

PRODUCER PRICE INDEX – MANUFACTURING (PPI-M)
(Base year 2018 = 100)

October 2021	September 2022	October 2022
125.4	148.1	147.9

The Producer Price Index for the manufacturing sector (PPI-M) registered a decrease of 0.2 point or 0.1% from September 2022 to October 2022. This decrease was mainly due to lower prices of some “Food products and beverages”, “Furniture” and “Other transport equipment”, partly mitigated by higher prices of “Rubber and plastic products”, “Fabricated metal products”, and “Chemicals and chemical products”.

Compared to October 2021, the PPI-M for October 2022 was higher by 22.5 points or 17.9%.

It is to be noted that the above figures are provisional.

Revised figures are usually published on a quarterly basis at:
