ANNUAL DIGEST OF STATISTICS 2007

FOREWORD

This is the twenty-third issue of the Annual Digest of Statistics. It presents in a concise and readily accessible form, important statistical information available on the demographic, economic and social characteristics of Mauritius. The topic "Climate" of Section 17 has been extended to include information on "Environment". Seven tables (Tables 17.4 to 17.10) are given for the first time in this issue.

All data in the digest are the latest available as at end of June 2008. Some of them are provisional and are therefore subject to revision in later issues. Figures in each issue of the digest supersede and replace those appearing in previous ones.

Where necessary, figures have been rounded off to the nearest digit, and hence in some tables there may be slight discrepancies between the sum of the constituent items and the total given.

It is hoped that the data presented will prove useful to a wide range of users, policy makers and planners as well as the general public.

Readers interested in more comprehensive data may wish to consult the different publications of this office on each subject.

Regular publications, including the Economic and Social Indicators, series as well as ad hoc reports issued by this office are uploaded on our website at the following address:
<http://statsmauritius.gov.mu>.

The co-operation and assistance given by public and private organisations in providing information for the preparation of this issue, are gratefully acknowledged.

Note: At the 1962 census each householder was asked for the first time, to state the population group to which each member of his household claimed to belong.

Prior to 1962, it is probable that from one census to another, different criteria have been used in classifying the population by population groups.
Figures are therefore not strictly comparable from one census to another, before 1962.

1 figures for 1991 - 1999 have been revised in the light of the 2000 Population Census data

Note: The increase in the number of civil marriages as from 1982 is due largely to improved registration of religious

marriages with the coming into force of a new Civil Status Act as from January 1982.

1 figures for 1991 - 1999 have been revised in the light of the 2000 Population Census data

2 because of the small number of vital events, the rates have been calculated by taking the average for three years in order to remove wide fluctuations in the yearly data.

3 deaths of children under 1 year of age per 1,000 live births

4 still births per 1,000 total births (live births and still births)

5 the number of persons civilly married in a year per 1,000 mid-year population

6 revised

7 based on vital events for the year 2007 only

Base: 2007 resident population estimated by adding the balance of births, deaths, and migration to the 2000 census population adjusted for underenumeration of young children.

Assumptions:

- (i) Fertility: The Total Fertility rate is 1.81 for the period 2002 - 2007 and reaches 1.82 in the period 2007 - 2012. It thereafter stabilizes to 1.86 as from 2012.
- (ii) Mortality: (a) The life expectancy at birth for males improves from 68.91 in the period 2002 - 2007 to 73.50 in the period 2022 - 2027 and then to 76.01 in the period 2042 - 2047.
 (b) The life expectancy at birth for females improves from 75.62 in the period 2002 - 2007 to 78.15 in the period 2022 - 2027 and then to 79.92 in the period 2042 - 2047.
- (iii) Migration: A net yearly outmigration of 300 males and 200 females during 2007 - 2012; 200 males and 150 females during 2012 - 2017; 100 males and 100 females during 2017 - 2022 and 50 males and 50 females in the period 2022 - 2027 and then none afterwards

¹ As from January 1994, data on passenger traffic are being compiled from all embarkation and disembarkation cards. Prior to this period, they were based on a 10% sample of such cards. They include:

- (a) emigrants to and immigrants from the dependencies; and
- (b) movement of military personnel as from the 1962 Population Census but excludes those transit passengers who did not leave the airport.

SECTION 4 – PUBLIC FINANCE

Government Finance Statistics

The data have been compiled according to the definitions and concepts as set down in the manual on "Government Finance Statistics (GFS) 1986" of the International Monetary Fund. Table 4.1 relates to Budgetary Central Government accounts. Tables 4.2 to 4.2.7 are consolidated accounts of Central Government consisting of Budgetary Central Government, Extra Budgetary Units and Social Security Schemes. Tables 4.3 to 4.3.3 are consolidated accounts of the General Government consisting of Consolidated Central Government, Regional Government and Local Government.

The General Government Sector

Government is defined as consisting of all units performing government functions: that is, the implementation of public policy through the provision of primarily non-market services and the transfer of income, supported mainly by compulsory levies.

The **General Government** sector is made up of (i) Central Government, (ii) Regional Government and (iii) Local Government.

(i) **Central Government** covers all units that are agencies of the country's central authority. It consists of Budgetary Central Government, Extra Budgetary Units and Social Security Schemes.

Budgetary Central Government includes all ministries and departments.

Extra Budgetary Units are agencies responsible for the performance of specialised governmental functions in such fields as health, education, social welfare, construction and so on, under the authority of Central Government. (e.g Mahatma Gandhi Institute, Mauritius Examinations Syndicate, Mauritius College of the Air, University of Mauritius, etc.)

Social Security Schemes are schemes imposed, controlled or financed by the public authorities for the purpose of providing social security benefits for the community. Included here is the National Pensions Scheme.

(ii) **Regional Government** consists of the administration of Rodrigues.

(iii) **Local Government** consists of municipalities and district councils/ village councils exercising an independent competence as government units.

SECTION 7 – NATIONAL ACCOUNTS AND QUARTERLY NATIONAL ACCOUNTS

1. Introduction.

National Accounts data are compiled according to the recommendations of the 1993 System of National Accounts (SNA93). Concepts and terminologies used are defined below.

Quarterly National Accounts (QNA) estimates starting from the first quarter of 1999 are now published by the Central Statistics Office. These quarterly estimates are compiled according to guidelines provided in the IMF manual entitled “Quarterly National Accounts Manual – Concepts, Data sources and Compilation”, which is itself based on the SNA 93.

Gross Domestic Product (GDP)

GDP is the aggregate money value of all goods and services produced within a country out of economic activity during a specified period usually a year, before provision for the consumption of fixed capital.

GDP at basic prices

GDP at basic prices is obtained as the difference between output and intermediate consumption whereby output is valued at basic prices and intermediate consumption at purchasers' prices.

The basic price is the amount receivable by the producer exclusive of taxes on products and inclusive of subsidies on products. The equivalent for imported products is the c.i.f. value, i.e. the value at the border of the importing country.

The purchasers' price is the amount payable by the purchaser exclusive of deductible taxes on products (e.g. deductible value added tax).

GDP at market prices

GDP at market prices is equal to the GDP at basic prices plus taxes (net of subsidies) on products.

Gross National Income (GNI)

GDP plus net primary income from abroad gives Gross National Income (GNI).

Gross National Disposable Income (GNDI)

Gross National Income (GNI) net of transfers from the rest of the world gives Gross National Disposable Income (GNDI).

Financial intermediation services indirectly measured (FISIM)

FISIM is obtained as the difference between interest received and interest paid by banks excluding those received on own funds. As it is difficult to allocate FISIM to the intermediate consumption of different industries, the total value of FISIM is imputed to a nominal industry with negative value added.

Gross Domestic Fixed Capital Formation (GDFCF)

GDFCF is the net additions to the physical assets of the country in a year. These consist mainly of investment in buildings, plants, machinery and transport equipment, all valued at market prices.

Change in inventories

Change in inventories includes the value of the physical change in inventories of raw materials, work in progress, and finished goods held by producers.

Consumption expenditure

Consumption expenditure is made up of final consumption expenditure of households and of government.

Government final consumption expenditure is further disaggregated into collective and individual consumption expenditure. **Collective expenditure** consists of the services which government provides to the community as a whole, for example, security and defence whereas **individual expenditure** is made up of expenses incurred in providing services which are mostly beneficial to individuals, mainly in respect of health and education.

Actual Government final consumption expenditure refers to expenditure incurred for the provision of collective services.

Actual final consumption expenditure covers goods and services supplied to households, irrespective of whether these goods and services are actually paid by government or households themselves. Consequently, it consists of expenditure incurred by households and government on the provision of individual services.

Gross National Saving

Gross National Disposable Income (GNDI) less total consumption gives Gross National Saving.

