Note: Readers are invited to make the distinction between official data which are published in the Economic and Social indicators and the analysis presented for the benefit of general readers. Differences of opinion may arise regarding the analytical part but these do not in any way, undermine the quality of the data. The Editors welcome constructive critical comments.

CONSUMER PRICE INDEX

(Base period: January – December 2023 = 100)

2nd Quarter 2026

1. INTRODUCTION

This issue of Economic and Social Indicators presents the Consumer Price Index (CPI) for the second quarter 2026. The methodology used for computing CPI and inflation rate is given in the technical note at Annex.

2. KEY POINTS

2.1 Overall CPI

The Consumer Price Index, which stood at 109.6 in March 2026, registered a net increase of 2.6 points (or +2.4%) to reach 112.2 in June 2026 (Table 1A).

On a monthly basis, the CPI increased by 1.4 points in April, 0.9 point in May and 0.3 point in June 2026.

2.2 Overview of CPI movements

The main contributors for the net increase in CPI from March 2026 to June 2026 (Table 2) were:

- (a) higher prices of bread (+0.4 point), cooking oil (+0.1 point) and some other food products (+0.4 point);
- (b) higher prices of cigarettes (+0.1 point);
- (c) higher electricity tariffs (+0.4 point), higher prices of cooking gas (+0.2 point) and higher interest rates on housing loans (+0.1 point);
- (d) higher prices of gasoline (+0.5 point), diesel (+0.1 point) and air-tickets for international travel (+0.1 point), and higher taxi fares (+0.1 point);
- (e) higher prices of prepared meals in snacks (+0.1 point) and some other prepared foods (+0.1 point) and,
- (f) higher prices of other goods and services (+0.2 point);
- partly offset by
- (g) lower prices of vegetables (-0.2 point) and lower private T.V subscription fees (-0.1 point).

3. MOVEMENT OF CPI SUB INDICES

Percentage change in CPI sub-indices from March to June 2026

The changes in the sub-indices (Table 3) for the thirteen divisions of consumption expenditure from March 2026 to June 2026 were as follows:

<i>Food and non-alcoholic beverages</i> (+2.6%)	The increase was mainly due to higher prices for bread (+42.9%), cooking oil (+13.6%), fresh beef (+9.4%) and fresh chicken (+2.0%), partly offset by lower prices of vegetables (-4.5%), culinary herbs (-12.7%) and fruits (-2.2%).
<i>Alcoholic beverages and tobacco</i> (+1.4%)	The increase was due to higher prices of cigarettes (+2.7%) and beer (+0.2%), cane spirits (+1.4%), wine (+1.0%) and whisky (+0.3%).
<i>Clothing and footwear</i> (+0.6%)	The increase was due to higher prices of ready-made clothing (+0.7%), footwear (+0.6%) and clothing materials (+0.4%).
<i>Housing, water, electricity, gas and other fuels</i> (+6.6%)	The increase was due to higher electricity tariffs (+14.4%), higher prices of cooking gas (+26.4%) and higher interest rates on housing loan (+2.0%), partly offset by lower prices of cement (-0.2%) and paint (-0.3%).
<i>Furnishings, household equipment and routine household maintenance</i> (+1.4%)	The increase was mainly due to higher prices of detergents (+7.8%), washing materials (+2.3%) and cleaning materials (+2.7%), partly offset by lower prices of laundry soap (-2.8%) and small electric household appliances (-1.5%).
<i>Health</i> (+0.3%)	The increase was due to higher prices of medicinal products (+0.8%), spectacles (+0.9%) and medical products (+0.3%), partly offset by lower prices of adult diapers (-1.0%).
<i>Transport</i> (+4.8%)	The increase was mainly due to higher prices of gasoline (+9.9%), diesel (+18.2%), air tickets for international travel (+5.2%) and higher taxi fares (+12.6%), partly offset by lower prices of motor vehicles (-0.2%) and air tickets for domestic travel (-0.7%).
<i>Information and Communication</i> (-1.6%)	The decrease was due to lower private T.V subscription fees (-10.1%), partly mitigated by higher prices of information and technology equipment (+0.9%), mobile phones (+0.6%) and audio-visual equipment (+0.1%).
<i>Recreation, sports and culture</i> (+0.5%)	The increase was mainly due to higher prices of some toys and games (+4.7%), some video games (+2.7%) and stationeries (+1.3%), partly offset by lower prices of pet foods (-1.3%).
<i>Education services</i> (+0.1%)	The increase was due to higher post-secondary and non-tertiary education fees (+2.3%).

Restaurants and accommodation services (+3.1%)

The increase was mainly due to higher prices of prepared meals in snacks (+4.1%), restaurants (+2.1%), international fast-food outlets (+0.5%) and some other prepared foods (+5.1%).

Insurance and financial services (+0.1%)

The increase was due to higher charges for some financial services (+5.5%).

Personal care, social protection and miscellaneous goods and services (+0.3%)

The increase was mainly due to higher prices of some goods for personal care and hygiene (+0.3%) and higher charges for hairdressing services (+2.3%), partly offset by lower prices of some religious items (-1.1%).

4. INFLATION RATE

The headline inflation rate for the twelve months ending June 2026 worked out to 4.1%, compared to 2.9% for the twelve months ending June 2025.

The headline inflation rate excluding “Alcoholic beverages and tobacco” for the twelve months ending June 2026 worked out to 3.5%, compared to 3.2% for the twelve months ending June 2025.

The headline inflation rate was 3.7% for year 2025 compared to 3.6% for year 2024 (Table 5).

The headline inflation rate excluding 'Alcoholic beverages and tobacco' was 3.5% for year 2025, compared to 3.6% for year 2024.

5. INTERNATIONAL COMPARISON OF INFLATION RATE

The table below compares the inflation rate (as measured by the percentage change in the average CPI for a given year relative to the previous year) of Mauritius with those of our main importing countries and some countries in the region for year 2025.

Inflation rate (%) of selected countries, year 2025

Country	Inflation rate (%)	Country	Inflation rate (%)
France	0.9	Australia	2.9
United Kingdom	3.4	United States	2.7
China	0.0	Botswana	2.8
India	2.1	Mauritius	3.7
Japan	3.2	Seychelles	0.3
Singapore	0.9	South Africa	3.2

^{1/} The CPI for January 2018 to March 2023, originally based on January to December 2017, has been converted to the new base January - December 2023=100 using a linking factor of 1.311723. Example: the monthly CPI for January 2023 has been converted to the new base by dividing 128.5 by 1.311723 (≈ 97.9)

Table 2 - Net contribution of main commodities that affected the index from March to June 2026

Commodity	Contribution to change in overall index point	Percentage change in price index
Bread	+0.4	+42.9
Vegetables	-0.2	-4.5
Cooking Oil	+0.1	+13.6
Other food products	+0.4	+1.7
Cigarettes	+0.1	+2.7
Electricity tariffs	+0.4	+14.4
Cooking gas	+0.2	+26.4
Interest rates on housing loans	+0.1	+2.0
Gasoline	+0.5	+9.9
Diesel	+0.1	+18.2
Air-tickets for international travel	+0.1	+5.2
Taxi fares	+0.1	+12.6
Private T.V subscription fees	-0.1	-10.1
Prepared foods in snacks	+0.1	+4.1
Other prepared foods	+0.1	+5.1
Other goods and services	+0.2	+0.4
Overall	+2.6	+2.4

Technical note

1. Methodology used for the computation of the Consumer Price Index (Base period: January – December 2023 = 100)

(a) Definition

The **Consumer Price Index** (CPI) is an indicator of changes over time in the general level of prices of goods and services acquired by Mauritian consumers.

