

PRODUCER PRICE INDEX – MANUFACTURING (PPI-M)
(Base year 2018 = 100)

January 2025	December 2025	January 2026
159.9	169.6	170.8

The Producer Price Index for the manufacturing sector (PPI-M) registered an increase of 1.2 points or 0.7% from December 2025 to January 2026. This is mainly explained by higher prices of “Fabricated metal products”, “Printing and reproduction of recorded media” and, “Other manufacturing products” such as gold jewellery, partly offset by lower prices of “Motor vehicles, trailers and semi-trailers”.

Compared to January 2025, PPI-M for January 2026 was higher by 10.9 points or 6.8%.

It is to be noted that the above figures are provisional.

Revised figures are usually published on a quarterly basis at:
