Digest of Road Transport and Road Accident Statistics – 2006

FOREWORD

This is the twenty second issue of the Digest of Road Transport and Road Accident Statistics published by the Central Statistics Office.

It presents statistics on road transport and road traffic accidents relating to the Island of Mauritius. Data on vehicles have been compiled from the register of the National Transport Authority (NTA) and those on road traffic accidents from returns provided by police stations and insurance companies. It is to be noted that, as from August 2004, most non-injury road traffic accidents are not reported to the police, but to insurance companies which provide aggregated data on such accidents. Thus detailed information on non-injury accidents are not available.

The figures published are the latest available. Some of them are provisional and are therefore subject to revision in later issues. Figures in this issue of the digest supersede those appearing in previous ones.

It is hoped that the data presented in this report will be of valuable help to planners, policy-makers and the public in general.

This digest has been prepared with the collaboration of the National Transport Authority, the Traffic Management and Road Safety Unit of the Ministry of Public Infrastructure, Land Transport and Shipping, the Police Department and insurance companies. Their assistance is gratefully acknowledged.

Appendix - Police form (P.f 178)

Vehicle Statistics¹

Definitions

Definitions as stipulated in Section 4 of Road Traffic Act of 1962 for types of vehicles

Motor cars

Motor cars are mechanically propelled vehicles, other than vehicles classified as motor cycles, which are constructed themselves to carry a load or passengers and whose unladen weight –

- (i) in case of vehicles which are –
 - (A) constructed solely for the carriage of passengers and their effects;
 - (B) adapted to carry not more than 7 passengers exclusive of the driver; and
 - (C) fitted with tyres of the prescribed type, does not exceed 3 tons;
- (ii) in any other case does not exceed 3 tons.

Heavy motor cars

Heavy motor cars are mechanically propelled vehicles, other than vehicles classified as motor cars, which are constructed themselves to carry a load or passengers and whose unladen weight exceeds 2½ tons.

Dual purpose vehicles

Dual purpose vehicles are vehicles constructed or adapted for the carriage both of passengers and of goods or burden of any description whose unladen weight does not exceed two tons and which either:-

- (a) are so constructed or adapted that the driving power of the engine is, or by the appropriate use of the controls of the vehicle can be, transmitted to all the wheels of the vehicle; or
- (b) satisfied the following conditions as to construction -
 - (i) the vehicle is permanently fitted with a rigid roof, with or without a sliding panel,
 - (ii) the area of the vehicle to the rear of the driver's seat is -
 - (A) permanently fitted with at least one row of transverse seats (fixed or folding) for 2 or more passengers and those seats are properly sprung or cushioned and provided with upholstered back-rests, attached either to the seats or to a side or the floor of the vehicle; and
 - (B) lit on each side and at the rear by a window or windows of glass or other transparent material having an area or aggregate area of not less

¹ excludes pedal cycles

than 2 square feet on each side and not less than 120 square inches on the rear.

- (iii) the distance between the rearmost part of the steering wheel and the backrests of the row of transverse seats satisfying the requirements specified in subparagraph (ii) (A) (or, where there is more than one row of seats, the distance between the rearmost part of the steering wheel and the backrests of the rearmost row) is, when the seats are ready for use, not less than one-third of distance between the rearmost part of the steering wheel and the rearmost part of the floor of the vehicle.

Motor cycles

Motor cycles are mechanically propelled vehicles, other than auto-cycles, with not more than 4 wheels and whose unladen weight does not exceed 400 kilograms.

Auto cycles

Auto cycles are bicycles which have pedals and a motor attached which can be propelled by means of those pedals and by mechanical or electrical power from that motor and the swept volume of the cylinders of that motor does not exceed 50 cubic centimetres.

Motor tractors

Motor tractors are mechanically propelled vehicles which are not constructed themselves to carry any load and whose unladen weight does not exceed 7½ tons.

