External Merchandise Trade Statistics – 1st Quarter 2024

1. Introduction

This issue of Economic and Social Indicators presents external merchandise trade statistics for the first quarter of 2024 and the years 2022 and 2023. These statistics have been compiled from declarations lodged by importers and exporters at Customs Department. Some of these declarations are at times revised at a later period and corrections are made accordingly on the computerised database of the Customs Department of the Mauritius Revenue Authority (MRA).

Thus, while revised figures for 2023 are published in this indicator, those for 2024 are still provisional and will be revised, as and when latest amendments are obtained from the Customs Department of the MRA.

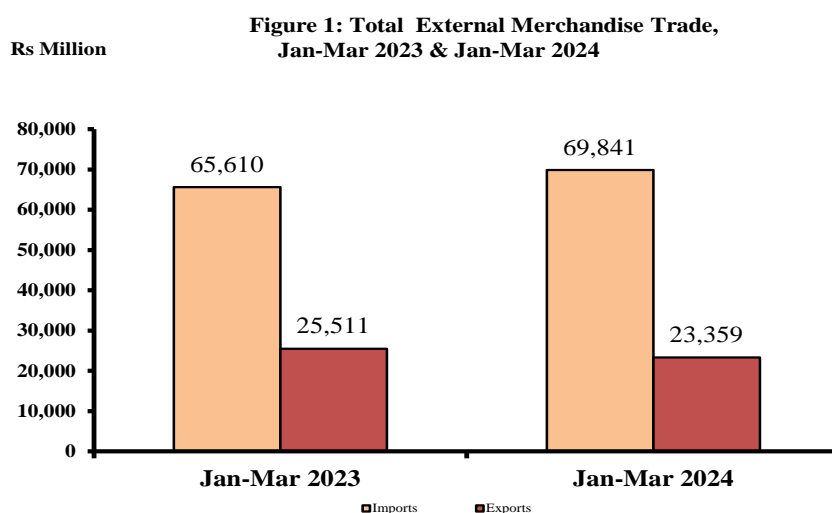

Data on external merchandise trade are compiled as per the recommendations of the United Nations General Trade System. According to this system, all goods entering and leaving the national frontier, including trading activities of the Freeport Zone should be accounted for.

2. Total value of trade and trade balance

Total external merchandise trade for the first quarter of 2024 was valued at Rs 93,200 million, i.e. 6.1% lower than the value of Rs 99,250 million of the previous quarter and 2.3% higher than the value of Rs 91,121 million of the corresponding quarter of 2023.

For the first quarter of 2024, total exports (inclusive of ship's stores & bunkers) were valued at Rs 23,359 million against total imports of Rs 69,841 million. In the previous quarter, total exports (inclusive of ship's stores and bunkers) amounted to Rs 25,828 million against total imports of Rs 73,422 million while for the corresponding quarter of 2023, total exports (inclusive of ship's stores & bunkers) amounted to Rs 25,511 million against total imports of Rs 65,610 million. In the first quarter of 2024, total exports and total imports were lower by 9.6% and 4.9% respectively compared to the previous quarter. Compared to the corresponding quarter of 2023, total exports and total imports were lower by 8.4% and higher by 6.4% respectively.

The resulting trade deficit for the first quarter of 2024 worked out to Rs 46,482 million, 2.3% lower than the deficit of Rs 47,594 million of the previous quarter and 15.9% higher than the deficit of Rs 40,099 million of the corresponding quarter of 2023.

Notes

(1) Scope and coverage

External merchandise trade statistics are compiled according to the General Trade System as recommended by the United Nations. Using the national boundary as the statistical frontier, the General Trade System is a record of all goods entering (imports) and leaving the country (exports).

Imports include goods brought in directly for domestic consumption plus goods imported into customs bonded warehouses.

Exports cover:

- Domestic exports defined as goods of national origin, that is goods produced in the exporting country.
- Re-exports which are exported in the same condition as imported or after undergoing minor operations which leave them essentially unchanged and include re-exports from customs bonded warehouses.
- Ship's Stores and Bunkers (SSB) are included in total exports and are shown separately.

Trade by parcel post is also included in imports and exports.

(2) Valuation

Imports are valued on a C.I.F. (Cost, Insurance and Freight) basis, whilst exports on a F.O.B. (Free on Board) basis.

Cost, Insurance and Freight (C.I.F) value is the value of a country's imports of goods, including all charges for transporting and insuring the goods from the country of exports to the given country but excluding the cost of unloading from the ship, aircraft unless it is borne by the carrier.

Free on Board (F.O.B) value is the value of a country's exports of goods, including all costs of transporting the goods to the customs frontier, export duties.

(3) Classification of commodities

Commodities are coded according to the **Harmonised Commodity Description and Coding System Nomenclature (HS 2022)**. However, for the purposes of economic analysis and to facilitate international comparison of trade by commodity data, the commodities are also classified according to **the Standard International Trade Classification (Revision 4) (SITC Rev. 4)**. The HS and the SITC Rev. 4 are six- and five-digit codes respectively but have been extended to eight and seven digits to accommodate national requirements.
