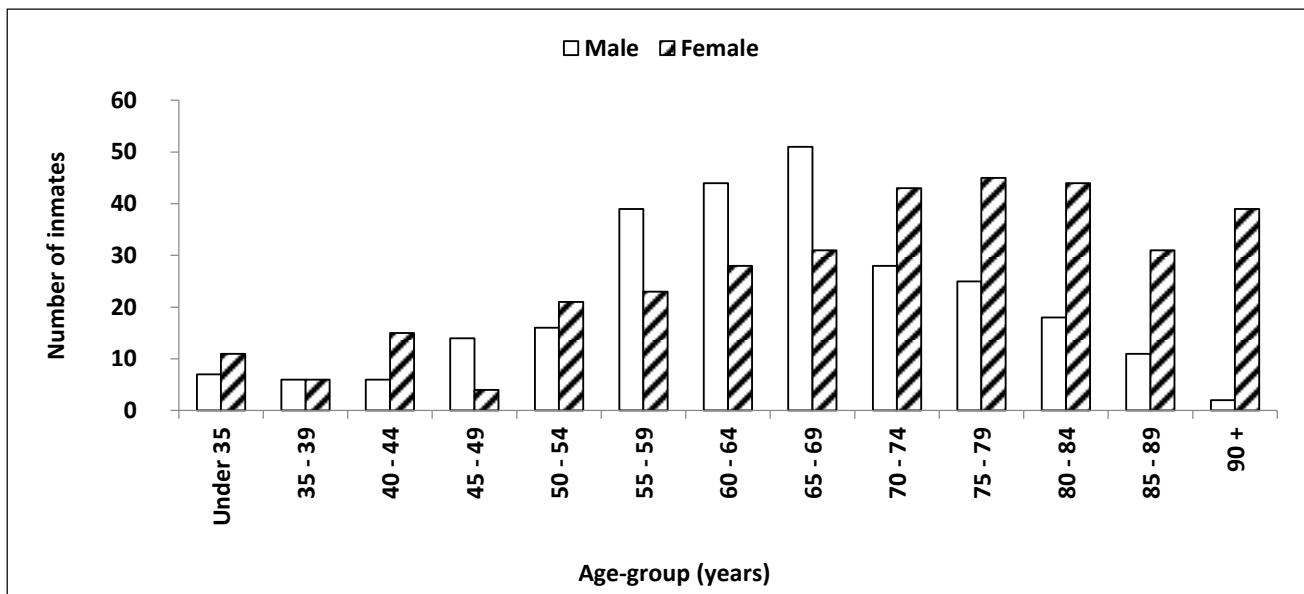

Pension type	June 2000			June 2020		
	Male	Female	Total	Male	Female	Total
Basic Retirement Pension	48,321	63,564	111,885	104,222	128,713	232,935
<i>of whom 90 years and above</i>	<i>N.A</i>	<i>N.A</i>	1,583	<i>1,235</i>	<i>3,276</i>	4,511
Basic Widow's Pension	<i>Napp</i>	21,323	21,323	<i>Napp</i>	18,460	18,460
Basic Invalid's Pension	10,012	9,946	19,958	16,902	14,697	31,599

Source: Ministry of Social Integration, Social Security and National Solidarity

In 2020, some 56.1% of the 608 inmates living in infirmaries and orphanages registered at the Ministry of Social Integration, Social Security and National Solidarity (Social Security Division), were women. The women residents were older than men with 33.4% aged 80 years and over compared to 11.6% for men (Chart 17).

Chart 17 – Number of Inmates in infirmaries and orphanages by age group and sex, 2020

Source: Ministry of Social Integration, Social Security and National Solidarity

Women inmates were more prone to heart disease (6.2% compared to 1.9% among men) while more men inmates than women suffered from diabetes (9.0% compared to 6.2% among women) (Table 15).

