ANNUAL DIGEST OF STATISTICS 2014

FOREWORD

This is the thirtieth issue of the Annual Digest of Statistics. It presents in a concise and readily accessible form, important statistical information available on the demographic, economic and social characteristics of Mauritius.

All data in the digest are the latest available as at end of June 2015. Some of them are provisional and are therefore subject to revision in later issues. Figures in each issue of the digest supersede and replace those appearing in previous ones.

Where necessary, figures have been rounded off to the nearest digit, and hence in some tables there may be slight discrepancies between the sum of the constituent items and the total given.

It is hoped that the data presented will prove useful to a wide range of users, policy makers and planners as well as the general public.

Readers interested in more comprehensive data may wish to consult the different publications of this office on each subject.

Regular publications, including the Economic and Social Indicators, series as well as ad hoc reports issued by this office are uploaded on our website at the following address: <http://statsmauritius@govmu.org>

The co-operation and assistance given by public and private organisations in providing information for the preparation of this issue, are gratefully acknowledged.

Note: At the 1962 census each householder was asked for the first time, to state the population group to which each member of his household claimed to belong.

Prior to 1962, it is probable that from one census to another, different criteria have been used in classifying the population by population groups.

Figures are therefore not strictly comparable from one census to another, before 1962.

SECTION 4 - PUBLIC FINANCE

Tables on Government Finance Statistics published in this report have been compiled according to the Government Finance Statistics Manual 2001(GFSM 2001) of the International Monetary Fund (IMF). The tables relate to Budgetary Central Government comprising all ministries and their departments. They differ slightly from the annual data published in the Digest of Public Finance Statistics as certain adjustments as described below are not carried out:

- (i) The amount transferred from the Budgetary Central Government to the Civil Service Family Protection Scheme (CSFPS) is not rerouted
- (ii) The amount of employee contributions under new pension scheme is not imputed in both revenue and expense.

Additional tables on General Government comprising of Consolidated Central Government (Budgetary Central Government, Extra Budgetary Units and the National Pensions Fund), Local Government and Rodrigues Regional Assembly are available in The Digest of Public Finance Statistics.

Budgetary Central Government Expense and Acquisition of Non Financial Assets includes all expenditure incurred (recurrent and capital) by ministries and their departments to provide goods and services to the community.

The economic classification (Table 4.3) identifies the different types of expenditure incurred, that is, wages and salaries, use of goods and services, social benefits, grants, etc., to provide the goods and services to the community. The classification by function (Table 4.4) shows total expenditure (recurrent and capital expenditure) incurred in different areas: health, education, social protection, etc.

Hence, GIR excludes the Bank's foreign equity participation in international organisations as this does not meet the criteria of readily available reserves.

SECTION 7 – NATIONAL ACCOUNTS AND QUARTERLY NATIONAL ACCOUNTS

1. Introduction.

National Accounts data are compiled according to the recommendations of the 1993 System of National Accounts (SNA93). Concepts and terminologies used are defined below.

Quarterly National Accounts (QNA) estimates starting from the first quarter of 1999 are published by Statistics Mauritius. These quarterly estimates are compiled according to guidelines provided in the IMF manual entitled “Quarterly National Accounts Manual – Concepts, Data sources and Compilation”, which is itself based on the SNA 93.

Gross Domestic Product (GDP)

GDP is the aggregate money value of all goods and services produced within a country out of economic activity during a specified period usually a year, before provision for the consumption of fixed capital.

Gross Domestic Product/Gross Value Added (GVA) at basic prices

GDP/GVA at basic prices is obtained as the difference between output and intermediate consumption whereby output is valued at basic prices and intermediate consumption at purchasers' prices.

The basic price is the amount receivable by the producer exclusive of taxes on products and inclusive of subsidies on products. The equivalent for imported products is the c.i.f. value, i.e. the value at the border of the importing country.

The purchasers' price is the amount payable by the purchaser exclusive of deductible taxes on products (e.g. deductible value added tax).

GDP at market prices

GDP at market prices is equal to the GDP at basic prices plus taxes (net of subsidies) on products.

Gross National Income (GNI)

GDP added to net primary income from abroad gives Gross National Income (GNI).

Gross National Disposable Income (GNDI)

Gross National Income (GNI) net of transfers from the rest of the world gives Gross National Disposable Income (GNDI).

Financial Intermediation Services Indirectly Measured (FISIM)

FISIM is obtained as the difference between interest received and interest paid by banks excluding those received on own funds. The total amount of FISIM was previously recorded as the intermediate consumption of a nominal industry. As recommended by the 1993 SNA, it is now allocated to users as follows: intermediate consumption of businesses, final consumption of households and government, and a component of exports of services.

Gross Domestic Fixed Capital Formation (GDFCF)

GDFCF is the net additions to the physical assets of the country in a year. These consist mainly of investment in buildings, plants, machinery and transport equipment, all valued at market prices.

Change in inventories

Change in inventories includes the value of the physical change in inventories of raw materials, work in progress, and finished goods held by producers

Consumption expenditure

Consumption expenditure is made up of final consumption expenditure of households and of government.

Government final consumption expenditure is further disaggregated into collective and individual consumption expenditure. **Collective** expenditure consists of the services which government provides to the community as a whole, for example, security and defence whereas **individual** expenditure is made up of expenses incurred in providing services which are mostly beneficial to individuals, mainly in respect of health and education.

Gross National Saving

Gross National Disposable Income (GNDI) less total consumption gives Gross National Saving.

Exports and Imports of goods and services

Both exports and imports of goods are measured f.o.b. Insurance and freight, which represent the difference between the c.i.f and f.o.b values of imports of goods are recorded as imports of services.

Exports and imports of goods are compiled according to the General Trade System, using the national boundary as the statistical frontier. All goods entering the country are recorded in imports and goods leaving the country in exports.

SECTION 10 - LABOUR STATISTICS

- 1 (a) Prior to 2004, estimates of labour force, employment and unemployment that were published, were based on the latest Population Census or Labour Force Sample Survey, updated with data from surveys of establishments and information from various administrative sources. The estimates refer to population aged 12 years and over.
 - (b) As from 2004, the Continuous Multi Purpose Household Survey (CMPHS) is being used to measure labour force, employment and unemployment. This follows the recommendations of a Technical Committee set up to analyse the findings of a World Bank study on unemployment in Mauritius. With the amendment to the Labour Act in December 2007, whereby the minimum legal working age has been raised from 15 to 16 years, and the subsequent recommendation of ILO to be in line with the Act, the lower age cut-off point for the labour force is 16 years as from 2007.
2. Tables 10.2 to 10.8 show figures of employment and earnings derived from the **March** Survey of Employment and Earnings. The figures relate to **large establishments** only, defined as:
 - (a) Agricultural establishments comprising:
 - (i) Sugar plantations of 10 hectares or more,
 - (ii) Tea plantations of 2 hectares or more,
 - (iii) All 'flue-cured' tobacco establishments, irrespective of acreage,
 - (iv) Other agricultural establishments employing at least 10 persons during the reference period.
 - (b) Non-agricultural establishments employing at least 10 persons during the reference month. It is to be noted that 'outworkers', i.e. piece-rate workers who, although employed by an establishment, are working in their homes on materials provided by the establishment are excluded.
3. (a) Classification used is according to the National Standard Industrial Classification of Economic Activities (NSIC), Rev. 2, an adapted version of the International Industrial Classification of Economic Activities (ISIC), Rev 4 of the United Nations.
 - (b) Establishments previously lumped under 'Central Government' are now allocated to their relevant industry groups according to their activities.

4. It is to be noted that apart from increases in salaries and wages, fluctuations in earnings (tables 10.4 to 10.8) may be due to:
 - (a) changes of different magnitude in the various categories of employees e.g. a large intake of employees at the lower end of the wage scale (as occurs when a new factory starts operation) has the effect of lowering the average earnings. On the other hand, a large intake of professionals by, say, an architectural firm can cause a sudden increase in the average monthly earnings.
 - (b) changes in overtime, regular allowances, bonuses and commissions.
5. Tables 10.9 - 10.12 show figures of wages/salaries and earnings by occupation. The figures shown in table 10.10 have been derived from the Quarterly Survey of Employment, Earnings and Hours of work carried out among a sample of **large establishments**. Large fluctuations noted in certain occupations are mainly due to changes in allowances and overtime.
