ANNUAL DIGEST OF STATISTICS

1 9 8 6

This is the third time that the Digest of Statistics has appeared on an annual basis. It is designed to present in a concise and readily accessible form the more important statistical series available on the demographic, economic and social characteristics of Mauritius.

All figures in the digest are the latest available as at end of July 1987. Some of the figures are therefore provisional and subject to revision in later issues. Figures in each issue of the digest supersede and replace those appearing in previous ones.

Where necessary, figures have been rounded off to the nearest final digit, and in some tables there may be discrepancies between the sum of the constituent items and to the total as shown.

The assistance given by all public and private organisations in providing data for publication in this issue is gratefully acknowledged.

Table 1.4 (a) - Population enumerated at each census by population group and sex - Island of Mauritius, 1846 - 1952

Year of census	General population			Indo-Mauritian population			Chinese population			At the 1962 census each householder was asked, for the first time, to state the population group to which each member of his household claimed to belong.  Prior to 1962, it is probable that, from one census to another, different criteria have been used in classifying the population by population groups. Figures are therefore not strictly comparable from one census to another, before 1962.

SECTION 2 - INTERNATIONAL TRAVEL AND TOURISM

As from January 1979, owing to the increase in the volume of passenger traffic, it has been decided to process the data on a 10% sample. Cases where the number of passengers are too small have been omitted in order to avoid large sampling errors. It is to be noted, however, that figures for official emigrants published in this report have been compiled from the Passport Office register.

SECTION 4 - PUBLIC FINANCE AND BANKING

1. Tables 4.1 to 4.9 on budgetary central government have been compiled according to "A Manual on Government Finance Statistics" published by the International Monetary Fund.

Budgetary central government covers the accounts of the Governor-General's Office, the Legislative Assembly, the Judiciary as well as the various ministries and departments, except the following which are counted as non-financial public enterprises, though their accounts are included in the government budget:- Civil Aviation Department, Posts and Telegraphs Department and the Telecommunications Department.

It is to be noted that expenditure on Rodrigues is also included in the tables.

2. The figures in tables 4.10 and 4.11 are provisional and subject to amendment as the Income Tax Act 1974 empowers the Commissioner of Income Tax to revise cases under objection, to issue additional claims for the four years preceding the present year of assessment and to claim back duty at any time in cases of false or incorrect returns of income for any previous year.

Section 8 - EMPLOYMENT AND EARNINGS

1. The figures of employment and earnings in tables 8.1 - 8.3 apply to large establishments only. These being defined as:
  - (a) Agricultural establishments comprising :
    - (i) Sugar cane plantations where 25 arpents or more were harvested ;
    - (ii) Tea plantations of 5 arpents or more were harvested;
    - (iii) All 'flue-cured' tobacco establishments, irrespective of acreage;
    - (iv) Other agricultural establishments employing at least 10 persons on the day of the survey;
  - (b) Non-agricultural establishments comprising :
    - (i) All Central and Local government departments;
    - (ii) Those employing at least 10 persons on the day of the survey. It is to be noted that 'outdoor' workers are excluded; these are piece workers who although employed by an establishment are working in their own homes.
2. (a) Tables 8.5 - 8.8 show changes in average earnings for broad sectors. Tables 8.9 - 8.13 show changes in wage or salary rates for specific occupations.
  - (b) Apart from increase in salaries and wages, fluctuations in earnings may be due to:
    - (i) changes of different magnitude in the various categories of the employees e.g. a large intake of employees at the lower end of the wage scale (as occurs when a new factory starts operation) has the effect of lowering the average earnings. On the other hand, a large intake of professionals by, say, an architectural firm can cause a sudden jump in the average monthly earnings.
    - (ii) changes in overtime, regular bonuses and commissions.