(b) Measurement of the CPI

The CPI measures price change by comparing, through time, the cost of a fixed basket of goods and services. As prices vary over time, the total cost of the basket also changes and thus the CPI measures the change in the cost of this basket. It provides a way to compare what this basket costs at a given period relative to a reference or base period.

The cost of the CPI basket is assigned a value of 100 in the base period and the costs in other periods are expressed as percentage changes compared to the base period. For example, if the CPI is 110, this means that there has been an increase of 10% in the cost of the basket since the base year; similarly an index of 90 means a 10% decrease in the cost of the basket.

(c) The CPI basket

The CPI basket is based on the expenditures of private households in a reference period, currently January to December 2023. The composition of the current CPI basket has been derived from the 2023 Household Budget Survey (HBS) data. It has been determined in accordance with latest ILO and SADC recommendations.

The items constituting the basket have been selected on the basis of the importance of household consumption expenditure on them. The basket includes all important items on which consumption expenditure is significant, i.e. accounting for around 0.1% or more of total household consumption expenditure. Each item's relative importance, which is called the "weight" (usually expressed on a total of 1000), is the expenditure share of the item. Non-consumption items such as income tax, social security contributions, purchase of land, shares and life insurance are excluded.

The commodities in the basket are classified according to the UN COICOP (Classification of Consumption Expenditure according to Purpose) with 13 divisions, 44 groups, 92 classes and 173 subclasses.

(d) Price coverage

The prices used in the CPI calculation are those that any member of the public would have to pay to purchase the specified goods or services. Any taxes on products attached to the goods are included.

Price collection is done on a regular basis. Each month, around 8,740 price quotations are collected in respect of around 1,300 item indicators from some 610 outlets selected to be representative of regions across the islands of Mauritius and Rodrigues.

Prices of non-perishable items are collected monthly in the nine geographical districts of the island of Mauritius and in Rodrigues.

Prices of fresh fruits, vegetables, meat and fish are collected on a weekly basis from 9 markets in Port Louis, Rose Hill, Quatre Bornes, Vacoas, Rose Belle, Flacq, Goodlands, Pamplemousses and Port Mathurin.

Information on rent is obtained from a quarterly rent survey of some 100 rented dwellings.

(e) Formula for computation of the CPI

The CPI is computed according to the Laspeyres Formula as a weighted average of price relatives of individual items. The weights are fixed and correspond to the base period expenditures. The Laspeyres Index measures the cost of a basket of goods and services at different points in time, relative to the cost of the same basket in the base period.

The formula used for computing the CPI at time t is

$$I_t = \frac{\sum W_i (P_{it} / P_{i0})}{\sum W_i} \times 100$$

where,

I_t : CPI for period t with reference to a base period 0

P_{i0} : Price of item i at time 0, i.e. during base period

P_{it} : Price of item i at time t

W_i : Weight of item i

The base period is January to December 2023, the period during which the latest HBS was conducted.

2. Inflation

(a) Definition of Inflation

Inflation is the percentage change in the level of prices (as measured by the CPI) from one period to another.

(b) Calculating the Inflation Rate

The headline inflation rate in Mauritius, like in many other countries, is calculated by using the annual average method, i.e. by comparing the average level of prices during a twelve-month period with the average level during the corresponding previous twelve-month period. This type of inflation rate is more appropriate for adjusting wages, salaries and pensions to compensate for loss of purchasing power. *All inflation rates presented in this publication relate to the headline inflation.*

Another commonly used method of calculating the inflation rate is the so called ‘year-on-year’ method. The year-on-year inflation rate is calculated as the percentage change in the CPI for a given month with respect to the CPI for the corresponding month of the previous year. It is generally used by central banks for monetary policy decisions. Year-on-year inflation rates are not presented in this publication but can be easily calculated through the available monthly CPI.

Note: More information about the concept, computation and use of the CPI is available online in the publication “Household Budget Survey”.
