

**PRODUCER PRICE INDEX – MANUFACTURING (PPI-M)**  
*(Base year 2018 = 100)*

May 2024	April 2025	May 2025
154.6	162.2	163.4

The Producer Price Index for the manufacturing sector (PPI-M) registered an increase of 1.2 points or 0.7% from April 2025 to May 2025. This is explained by higher prices of “Food products and beverages”, “Wearing apparel”, “Other non-metallic mineral products”, “Other transport equipment”, “Printing and reproduction of recorded media” and, “Other manufacturing products” such as gold jewellery, partly offset by lower prices of “Machinery and equipment”.

Compared to May 2024, PPI-M for May 2025 was higher by 8.8 points or 5.7%.

It is to be noted that the above figures are provisional.

Revised figures are usually published on a quarterly basis at:
