The Producer Price Index for the manufacturing sector (PPI-M) registered a decrease of 0.2 point or 0.1% from August 2022 to September 2022. This decrease was mainly due to lower prices of “Fabricated metal products”, “Chemicals and chemical products” and “Basic metals”, partly mitigated by higher prices of “Food products and beverages”.

Compared to September 2021, the PPI-M for September 2022 was higher by 24.4 points or 19.7%.
