DIGEST OF DEMOGRAPHIC STATISTICS - 1988

F O R E W O R D

This is the fourth issue of a regular publication of the Central Statistical Office on Demographic Statistics.

This Digest contains a larger collection of demographic data and in more details than those currently available in the Annual Digest of Statistics. Thus, apart from the statistics of total population, live births, still births, deaths and marriages, additional sections have been included in this report on divorce statistics, estimates of the Mauritian population and projections of the Mauritian population. Furthermore a set of life tables are given for both the islands of Mauritius and Rodrigues.

It is hoped that the data assembled in this report will be of valuable help to the public in general and to planners and policy makers in particular.

Most of the data required for the preparation of this report were obtained from the Civil Status Division, except for Divorce Statistics which were supplied by the Judicial Department. The assistance and cooperation of these departments are gratefully acknowledged.

D. Zmanay

Introductory notes	(i) - (iii)
 <u>SECTION 1 - TOTAL (MAURITIAN AND NON-MAURITIAN) POPULATION</u>	
Table 1.1 - Estimated total (Mauritian and non-Mauritian) population of Mauritius as at 31st December 1988	1
1.2 - Evolution of the population of the Island of Mauritius since the 1983 census	1
1.3 - Population increase in intercensal periods - Island of Mauritius, 1846 - 1983	2
1.4(a) - Population enumerated at each census by population group and sex - Island of Mauritius, 1846 - 1952	3
1.4(b) - Population enumerated at each census by community and sex - Island of Mauritius, 1962 - 1983	4
1.5 - Rate of increase of the total (Mauritian and non-Mauritian) population of Mauritius compared with other countries, 1980 - 1986	4
1.6 - Evolution of total (Mauritian and non-Mauritian) population by geographical district and sex between the 1972 and 1983 censuses	5
1.7 - Estimated total (Mauritian and non-Mauritian) population of Mauritius by geographical district and sex, 1986 - 1988 (Mid-year estimates)	6
1.8 - Estimated total (Mauritian and non-Mauritian) population of Mauritius by geographical district and sex, 1986 - 1988 (End-of-year estimates)	7
1.9 - Evolution of total (Mauritian and non-Mauritian) population by urban/rural residence and sex between the 1972 and 1983 censuses, Island of Mauritius	8
1.10 - Estimated total (Mauritian and non-Mauritian) population by urban/rural residence and sex - Island of Mauritius, 1986 - 1988 (Mid-year estimates)	9
1.11 - Estimated total (Mauritian and non-Mauritian) population by urban/rural residence and sex - Island of Mauritius, 1986 - 1988 (End-of-year estimates)	10
1.12 - Estimated total (Mauritian and non-Mauritian) population by Municipal Council Area (MCA), Village Council Area (VCA) and locality - Island of Mauritius, 1986 - 1987	11

Table 1.13	- Age distribution of the population as enumerated at the 1972 and 1983 censuses, Island of Mauritius	18
1.14	- Estimated total (Mauritian and non-Mauritian) population by age group and sex - Island of Mauritius, 1987 - 1988 (Mid-year estimates)	19
1.15	- Distribution of total (Mauritian and non-Mauritian) population by selected age groups - Island of Mauritius, 1987 - 1988 (Mid-year estimates)	20
1.16	- Growth of the total (Mauritian and non-Mauritian) population, natural increase and net-migration - Island of Mauritius, 1975 - 1988	21

SECTION 2 - VITAL STATISTICS

Table 2.1	- Population and vital statistics - Island of Mauritius, 1901 - 1988	22
2.2	- Population and vital statistics rates - Island of Mauritius, 1901 - 1988	23
2.3	- Registered vital statistics by sex - Island of Mauritius, 1969 - 1988	24

SECTION 3 - LIVE BIRTHS

Table 3.1	- Live births by month of registration - Island of Mauritius, 1979 - 1988	25
3.2	- Live births registered by geographical district - Island of Mauritius, 1979 - 1988	26
3.3	- Crude birth rate by geographical district - Island of Mauritius, 1979 - 1988	27
3.4	- Live births registered by Municipal Council Area - Island of Mauritius, 1979 - 1988	28
3.5	- Live births by month of occurrence - Island of Mauritius, 1979 - 1988	29
3.6	- Live births occurred by duration of union - Island of Mauritius, 1979 - 1988	30
3.7	- Live births occurred by interval since previous live birth and live birth order - Island of Mauritius, 1987 - 1988	31

INTRODUCTORY NOTESSection 1 - Total population

In this report, two different population concepts have been used, namely that of 'Total' population and that of 'Mauritian' population. The figures of total population include Mauritians and non-Mauritians and are presented in Section 1 while the figures for the Mauritian population are presented in Section 8.

Although the difference between the 'total' and 'Mauritian' population at the latest census was only about 5,000, the need for publishing data separately for the Mauritian population was seen when evaluation of the census data was carried out.

