

PRODUCER PRICE INDEX – MANUFACTURING (PPI-M)
(Base year 2013 = 100)

January 2020	December 2020	January 2021
110.8	116.5	116.8

The Producer Price Index for the manufacturing sector (PPI-M) registered an increase of 0.3 point or 0.3 % from December 2020 to January 2021. This increase was mainly due to higher prices of “Printing and reproduction of recorded media”, “Rubber and Plastic Products”, “Food products and beverages”, “Chemicals and chemical products”, “Basic metals” and “Fabricated metal products”, partly offset by a decrease in the prices of “Other transport equipment”.

Compared to January 2020, the PPI-M for January 2021 was higher by 6.0 points or 5.4 %.

It is to be noted that the above figures are provisional.

Revised figures are usually published on a quarterly basis at
