Business Activity Statistics – Financial Year 1999/2000

Foreword

This is the third issue of a regular publication of the Central Statistics Office on business activity statistics.

Data refer to business activities undertaken in the Island of Mauritius, which are either licensed with the Local Authorities (Municipalities and District Councils) or registered with an organisation.

A new set of data has been collected as at June 2000 and used for computing the Business Activity Statistics in this present issue. All figures are provisional and are subject to revision in later issues.

The business activities have been coded according to the system of National Standard Industrial Classification of Economic Activities (NSIC) given in Annex I.

It is hoped that this report will be of valuable help to the public in general and to planners and policy makers in particular.

The co-operation and assistance of the Local Authorities and other organisations are gratefully acknowledged.

Business Activity Statistics, Financial Year 1999/2000

Introduction

Business Activity Statistics refers to all activities, the conduct of which requires that the operator either obtains a licence from the Local Authorities (Municipalities and District Councils) or a registration with a government department or authority. Excluded therefore are all illegal activities carried out without a licence or registration.

It is to be noted that statistics in the previous issues were based on data collected as at June 1995. For this present issue, Business Activity Statistics was compiled according to a new set of data collected as at June 2000. Consequently figures for 1997, 1998 and 1999 have been revised accordingly as shown in Table 1.1 and Table 2.1.

It must also be pointed out that the statistics on business activity refer to the total number of activities and not to the total number of operation units or establishments. An analysis of the data on licences and registrations as well as new issues and cancellations, provides useful information on trends in business activities.

A new feature in the present issue is that data are published by geographical districts instead of Municipal or District Council areas as in previous reports. Another new element worth noting herein is that professionals (such as Medical Practitioners, Engineers, etc.) engaged in their respective fields have been accounted in toto as per list provided by the association concerned. In the past, published figures were related to those engaged in private sector only.

2. Concepts

An operator is required to obtain a licence from the Local Authorities for each type of activity carried out at a single location. For example, a general retailer may hold three licences: one for trading in foodstuffs, a second for sale of tobacco and a third for sale of liquor. This operator will therefore be assigned three activities.

In some cases, an operator has obtained a licence from the Local Authority and is also registered with a particular organisation, for example, EPZ and ESZ operators. In order to avoid double counting, such activities have been excluded from licences and included in registrations only. Licence statistics as obtained from the local authorities are given in Tables 1.2 to 1.9. The adjusted licence and registration data are given in Tables 2.2 to 5.8.

3. Data sources

The main data sources for the compilation of business activity statistics are:

- Municipalities and District Councils – Delivery of business licences
- Ministry of Commerce and Industry - Issue of Export Certificates to Enterprises (EPZ, ESZ)
- National Transport Authority - Issue of public transport licences
- Ministry of Education - Registration of pre-primary and other private schools
- Ministry of Social Security - Registration of employers
- Medical/Bar Council – Registration of medical practitioners and lawyers
- Mauritius Freeport Authority – Registration of companies operating in the Freeport
- Mauritius Offshore Business Activities Authority – Registration of Offshore companies

4. Classification and presentation of data

Each activity has been assigned an activity code according to the National Standard Industrial Classification of Economic Activities, NSIC, which is an adaptation to the local context of the International Standard Industrial Classification (ISIC), Revision 3, 1990.

The International Standard Industrial Classification (ISIC) of all economic activities is a classification of productive economic activities according to kind of economic activity on the basis of the principal category of goods produced or services rendered. The objective of such a classification scheme is to group data in respect of the economy according to types of activities, the characteristics of which are similar.

5. Analysis of data

5.1 Number of licences delivered, July 1999 to June 2000

Between July 1999 and June 2000, 4,398 new licences were issued by the Local Authorities: 2,831 for 'Wholesale & Retail Trade', 327 for 'Other services', 321 for 'Transport, storage & communications' 321 for 'Hotels & restaurants' and 233 for 'Manufacturing'. With 1,551 licences were cancelled during the same period, the net addition works out to 2,847.

The total number of licences as at June 2000 stood at 60,361 which represents an increase of 5.0% over June 1999 (57,514).

5.2 Business activities, July 1999 to June 2000

The number of business activities as at June 2000 totalled 74,598. This shows a net increase of 1.7 % (1,258) as compared to June 1999 when the number of business activities stood at 73,340.

The composition of business activities by type of activity shows that 55% (41,006) is found in Wholesale & retail trade, followed by 18.3% (13,678) in Transport, storage & communication. The remaining 26.7% are in Hotels & restaurants (5,386), 'Manufacturing' (4,593), 'Real estate, renting & business activities (3,814) and 'Other services' (2,288).

5.3 Distribution by region

It is observed that 49.6% (37,001) business activity licences or registrations were issued to operate in the urban region, out of which 58.1% (21,482) are found in the district of Plaines Wilhems and the remaining 41.9% (15,519) in Port-Louis district. The rural districts accounted for 51.4% (37,597) of business activities. The highest shares among the rural districts go to Pamplemousses 24.9% (9,290) and Flacq 21.5% (8,089).