Table 15 – Distribution (%) of inmates in infirmaries and orphanages by disability, 2020

Disability	Male	Female
Loss of sight	3.7	2.1
Partial paralysis	15.0	8.5
Total Paralysis	0.0	8.8
Mental diseases	27.0	19.4
Heart diseases	1.9	6.2
Diabetes	9.0	6.2
Other (including those suffering from multiple disabilities)	32.2	37.8
Inmates with no disabilities	11.2	11.1
Total	100.0	100.0

12. Women in decision making

Women continue to be underrepresented in decision-making position in Government cabinet. The share of women among cabinet ministers was 12.5% in 2020 (3 out of 24 Ministers).

Even though the proportion of women elected at Municipal Council elections has increased over the years, the number of female mayors remained low. In 2020, there was no female mayor in the five municipalities.

More women are holding senior positions in government services. The proportion of women in the most senior positions has increased from 23.1% in 2000 to 39.7% in 2020 (Chart 18).

Chart 18 – Senior position¹ in Government Services, 2000– 2020

¹ Senior Chief Executive, Permanent Secretary, Deputy Permanent Secretary, Director, Manager, Judge and Magistrate

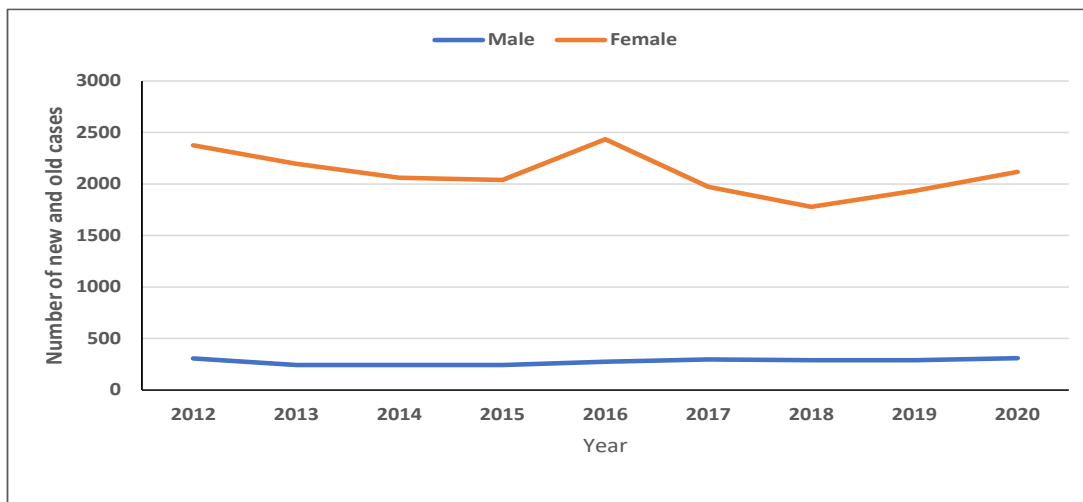

Source: Survey of Employment in Government Services, Ministry of Gender Equality and Family Welfare

13. Domestic violence

Women are more likely to be victims of domestic violence. The number of cases of domestic violence, reported at the Ministry of Gender Equality and Family Welfare, went up by 9.1% in 2020 to reach 2,425 from 2,222 in 2019. The total number of domestic violence against women increased from 1,933 in 2019 to 2,116 in 2020 and those against men rose from 289 to 309 (Chart 19).

It is to be noted that a victim of domestic violence can be subject to one or more types of violence and thus the number of cases of domestic violence tend to be higher than the number of victims.

Chart 19 – Number of reported cases (new and old) of domestic violence, 2012 – 2020

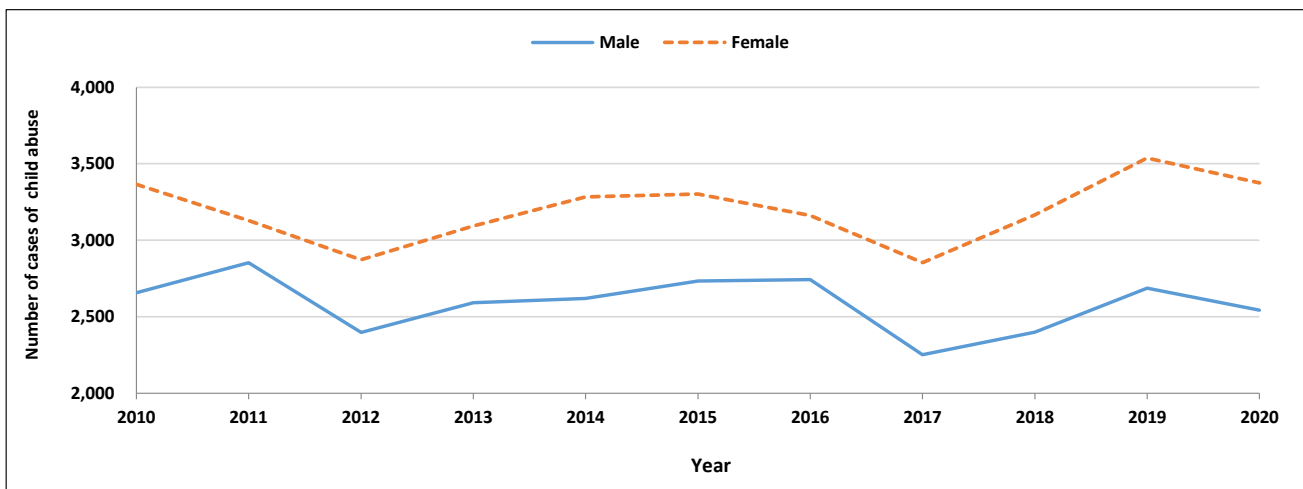

Source: Ministry of Gender Equality and Family Welfare

Some 33.1% of women victims of domestic violence reported verbal assault by spouse or partner (ill treatment, harassment, abuse, and humiliation), 32.7% physical assault by spouse or partner, 8.7% threatening assault by spouse and 3.2% has been subjected to physical assault by others living under the same roof. Reported cases by men related mostly to verbal assault by spouse or partner (33.3%), physical assault by spouse or partner (19.8%) and verbal assault by others living under the same roof (10.8%).

14. Child Abuse

The total number of cases of child abuse reported at the Child Development Unit went down to 5,917 in 2020 from 6,225 in 2019 (Chart 20).

Chart 20 – Number of reported cases of child abuse at the Child Development Unit, 2010 – 2020

Source: Ministry of Gender Equality and Family Welfare

Of the reported cases in 2020, some 57.0% of the victims were females (Table 16). The most common nature of abuse was psychological/emotional (20.6% for male and 17.5% for female) followed by neglect cases (20.0% for male and 14.7% for female) and sexual abuse (4.2% for male and 12.7% for female).

Table 16 – Reported cases of child abuse at Child Development Unit by nature of problem, 2020

Nature of Problem	Male		Female	
	Number	%	Number	%
Abandonment	24	0.9	22	0.7
Physical abuse	17	0.7	11	0.3
Neglect cases	509	20.0	496	14.7
Worst forms of Labour	7	0.3	4	0.1
Sexual abuse	106	4.2	427	12.7
Psychological /Emotional abuse	525	20.6	589	17.5
Other problems	1,355	53.3	1,825	54.1
Total	2,543	100.0	3,374	100.0

Source: Ministry of Gender Equality and Family Welfare

15. Offences

Men are more likely to be victims of homicides and assaults, while women are more prone to sexual violence and sexual exploitation. In 2020, some 53.4% of the assaults and 77.4% of the intentional homicides were committed against men. Some 91.6% of victims of sexual violence and sexual exploitation were women (Table 17).

Table 17 –Victims¹ of selected offences² reported at the Police, Republic of Mauritius, 2020

Offences	Male	Female	Both sexes
Homicides	64	17	81
<i>of which Intentional homicides</i>	<i>41</i>	<i>12</i>	<i>53</i>
Assaults	4,823	4,212	9,035
Sexual violence and sexual exploitation	48	521	569
<i>of which Rape</i>	<i>0</i>	<i>27</i>	<i>27</i>

16. Sports

During the period 2017 to 2020, participation in high level sports was consistently lower among female athletes than male athletes. In 2020, participation among female athletes was 34.1% against 65.9% among male athletes (Table 19).

Table 19 – Participation of high level athletes in sports, 2017 – 2020

	2017		2018		2019		2020	
	Number	%	Number	%	Number	%	Number	%
Male	69	67.0	93	66.0	89	67.9	87	65.9
Female	34	33.0	48	34.0	42	32.1	45	34.1
Total	103	100.0	141	100.0	131	100.0	132	100.0

Source: Ministry of Youth Empowerment, Sports and Recreation

The most common sporting disciplines in which women participated in 2020 were “athletics” (24.4%) followed by “handisports” (17.8%), badminton (8.9%) and “weight lifting” (8.9%). For men, the most common sporting disciplines were “athletics” (16.1%), “boxing” (13.8%), “handisports” (13.8%) and judo (12.6%) (Table 20).

Table 20 – Participation of high level athletes in sports, as at December 2020

Sports discipline	Male		Female	
	No.	%	No.	%

17. Global Gender Gap Indices

Since 2006, through the Global Gender Gap Report series, the World Economic Forum has been quantifying the magnitude of gender-based disparities and tracking their progress over time. By providing a comprehensive framework for benchmarking global gender gaps, the report identified countries that are role models in dividing their resources equitably between women and men, regardless of the overall resource level.

The Global Gender Gap Index (GGI) seeks to measure one important aspect of gender equality; their relative gaps between women and men across a large set of countries and across four key areas, namely: (a) economic participation and opportunity, (b) educational attainment, (c) health and survival and (d) political empowerment. The equality benchmark is considered to be one with no gap between men and women.

In 2020, Mauritius was ranked 115 out of 153 countries worldwide (Table 21). Mauritius has closed both its education attainment, and health and survival gender gaps with indices nearing 1 (Table 22).

Table 21 – Global Gender Gap Index by selected countries, 2018 – 2020

Country	2018		2019		2020	
	Rank	Value	Rank	Value	Rank	Value
Iceland	1	0.858	1	0.877	1	0.877
Norway	2	0.835	2	0.842	2	0.842
France	12	0.779	15	0.781	15	0.781
United Kingdom	15	0.774	21	0.767	21	0.767
Canada	16	0.771	19	0.772	19	0.772
South Africa	19	0.755	17	0.780	17	0.780
Australia	39	0.730	44	0.731	44	0.731
United States	51	0.720	53	0.724	53	0.724

Appendix: Glossary

Activity rate: The ratio (%) of the economically active population (employed and unemployed) to population aged 16 years and above.

Age specific fertility rate: the number of live births to women of a specified age-group per 1,000 women in that age-group.

Assault: Assault is defined as intentional or reckless application of physical force inflicted upon the body of a person.

Athletics: Athletics is a collection of sporting events that involve competitive running, jumping, throwing and walking, such as sprints (100 m, 200 m,...), relays (4×100 m, 4×400 m), running (800 m, 1500 m,...), long jump, triple jump, high jump, hammer throw, javelin throw, race walking, etc

Contraventions: Contraventions are defined as offences that are punishable by: (a) imprisonment for a term not exceeding 10 days; (b) fine not exceeding 5,000 rupees.

Contributing family worker: A contributing family worker is a person who works without pay in an enterprise operated by a family worker.

Crimes: Offences that are punishable by: (a) penal servitude (b) fine exceeding 5,000 rupees.

Crude death rate: the number of deaths in a year per 1,000 mid-year population.

Current user of contraceptive method: A new acceptor who continues with the same or different method of contraception and pays regular return visits to the family planning service point to receive services and supplies.

Divorce rate: the number of persons divorced in a year per 1,000 mid-year population.

Employee: An employee is a person who works for pay for someone else, even in a temporary capacity.

Employer: An employer is a person who operates his/her own business or trade and hires one or more employees.

Employment: Employed population consists of Mauritians aged 16 years and above who have worked for pay, profit or family gain for at least one hour during reference week of a month. It includes those who are temporarily absent from work for reason such as leave with pay, leave without pay and temporary disorganisation of work (bad weather, breakdown of equipment, lack of order, etc).

Gross Enrolment Ratio (GER): Number of pupils enrolled in a given level of education, regardless of age, expressed as a percentage of the population in the relevant age-group

- 4 - 5 years for pre-primary
- 6 – 11 years for primary
- 12 – 19 years for secondary

Gender Parity Index (GPI): Ratio of the GER for female to the GER for male. It measures the relative education participation of boys and girls. A GPI of 1 reflects equal enrolment rate for boys and girls, whereas a GPI greater than 1 shows disparity in favour of girls.

HIV/AIDS: AIDS (Acquired immune deficiency syndrome or acquired immunodeficiency syndrome) is a disease caused by a virus called HIV (Human Immunodeficiency Virus).

Household income: It comprises income from work (both paid and self-employment), transfer income (mainly government pensions, regular allowances from relatives and organisations), property income, and income from owned produced goods and it also includes imputed rent – a rental value for non-renting households.

Intentional homicide: Intentional homicide is defined as unlawful death inflicted upon a person with the intent to cause death.

Juvenile: a person aged below 18 years.

Juvenile delinquency rate: the number of juvenile offenders involved in offences (excluding contraventions) per 1,000 juvenile population.

Life expectancy at birth: the number of years a new born infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life.

Marriage rate: the number of persons married in a year per 1,000 mid-year population.

Maternal mortality rate: number of deaths due to pregnancy, childbirth and the puerperium per 10,000 live births during that year.

Misdemeanours: Offences that are punishable by:(a) imprisonment for a term exceeding 10 days; (b) fine exceeding 5,000 rupees.

New acceptor of contraceptive methods: Someone who accepts a contraceptive method for the first time from a provider of a family planning programme.

Own Account Worker: An own account worker is a person who operates his/her own business or trade but does not hire employees. He/She may be working alone or with the help of contributing family workers.

Primary sector: Primary Sector comprises activities related to 'Agriculture, hunting, forestry and fishing' and 'Mining'.

Relative poverty line (RPL): It is a threshold below which a household/ person is deemed poor and is set as the 'half median monthly household income per adult equivalent'.

Secondary sector: Secondary Sector comprises activities related to 'Manufacturing, 'Electricity, gas and water supply' and 'Construction'.

Sex ratio: The sex ratio is defined as the number of males per 100 females.

Sexual violence: Sexual violence is defined as unwanted sexual act, attempt to obtain a sexual act, or contact or communication with unwanted sexual attention without valid consent or with consent as a result of intimidation, force, fraud, coercion, threat, deception, use of drugs or alcohol, or abuse of power or of a position of vulnerability.

Sexual exploitation: Sexual exploitation is defined as acts of abuse of a position of vulnerability, power or trust, or use of force or threat of force, for profiting financially, physically, socially or politically from the prostitution or sexual acts of a person.

Total fertility rate: the average number of children born to an average woman assuming that she survives to the end of her child-bearing age and is subjected to a fixed schedule of age-specific fertility rates.

Unemployment rate: Unemployment rate is the ratio (%) of unemployment to economically active population (employed and unemployed).

Unemployment: Unemployed population comprises all Mauritians aged 16 years and over who are not working but who are looking for work and are available for work during the reference week.
