The present "Tableau de Bord" or Dashboard offers snapshots of key performance indicators compiled by the Statistics Mauritius and other organizations whether local or foreign. Our objective in producing the Dashboard is to put useful information in the hands of policymakers, researchers, students and the general public.

The indicators that have been selected are those considered to be the most closely watched performance indicators available on trends in development and are grouped into tables according to main themes. They are meant to provide a comprehensive, up-to-date picture of the social and economic situation of the country. The Statistics

^a Provisional b Revised

¹ Mid-year population excluding Agalega & St. Brandon. Population estimates for years 2022 to 2024 has been revised based on 2022 Population Census. Population estimates for years 2012 to 2021 which are currently based on 2011 Population Census will be revised and updated in due course. Given that the base years for the two series are different, this will result in discontinuity of the figures.
