**(Price: Rs 75.00)**

## **Digest of Road Transport Statistics - 1990**

### **FOREWORD**

This is the seventh issue of the Digest of Road Transport Statistics published by the Central Statistical Office.

This digest is designed to bring together in a single report all available statistics on road transport and road traffic accidents. It thus contains information on different types of vehicles, public bus operations and road traffic accidents.

Data on vehicles have been compiled from the register of the National Transport Authority (NTA), and those on road traffic accidents were collected from all police stations through a specially designed form.

The figures published are the latest available as at the end of May 1991. Some of the figures are therefore provisional and subject to revision in later issues. Figures in successive issues of the digest supersede those appearing in previous ones.

It is hoped that the data presented in this report will be of valuable help to the public in general and to planners and policy-makers in particular.

The co-operation and assistance of the National Transport Authority, the Traffic Management Unit of the Ministry of Works and the Police in the publication of this digest, are gratefully acknowledged here.

## **Road Transport and Accident Statistics Year 1990**

### **1.1. Vehicles registered as at December, 1990**

As at December 1990, there were 123,500 vehicles registered at the National Transport Authority (NTA) representing an increase of 16,000 or 15% over the 107,500 in 1989. Slightly less than half of the fleet or 46% consisted of two-wheeled motor vehicles i.e. 45,000 auto-cycles and 12,000 motor-cycles; passenger cars accounted for 47,000 representing 38% of the total and the remaining 16% comprised lorries and trucks (6,600), vans (6,600) and buses (1,900).

### **1.2. Net addition during the year 1990**

From January to December 1990, 19,000 vehicles were added to the existing fleet; of these 16,300 were new and 2,800 second hand vehicles. As during the same period 3,100 vehicles were put off the road, the net addition works out to 16,000 only. Comparative figures for previous years are: 12,000 in 1989, 10,000 in 1988, 7,000 in 1987 and 2,600 only in 1986. It is also noted that the majority, 75% of the additional vehicles consisted of motor-cycles and auto-cycles.

### **1.3. Passenger Cars**

In 1990, the fleet of passenger cars inclusive of dual purpose vehicles was increased further with the addition of 3,400, new cars which brought the total registered as at December 1990 to nearly 47,000 representing 38% of the total number of vehicles. Following the constant renewal of the fleet during the last five years, an estimated age-distribution of motor cars shows that as at December 1990, 46% were aged under 10 years and 54% were in the category of 10 years and over.

It is recalled that a total of 17,000 passenger cars (11,500 new and 5,600 second hand) or an average of 3,400 per year have been registered during each year over the last five years. On the other hand 4,300 were put off the road so that the net addition during the last five years works out to 13,000 cars.

The ratio of the number of passenger cars per 1,000 persons consequently moved up to 45 in 1990 compared to 42 in 1989 and 35 in 1986.

### **1.4. Motor-cycles and Auto-cycles**

During the year 1990, the fleet of motor-cycles was considerably increased with the addition of 10,700 such vehicles which brought the total to 57,000 representing a 23% increase over the previous year. In fact, during the five year period 1986 - 1990 the number of two wheeled motor-vehicles has been almost doubled with the registration of 30,000 new auto-cycles and motor-cycles.

### **2.1. Road Accidents**

There were 10,300 road traffic accidents reported at the Police Stations during the year 1990 compared to 9,085 in 1989 representing an increase of 14% over the previous year. Consequently the accident rate, calculated as the number of accidents per thousand registered motor-vehicles, went up by one percentage point to reach 90. This ratio was 61 in 1983 and had reached a peak of 91 in 1988 before falling to 89 in 1989.

## **2.2. Casualties**

The number of casualties resulting from the 10,300 accidents was also 14% higher than in the previous year and numbered 3,575 of which 144 were fatal, 315 seriously injured and 3,116 suffered slight injury. In 1990, there were 144 persons killed in accidents compared to 130 in 1989 and 122 in 1988.

The fatality rate worked out as the total number of persons killed in the accidents per 100,000 population rose to 14 from 13 in 1989 and 11 in 1986.

An analysis of casualties by type of road users shows that pedestrians accounted for 32%, followed by passengers 27%, and motor-cycle riders 26%. With the increasing number of motor-cycles and auto-cycles on the road, casualties among riders have recorded a substantial rise of 44% numbering 928 compared to 643 in 1989.

The injury rate which shows the number of 'injury' per 100,000 population stood at 331 for the 1990 in comparison with 292 in 1989 and 284 in 1988.

## **2.3. Vehicles involved**

In 1990 there were 17,500 vehicles involved in accidents, 2,100 more than in the previous year. Passenger cars including taxis comprised 9,000 or 50% of all vehicles collided whilst two-wheeled motor vehicles, 3,000 representing 16%.

It is worth pointing out that in 1990 the number of two wheelers involved in accidents was increased by some 800 and was 32% higher than in the previous year.

SUMMARY DATA FOR 1990

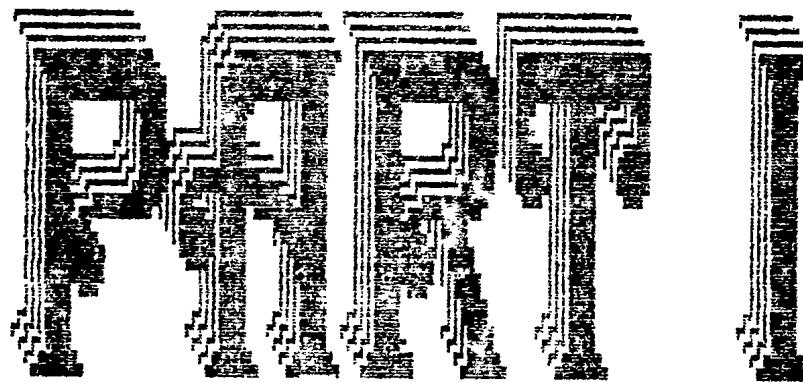

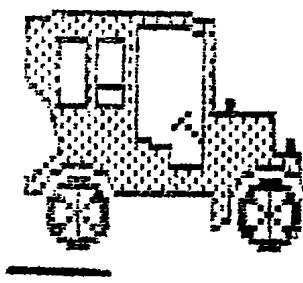

A. GENERAL

1. Population (as at end of June)	(Number)	1,036,833
2. Area of Island of Mauritius	(Sq. Kms)	1,865
3. Length of roads	(Kms)	1,801
4. Gross National Product (at factor cost)	(Rs Million)	30,900

B. ROAD TRAFFIC STATISTICS

	<u>1989</u> (Number)	<u>1990</u> (Number)	<u>Change</u> (%)
--	-------------------------	-------------------------	----------------------

1. <u>Vehicles on register</u>	107,512	123,545	+14.9
(of which two-wheelers)	(46,404)	(57,042)	+22.9
2. <u>Road accidents</u>			
Fatal accidents	116	130	+12.1
Serious injury accidents	197	235	+19.3
Other injury accidents	2,006	2,167	+ 8.0
Non-injury accidents	6,766	7,784	+15.0
Total recorded accidents	9,085	10,316	+13.5
Number of vehicles involved	15,489	17,562	+13.4
3. <u>Casualties (Total)</u>	3,141	3,575	+13.8
(of which)			
Killed	130	144	+10.8
Serious injured	250	315	+26.0
Other injured	2,761	3,116	+12.9

VEHICLE

STRUCTURE

Part I - Vehicle Statistics

-----

Definitions under Section 4 of Road Traffic Act of 1962 for different types of vehicles used in the report.

1. Heavy Motor Car

That is to say, mechanically propelled vehicles, other than vehicles classified under this section as motor cars, which are constructed themselves to carry a load or passengers and whose unladen weight exceeds  $2\frac{1}{2}$  tons.

2. Dual-purpose Vehicle

Means a vehicle, constructed or adapted for the carriage both of passengers and of goods or burden of any description whose unladen weight does not exceed two tons and which either :-

(a) is so constructed or adapted that the driving power of the engine is, or by the appropriate use of the controls of the vehicle can be, transmitted to all the wheels of the vehicle; or

(d) satisfies the following conditions as to construction -

(i) the vehicle is permanently fitted with a rigid roof, with or without a sliding panel,

(ii) the area of the vehicle to the rear of the driver's seat is -

(A) permanently fitted with at least one row of transverse seats (fixed or folding) for 2 or more passengers and those seats are properly sprung or cushioned and provided with upholstered back-rests, attached either to the seats or to a side or the floor of the vehicle;

and (B) lit on each side and at the rear by a window or windows of glass or other transparent material having an area or aggregate area of not less than 2 square feet on each side and not less than 120 square inches on the rear.

(iii) the distance between the rearmost part of the steering wheel and the backrests of the row of transverse seats satisfying the requirements specified in subparagraph (ii) (A) (or, where there is more than one row of seats, the distance between the rearmost part of the steering wheel and the backrests of the rearmost row) is, when the seats are ready for use, not less than one-third of distance between the rearmost part of the steering wheel and the rearmost part of the floor of the vehicle.

### 3. Motor Cycles

That is to say, mechanically propelled vehicles, other than auto-cycles or vehicles classified under this section as invalid carriages, with not more than 4 wheels and whose unladen weight does not exceed 400 kilograms.

### 4. Auto-Cycles

That is to say, bicycles which have pedals and a motor attached which can be propelled by means of those pedals and by mechanical or electrical power from that motor and the swept volume of the cylinders of that motor does not exceed 50 cubic centimetres.

### 5. Motor Tractor

That is to say, mechanically propelled vehicles which are not constructed themselves to carry any load and whose unladen weight does not exceed  $7\frac{1}{4}$  tons.

### 6. Trailer

- (a) means a vehicle which has no independent motive power of its own and which is drawn or designed to be drawn, by a motor vehicle,
- (b) does not include a sidecar attached to a motor cycle, not a farm implement that is not constructed or adapted for the conveyance of goods or burden of any description.

### 7. Weight Unladen

means the weight of a vehicle which :-

- (a) includes the body and all parts (the heavier being taken where alternative bodies or parts are used) which are necessary to or ordinarily used with the vehicle when working on a road;
- (b) excludes the weight of water, fuel or accumulators used for the purpose of the supply of power for the propulsion of vehicle or of loose tools and loose equipment.

\*\*\*\*\*

Table 1.1 - Road networks, 1986 - 1990

As at end of .....	Length of roads (Kms)				Percentage of roads paved	Density of total network in kilometres per sq. km 1/
	Motorways	Main roads	Secondary roads	Other roads	Total	
1986	27	840	577	339	1,783	92
1987	27	840	577	339	1,783	92
1988	29	856	577	339	1,801	93
1989	29	856	577	339	1,801	93
1990	29	856	577	339	1,801	93

1/ density of total network in kms per sq. km is the ratio of the total number of kms of roads to the area of Mauritius (1865 sq. kms)

Table 1.2 - Registration of vehicles<sup>1/</sup> 1986 - 1990

Part II Road Traffic Accidents

Definitions

1. Casualties

The total number of fatalities and injuries resulting from road accidents.

2. Fatalities

Deaths occurring as a result of road accident if the victim dies within a week the accident occurs.

3. Injuries

The reported number of persons seriously or slightly injured in road accidents.

(i) Serious Injury

An injury for which a person is detained in hospital as an "in-patient" or any of the following injuries whether or not he is detained in hospital

- (a) fractures
- (b) concussions
- (c) internal injuries
- (d) severe cuts and lacerations
- (e) crushings
- (f) severe general shock requiring medical treatment

(ii) Slight Injury

An injury of minor character such as :

- (a) sprain
- (b) bruise
- (c) cut not judged to be severe

4. Severity of accident

Each accident is classified according to the degree of injury sustained most by the road users, namely, Fatal, Serious, Slight or No injury.

Table 2.1 - Road traffic accidents, motor-vehicles involved and casualties, 1986 - 1990

Number

Year	Accidents	Motor-vehicles involved	Casualties	Population (mid-year)	Motor-vehicles registered (mid-year)
1986	5,707	9,410	2,834	993,851	76,612
1987	7,059	11,869	3,294	1,003,794	80,893
1988	8,259	14,153	3,004	1,016,596	90,647
1989	9,065	15,489	3,141	1,031,443	101,816
1990	10,316	17,562	3,575	1,036,833	114,708

Table 2.2 - Accident rate, 1986 - 1990

Year	Accidents			Motor-vehicles involved	
	Number	Per 100,000 population	Per 1,000 registered motor-vehicles	Number	Per 1,000 registered motor-vehicles
1986	5,707	574	74	9,410	123
1987	7,059	703	87	11,869	147
1988	8,259	812	91	14,153	156
1989	9,085	881	89	15,489	152
1990	10,316	995	90	17,562	153

Fig. 2.1 - Number of road traffic accidents  
(1985-1990)

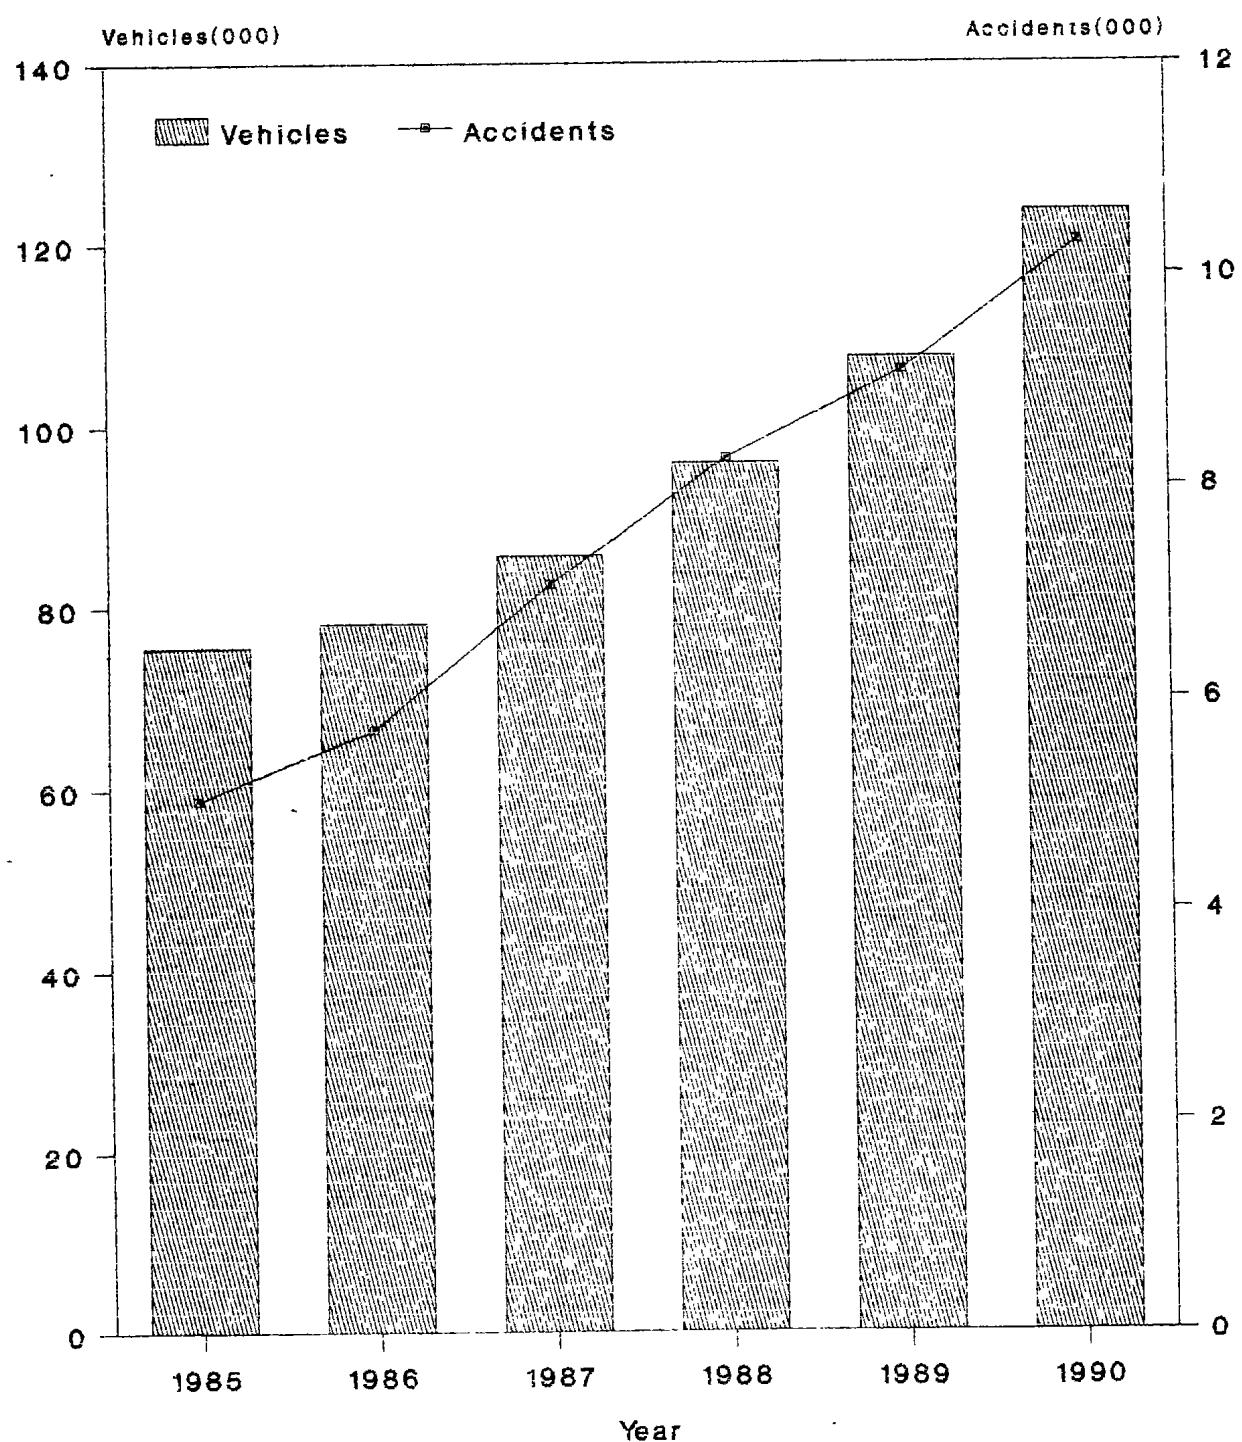

Table 2.3 - Fatalities and fatality index<sup>1/</sup>, 1986 - 1990

Year	Fatalities			Fatality index
	Number	Per 100,000 population	Per 1,000 registered motor-vehicles	
1986	109	11.0	1.4	3.8
1987	112	11.2	1.4	3.4
1988	122	12.0	1.3	4.1
1989	130	12.6	1.3	4.1
1990	144	13.9	1.3	4.0

<sup>1/</sup> Fatality index is the ratio of the number of fatalities to the total number of casualties expressed as a percentage

Table 2.4 - Number of injuries by degree of injury and injury rate, 1986 - 1990

Year	Degree of injury			Injuries	
	Serious	Slight	Total injured	Per 100,000 population	Per 1,000 registered motor-vehicles
1986	226	2,499	2,725	274.2	35.6
1987	255	2,927	3,182	317.0	39.3