Trailer

- (a) means a vehicle which has no independent motive power of its own and which is drawn, or designed to be drawn, by a motor vehicle,
- (b) does not include a sidecar attached to a motor cycle, nor a farm implement that is not constructed or adapted for the conveyance of goods or burden of any description.

Weight Unladen

means the weight of a vehicle which:-

- (a) includes the body and all parts (the heavier being taken where alternative bodies or parts are used) which are necessary to, or ordinarily used with, the vehicle when working on a road;
- (b) excludes the weight of water, fuel or accumulators used for the purpose of the supply of power for the propulsion of vehicle or of loose tools and loose equipment.

Road Traffic Accidents

Definitions and Explanatory Notes

In this report, data on accidents refer to all road accidents reported to police stations and to insurance companies.

Road Traffic Accident

A road traffic accident is an accident between two or more vehicles, a vehicle and a cyclist, a vehicle and a pedestrian, a vehicle and a fixed object, such as a bridge, building, tree, post, etc, or a single vehicle that overturned on or near a public road.

Severity of accident

Road traffic accidents are classified into the following categories according to the severity of the accident.

Fatal accident - an accident resulting in the death of one or more persons. Prior to 2002, a fatal accident was defined as an accident where deaths occurred within 7 days. As from 2002, a fatal accident is defined as an accident where deaths occurred within 30 days.

Serious injury accident - An accident in which one or more persons are seriously injured.

Slight injury accident - An accident in which one or more persons are slightly injured.

The above three categories are jointly referred to as *casualty accidents*.

Non injury accident - An accident in which no one is killed or injured but which results in damage to the vehicle/s and/or other property only.

Casualty

Any person killed or injured in a road accident is referred to as a casualty.

Fatality - Any person killed during an accident, or within 30 days (7 days prior to 2002) as a result of an accident is referred to as a fatality.

Serious Injury - An injury for which a person is detained in hospital as an "in-patient" or any of the following injuries (whether or not he is detained in hospital): fractures, concussions, internal injuries, severe cuts and lacerations, crushings and severe general shock requiring medical treatment.

Slight Injury - An injury of minor character such as a sprain, bruise and cut not judged to be severe.

Road Transport and Road Traffic Accident Statistics – An overview (Island of Mauritius)

Year 2006

1. Vehicles registered in 2006

The number of vehicles registered at the National Transport Authority (NTA) at the end of the year 2006 was 319,440. This shows a net increase of 13,944 vehicles (4.6%) over the December 2005 figure of 305,496.

During the year 2006, the fleet was strengthened with the registration of 18,467 vehicles, of which 12,123 (65%) were new, 5,294 (29%) were imported second-hand and 1,050 (6%) were re-registered vehicles, i.e. those which had been previously de-registered (put off the road). During the same period, 4,523 vehicles were put off the road, resulting in a net addition of 13,944 vehicles to the existing fleet (Table 1.3 to 1.5).

2. Composition of the fleet

The composition of the fleet by type of vehicles is shown in Table 1.2. At the end of December 2006, the fleet consisted mainly of motorized two-wheelers (138,174 or 43%), and cars and dual-purpose vehicles (135,132 or 42%). The remaining 15 % comprised vans (24,522), lorries and trucks (12,272), buses (2,612) and other vehicles (6,728)

3. Vehicles used for the transport of passengers

3.1 Cars and dual purpose vehicles

The number of cars and dual purpose vehicles, which stood at 126,844 at the end of 2005, increased by 6.5% to reach 135,132 at the end of 2006. This increase was the result of the registration of 9,921 such vehicles (4,789 new, 4,570 imported second-hand and 562 re-registered) partly offset by 1,633 that were put off the road

Table 1.6 shows the age distribution of cars and dual purpose vehicles, at the end of December 2006. Some 37 % of them were under 5 years, 27% between 5 and 9 years, and the remaining 36%, 10 years and above.

3.2 Buses

At the end of December 2006, the number of buses was 2,612 compared to 2,560 a year ago, following the registration of 133 new buses and 81 put off the road during the year. Out of the 2,612 buses, 1,862 (71%) were “public” buses, operating with a road service license.

