**DIGEST OF  
ROAD TRANSPORT  
STATISTICS**

**1989**

June 1989

(Price: Rs 75.00)

## **Foreword**

This is the sixth issue of the Digest of Road Transport Statistics published by the Central Statistical Office.

The digest is designed to bring together in a single report all available statistics on road transport and road traffic accidents. It thus contains information on different types of vehicles, public bus operation and road traffic accidents.

Data on vehicles have been compiled from the register of the National Transport Authority (NTA), and those on road traffic accidents were collected from all police stations through a specially designed form.

The figures published are the latest available as at the end of April 1990. Some of the figures are therefore provisional and subject to revision in later issues. Figures in successive issues of the digest supersede those appearing in previous ones.

In this issue, three new tables have been included:- (i) the number of accidents on different type of roads, (ii) the number of accidents by the number of vehicles involved and (iii) the number of accidents by the number of casualties.

It is hoped that the data presented in this report will be of valuable help to the public in general and to planners and policy-makers in particular.

The co-operation and assistance of the National Transport Authority, the Traffic Management Unit of the Ministry of Works and the Police, in the publication of this digest, are gratefully acknowledged here.

## **Road Transport Statistics - Year 1989**

### **1.1 Vehicles registered as at December 1989**

As at December 1989, the fleet of vehicles comprised some 107,500 vehicles representing an increase of 12% or a net addition of around 12,000 vehicles over 1988.

Two-wheeled vehicles i.e. motorcycles and autocycles accounted for 43% of the total with 36,800 autocycles and 10,600 motorcycles. There were 43,400 passenger cars inclusive of 11,500 dual purpose of vehicles, 5,900 lorries and trucks, 5,600 vans and 1,850 buses.

### **1.2 Net additions during the year 1989**

During 1989, the fleet of vehicles was renewed with the addition of around 14,000 vehicles of which 11,250 were new vehicles and 2,800, second-hand registrations. Some 2,400 vehicles were put off the road which brought the net addition to around 12,000.

Also, it is noted that since 1987 the fleet of passenger cars has been continuously renewed with the addition of around 2,800 cars every year. Last year 2,436 new cars were imported and second hand registration of cars numbered 1,264. Around 900 cars and dual purpose vehicles were put off the road.

The fleet of buses was also increased by 158 but since 71 old ones were put off the road, the net addition was only 87 which brought the total number to 1,858.

The number of motorcycles and autocycles increased by some 7,300 representing a 19% rise over the previous year.

As at December 1989, second-hand registration numbered 2,780 of which 1,200 or 43% related to imported vehicles. The remaining consisted of vehicles which had previously been put off the road but were re-registered during 1989.

### **1.3 Age composition of passenger cars and buses (public transport only)**

An estimate of the age distribution of cars including dual purpose vehicles (table 1.2 refers) shows that 27% of the fleet of cars were less than 5 years old. The category 15 years and over comprised 17,900 cars representing 41% of the total.

Table 1.3 on the age composition of the bus fleet (public transport only) shows that 43% of the fleet were under 5 years, 48% were between 5 and 15 years and 9% between 15 and 30 years.

## **2.1 Road Accidents**

Data collected from the records of the Police Stations show that during 1989 the number of road accidents reported increased by 10% to reach 9,085 from 8,250 the previous year. The accident rate measured in terms of the number of accidents per 1,000 motor vehicles was 89 compared to 91 in 1988. It is recalled that this index was 63 in 1984 and has been continuously increasing during the last five years to attain 91 in 1988. Last year, however this index dropped by one percentage point.

## **2.2 Casualties**

The 9,085 accidents resulted in 3,141 casualties of which 130 were fatal and 250 involved serious injuries. Pedestrians remain the most vulnerable category of road users with the highest proportion of casualties (33%). Casualties among riders and pedal cyclists have increased by around 10%. The injury rate, i.e., the number of injuries per 100,000 population rose from 283 in 1988 to 292 in 1989. On the other hand the fatality rate, i.e., the total number of deaths per 100,000 population remained almost at the same level as that for the previous period, i.e., at 12.

## **2.3 Vehicles involved**

The number of vehicles involved in the accidents increased by some 1,350 to reach 15,489. In 1989, the number of passenger cars involved in accidents amounted to some 8,300 representing 52% of the total number of vehicles. The rate of vehicles involved in accidents per 1,000 motor vehicles decreased to 150 from 156 in 1988 and 147 in 1987.

# VEHICLE STATISTICS

Part I - Vehicle Statistics

---

Definitions under Section 4 of Road Traffic Act of 1962 for different types of vehicles used in the report.

1. Heavy Motor Car

That is to say, mechanically propelled vehicles, other than vehicles classified under this section as motor cars, which are constructed themselves to carry a load or passengers and whose unladen weight exceeds  $2\frac{1}{2}$  tons.

2. Dual-purpose Vehicle

Means a vehicle, constructed or adapted for the carriage both of passengers and of goods or burden of any description whose unladen weight does not exceed two tons and which either :-

(a) is so constructed or adapted that the driving power of the engine is, or by the appropriate use of the controls of the vehicle can be, transmitted to all the wheels of the vehicle; or

(b) satisfies the following conditions as to construction -

(i) the vehicle is permanently fitted with a rigid roof, with or without a sliding panel,

(ii) the area of the vehicle to the rear of the driver's seat is -

(A) permanently fitted with at least one row of transverse seats (fixed or folding) for 2 or more passengers and those seats are properly sprung or cushioned and provided with upholstered back-rests, attached either to the seats or to a side or the floor of the vehicle;

and (B) lit on each side and at the rear by a window or windows of glass or other transparent material having an area or aggregate area of not less than 2 square feet on each side and not less than 120 square inches on the rear.

(iii) the distance between the rearmost part of the steering wheel and the backrests of the row of transverse seats satisfying the requirements specified in subparagraph (ii) (A) (or, where there is more than one row of seats, the distance between the rearmost part of the steering wheel and the backrests of the rearmost row) is, when the seats are ready for use, not less than one-third of distance between the rearmost part of the steering wheel and the rearmost part of the floor of the vehicle.

3. Motor Cycles

That is to say, mechanically propelled vehicles, other than auto-cycles or vehicles classified under this section as invalid carriages, with not more than 4 wheels and whose unladen weight does not exceed 400 kilograms.

4. Auto-Cycles

That is to say, bicycles which have pedals and a motor attached which can be propelled by means of those pedals and by mechanical or electrical power from that motor and the swept volume of the cylinders of that motor does not exceed 50 cubic centimetres.

5. Motor Tractor

That is to say, mechanically propelled vehicles which are not constructed themselves to carry any load and whose unladen weight does not exceed  $7\frac{1}{4}$  tons.

6. Trailer

- (a) means a vehicle which has no independent motive power of its own and which is drawn or designed to be drawn, by a motor vehicle,
- (b) does not include a sidecar attached to a motor cycle, not a farm implement that is not constructed or adapted for the conveyance of goods or burden of any description.

7. Weight Unladen

means the weight of a vehicle which :-

- (a) includes the body and all parts (the heavier being taken where alternative bodies or parts are used) which are necessary to or ordinarily used with the vehicle when working on a road;
- (b) excludes the weight of water, fuel or accumulators used for the purpose of the supply of power for the propulsion of vehicle or of loose tools and loose equipment.