Exports and Imports of goods and services

Both exports and imports of goods are measured f.o.b. Insurance and freight, which represent the difference between the c.i.f and f.o.b values of imports of goods are recorded as imports of services.

Exports and imports of goods are compiled according to the General Trade System, using the national boundary as the statistical frontier. All goods entering the country are recorded in imports and goods leaving the country in exports.

2. Status of figures

2.1 National Accounts

National Accounts estimates are as at March 2007. Data for years 2004 to 2006 are "Revised" whilst those of year 2007 are "Forecast".

The Main assumptions used in estimating 2007 figures are:

<u>Sector</u>	<u>Main assumption</u>	<u>Growth rate</u>
Sugarcane and "sugar milling"	Sugar production of 500,000 tonnes	-1.0%

SECTION 10 - LABOUR STATISTICS

- (a) Prior to 2004, estimates of labour force, employment and unemployment that were published, were based on the latest Population Census or Labour Force Sample Survey, updated with data from surveys of establishments and information from various administrative sources. The estimates refer to population aged 12 years and over.
- (b) As from 2004, the Continuous Multi Purpose Household Survey (CMPHS) is being used to measure labour force, employment and unemployment. This follows the recommendations of a Technical Committee set up to analyse the findings of a World Bank study on unemployment in Mauritius. The Committee also recommended that the lower age cut-off point for the labour force should be 15 years.
- (c) However in December 2006, the government amended the Labour Act to raise the minimum employment age from 15 to 16, eliminating the inconsistency with the compulsory educational requirement through 16 years of age. To be in line with the amended Labour Act, labour force estimates are based on population aged 16 years and above and to obtain a comparable series, figures prior to 2007 have been revised to reflect this change. These estimates are presented in Table 10.1.
2. Tables 10.2 to 10.8 show figures of employment and earnings derived from the **March Survey of Employment and Earnings**. The figures relate to **large establishments** only, defined as:
- (a) Agricultural establishments comprising:
- (i) Sugar plantations of 10 hectares or more,
 - (ii) Tea plantations of 2 hectares or more,
 - (iii) All 'flue-cured' tobacco establishments, irrespective of acreage,
 - (iv) Other agricultural establishments employing at least 10 persons on the day of the survey.
- (b) Non-agricultural establishments employing at least 10 persons on the day of the survey. It is to be noted that 'outworkers', i.e. piece-rate workers who, although employed by an establishment, are working in their homes on materials provided by the establishment are excluded.
3. (a) Classification used is according to the National Standard Industrial Classification, which is an adaptation of the International Standard Industrial Classification Rev. 3 (ISIC Rev. 3) of 1990.
- (b) Establishments previously lumped under 'Central Government' are now allocated to their relevant industry groups according to their activities.

4. It is to be noted that apart from increases in salaries and wages, fluctuations in earnings (tables 10.4 to 10.8) may be due to:
 - (a) changes of different magnitude in the various categories of employees e.g. a large intake of employees at the lower end of the wage scale (as occurs when a new factory starts operation) has the effect of lowering the average earnings. On the other hand, a large intake of professionals by, say, an architectural firm can cause a sudden increase in the average monthly earnings.
 - (b) changes in overtime, regular allowances, bonuses and commissions.
5. Tables 10.9 - 10.12 show figures of wages/salaries and earnings by occupation. The figures shown in table 10.10 have been derived from the Quarterly Survey of Employment, Earnings and Hours of work carried out among a sample of **large establishments**. Large fluctuations noted in certain occupations are mainly due to changes in allowances and overtime.

¹ Black River Gorges National Park was proclaimed in 1994 and data on the area enclosed by the boundaries of the park were not available until 1997.

² Islet National Park was proclaimed in 1994.

³ Bras D'Eau & Poste La Fayette Reserves were proclaimed in 2002 and data of the area is included as from the year 2004.

⁴ Includes Plantations, forest lands, scrub and grazing lands. Forest area was decreasing gradually. New estimates in private lands worked out in 2004.