Table 1.7 which gives the age distribution of the fleet of public buses shows that 32% of them were under 5 years, 23% between 5 and 9 years and 45%, between 10 and 18 years.

4. Road traffic accidents

The number of road accidents registered during the year 2006 was 20,242, of which 1,947 (10%) caused casualties and 18,295 (90%) were non-injury accidents. Among the

accidents causing casualties, 122 (6%) were fatal, 296 (15%) caused serious injuries and 1,529 (79%) resulted in slight injuries.

Compared to the 2005 figure of 22,554, a fall of 10.3% is noted in total number of road accidents. Accidents causing casualties fell by 9.2% and non-injury accidents by 10.4%. Fatal and serious injury accidents rose by 5.2% and 0.3% respectively while slight injury accidents decreased by 11.8%.

The accident rate expressed as the number of accidents per 100,000 mid year population decreased from 1,869 in 2005 to 1,665 in 2006 and the number of accidents per 1,000 mid year registered motor vehicles from 76 to 65 (Table 2.1).

5. Vehicles involved in road accidents

During 2006, the total number of vehicles (motor and non- motor) involved in road accidents was 40,205, that is, 3,941 less than the 2005 figure of 44,146. The number of vehicles involved in accidents resulting in casualties was 3,007 in 2006 compared to 3,326 in 2005. Some 35% of these were private cars, 33% motor/ auto cycles, 12% vans and buses (Table 2.15).

6. Casualties

The number of casualties (fatalities and persons injured as a result of road accidents) declined by 8.6% from 2760 in 2005 to 2,522 in 2006. Among the casualties, 134 (5%) were fatal, 348 (14%) were seriously injured and the remaining 2,040 (81%) slightly injured.

Compared to 2005, the number of fatality (persons who died as a result of road accidents) dropped by 1.5%. The fatality rate expressed as the number of persons who died as a result of road accidents per 100,000 mid year population decreased from 11.3 in 2005 to 11.0 in 2006.

Among the casualties in 2006, 25% were passengers, 33% riders of auto/motor cycles, 22% pedestrians, 13% drivers and 7% pedal cyclists (Table 2.19).

7. Hit and run cases in accidents causing casualties

The number of accidents (causing casualties) that were involved in "hit and run" cases decreased by 17% from 153 in 2005 to 127 in 2006. Out of the 127 cases, 55% (70) involved vehicles only while the other 45% (57) involved both vehicles and pedestrians (Table 2.8).

**Main Road Transport and Road Accident Indicators,
2005 -2006 (Island of Mauritius)**

| | 2005 | 2006 | |
|---|----------------|----------------|--------------|
| Population (mid - year) | 1,206,346 | 1,215,619 | |

| Seriously injured | 261 | 281 | 237 | 266 | 288 | 216 | 291 | 245 | 358 | 348 |
| Slightly injured | 3,348 | 3,385 | 2,998 | 2,862 | 2,850 | 2,530 | 2,276 | 2,562 | 2,266 | 2,040 |
| 4. Fatality : | | | | | | | | | | |
| Rate per 100,000 population | 13.1 | 14.4 | 14.9 | 14.2 | 10.8 | 13.5 | 11.0 | 12.0 | 11.3 | 11.0 |
| Rate per 1,000 registered motor vehicles | 0.7 | 0.8 | 0.8 | 0.7 | 0.5 | 0.6 | 0.5 | 0.5 | 0.4 | 0.4 |
| Fatality index ³ | 3.9 | 4.2 | 5.0 | 5.0 | 3.9 | 5.4 | 4.8 | 4.9 | 4.9 | 5.3 |

¹ Exclude accidents involving bicycles only or bicycle and pedestrian.² From 1993 to 2001 figures are based on definition of fatal accidents where death occurred within 7 days.

As from 2002, figures are based on definition of fatal accidents where deaths occurred within 30 days as a result of road accidents.

³ Fatality index is the number of fatalities per 100 casualties.