It was found that when the sex of passengers entering or leaving the country, was not clearly stated on the embarkation or disembarkation card, it was difficult to deduce this information merely from the name of the passenger, especially in the case of many non-Mauritians. This affected to a certain degree, the accuracy and the reliability of the sex distribution of the estimated total population. Since the main interest lies in the Mauritian population, which did not seem to be much affected by the above problem, it was found desirable to present an additional series of estimates for the Mauritian population separately. However, all demographic rates will continue to be based on the total population.

As usual, the population estimates for any given year are obtained by using the most recent census as base, adding the excess of births over deaths and allowing for international arrivals and departures.

Section 2 - Vital Statistics

The statistics of births, deaths and marriages have been compiled from raw data supplied by the Civil Status Division, Prime Minister's Office while statistics of divorce have been obtained from the Office of the Master and Registrar, Supreme Court.

The Vital Registration Forms for the recording of live births, still births, deaths and marriages occurring in Mauritius are shown at the end of this report.

Section 3 - Live births

Formerly, the birth statistics published in the Annual Digest of Statistics for any year related only to births which were registered in that year. Although, not all births occurring in a year are registered within that year because a delay of 45 days is allowed for registration, the differences between birth statistics tabulated by year of registration and year of occurrence are not expected to be large. In this report, and as recommended by the United Nations, an additional series of tabulations which present birth statistics according to year of occurrence, have been included.

All fertility and reproduction rates, whether in previous reports or the present one, are based on births occurred during the year. The only exception is the crude birth rate which is based on total births registered during the year.

Section 4 - Still births

The tables included in this report are more detailed than those appearing in the Annual Digest of Statistics.

Data on still births are compiled only according to date of registration. Since still births, like deaths, are normally registered within 24 hours of occurrence, there is not much difference between the data tabulated by date of registration and those tabulated by date of occurrence.

Section 5 - Deaths

The death statistics for any year are based on events registered during that year. Among the main tables included in this section are the life tables for the years 1972, 1983 and 1985, and two tables showing deaths due to selected causes, one for the whole population and the other one for children aged under one year.

Section 6 - Marriages

Prior to 1982, the statistics of marriages for any given year comprised civil marriages and marriages celebrated by legally authorised religious persons.

With the introduction of the Civil Status Act of 1981 which came into operation on 1st January 1982, there has been a slight disruption in the series of marriage statistics. Since the commencement of the new Act, the figures for marriages for any year include:-

- (a) Civil marriages;
- (b) Religious marriages having effect as civil marriages;
- (c) Muslim religious marriages; and
- (d) 'Past Religious Marriages' celebrated before 1982 (either in Mauritius or abroad) but registered during the year.

Section 7 - Divorces

The number of divorces for any year relate to provisional decrees of divorce which are granted when the Court is satisfied that the petitioner has established his case. Three months after a provisional decree is made, any of the two parties may apply to the Court for the provisional decree to be made permanent.

Section 8 - Mauritian population

Refer to the notes of Section 1 in order to differentiate between the concepts of 'total' population and that of 'Mauritian' population.

Section 9 - Projection of the Mauritian population

Three series of projections, each one covering a different set of assumptions, are presented in this section. Of the three series, it is thought that the projections given under Variant I are the most likely to hold. Therefore, only the demographic implications of this Variant have been presented (Tables 9.4 and 9.5). Variant II is the same as Variant I except that no allowance is made for migration whereas Variant III assumes fertility to remain constant at the 1987 level.

Section 10 - Rodrigues

The population figures presented in this section relate to the total population of the island. Thus, unlike the data for the island of Mauritius, only one population concept enters into the tables.

For the Island of Rodrigues, it is not possible to have estimates of 'total' and 'Mauritian' population separately because of the non-availability of the necessary data. The existing data collection system does not permit a distinction between Mauritians and non-Mauritians among the passengers entering and leaving the Island of Rodrigues.

In any case, the difference between population figures using either the concept of 'total' or 'Mauritian' would not be large. For instance, the latest census conducted in the island of Rodrigues on 2nd July 1983 returned a total population of 33,082, out of whom there were only 23 non-Mauritians.

Symbols

The following symbols are used throughout:

- Nil or negligible
- ... Not available

Rest of district	1,798	1,823

1/ Note : (i) Estimates are based on the 1983 census population.
(ii) No account has been taken of internal migration in computing these estimates.
(iii) Estimates of population at the district level and for Municipal Council Areas have been updated by allowing for births, deaths and net external migration. However, in the case of localities and Village Council Areas, the estimates have been obtained by assuming a rate of increase of population of the same order as for the geographical district of which they form part.

2/ Excluding that part of Palma VCA which is in Black River district but within the boundaries of the Municipality of Quatre Bornes.

Table 1.13 - Age distribution of the population 1/ as enumerated at the censuses of 1972 and 1983. 2/ Island of Mauritius

Both sexes		994,597		1,023,445		1,047,834		1,089,438		1,126,816

Base population: Estimated 1987 Mauritian population by age and sex, derived by adding the balance of births, deaths and migration to the 1983 census population.

Assumptions: (i) Fertility: G.R.R. declines from 0.937 in 1986 to 0.350 in 1995 and remains constant thereafter

(ii) Mortality: For both sexes under 30, mortality improves from level 22 to 24 in 2000 A.D. Adult male mortality reaches level 20 whilst that for female reaches level 21 in 2000 A.D.

(iii) Migration: Net yearly out-migration of 1,800 males and 2,100 females during the period 1987-1997 and none afterwards.

The estimates by single year of age have been obtained by appropriate splitting of the projected population by five year age groups. Although the figures are given to the last digit, it is recommended that, because of the limitations on their reliability, they be rounded to the nearest hundred before use.

20 - 24	52,746	44,247	43,241	53,570

The estimates by single year of age have been obtained by appropriate splitting of the projected population by five year age groups.

Although the figures are given to the last digit, it is recommended that, because of the limitations on their reliability, they be rounded to the nearest hundred before use.

SECTION 10 - RODRIGUES

The population figures presented in this section relate to the 'total' population of the Island of Rodrigues. Unlike the case for the Island of Mauritius, separate tabulations for the "Mauritian" population are not presented here. This does not seem necessary since only 23 non-Mauritians were enumerated in Rodrigues at the 1983 Census.

Table 10.1 - Evolution of the population of the Island of Rodrigues since the 1983 Census

	Both sexes	Male	Female
Population enumerated at 1983 Census	33,082	16,552	16,530
Live births July 1983 - Dec. 1988	+ 5,271	+ 2,647	+ 2,624
Deaths July 1983 - Dec. 1988	- 1,086	- 595	- 491
Arrivals July 1983 - Dec. 1988	+43,723	+27,881	+15,842
Departures July 1983 - Dec. 1988	-44,525	-27,811	-16,714
Estimated population as at 31st December 1988	36,465	18,674	17,791

Table 10.2 - Population increase in intercensal periods - Island of Rodrigues,
1851 - 1983

Census date	Population enumerated at census			Density per sq. km.	Intercensal increase	Average annual rate of increase %
	Both sexes	Male	Female

G L O S S A R Y

Population

De facto population : a population enumerated on the basis of those present at a particular time, including temporary visitors and excluding residents temporarily absent.

De jure population : a population enumerated on the basis of normal residence excluding temporary visitors and including residents temporarily absent.

Natural Increase : the excess of births over deaths.

Rate of Natural Increase : the difference between the births and deaths occurring during a year per 1,000 mid-year population. This rate is the difference between the "crude birth rate" and the "crude death rate".

Age structure

Dependency ratio : the ratio of the combined child population (under 15 years) and aged population (65 years and over) to the population of intermediate age (15 - 64 years).

Median age : the age which divides the population into two equal-size groups, one of which is younger and the other of which is older than the median.

Fertility

Crude birth rate : the number of live births in a year per 1,000 mid-year population.

Age specific fertility rate : the number of live births to women of a specified age-group per 1,000 women in that age-group.

General fertility rate : the number of live births occurring in a year per 1,000 women aged (15 - 49) years at mid-year.

Total fertility rate : the average number of children born to an average woman assuming that she survives to the end of her child-bearing age and is subjected to a fixed schedule of age-specific fertility rates.

Gross reproduction rate : the average number of daughters born to an average woman assuming that she survives to the end of her child-bearing age and is subjected to a fixed schedule of age-specific fertility rates.

Net reproduction rate : the extent to which an average woman will replace herself, assuming a fixed schedule of age-specific mortality and fertility rates to prevail through her reproductive span of life.

Live birth order : the ordinal number of a given live birth in relation to all previous live births of the same woman.

Mortality

Crude death rate : the number of deaths in a year per 1,000 mid-year population.

Age specific death rate : the number of deaths of a specified age-group occurring in a year per 1,000 mid-year population in that age-group.

Infant death : death of an infant aged under one year.

Infant mortality rate : the number of infant deaths in a year per 1,000 live-births during the year.

Still birth : a child born after the twenty-eighth week of pregnancy and not breathing or showing any signs of life at any time after being completely expelled from the mother.

Still birth rate : the number of still births in a year per 1,000 total births (live births and still births) during the year.

Early neonatal mortality rate : the number of deaths of infants under 7 days of age in a year per 1,000 live births during the year.

Late neonatal mortality rate : the number of deaths of infants aged between 7 and 28 days in a year per 1,000 live births during a year.

Neonatal mortality rate : the number of deaths of infants aged less than 28 days in a year per 1,000 live births during the year.

Post neonatal mortality rate : the number of deaths in a year of infants aged between 28 days and under one year, per 1,000 live births during the year.

Expectation of life at birth (e_0) : the average number of years that a new born child would be expected to live if subjected to the mortality conditions expressed by a particular set of age-specific deaths rates.

Marriage

Marriage rate : the number of persons married in a year per 1,000 mid-year population.

International Migration

Net migration : because of the absence of reliable data on immigrants and emigrants, the net migration is taken as the difference between total international arrivals and departures.

Net migration rate : the net migration in a year per 1,000 mid-year population.
