Digest of Road Transport Statistics - 1991

FOREWORD

This is the eighth issue of the Digest of Road Transport Statistics published by the Central Statistical Office.

This digest deals with all available statistics on road transport and road traffic accidents. It thus contains information on different types of vehicles, public bus operations and road traffic accidents.

Data on vehicles have been compiled from the register of the National Transport Authority (NTA), and those on road traffic accidents were collected from all police stations through a specially designed form.

The figures published are the latest available as at the end of May 1992. Some of the figures are therefore provisional and subject to revision in later issues. Figures in successive issues of the digest supersede those appearing in previous ones.

It is hoped that the data presented in this report will be of valuable help to the public in general and to planners and policy-makers in particular.

The co-operation and assistance of the National Transport Authority, the Traffic Management Unit of the Ministry of Works and the Police in the publication of this digest, are gratefully acknowledged here.

D. Zmanay

N O T E S

ABBREVIATIONS

The following abbreviations are used:

No. : Number

000 : Thousand

% : Percentage

Km : Kilometre

M/ton : Metric ton : 1,000 kilos

Rs : Rupees

c.i.f. : Cost, insurance and freight

SYMBOLS

- Nil or negligible

... Not available

-- Not applicable

Road Transport and Accident Statistics

- Year 1991 -

1.1 Vehicles registered as at end of 1991

As at December 1991, the fleet of vehicles registered at the National Transport Authority (N.T.A.) comprised some 140,200 vehicles, of which nearly half were two-wheelers (53,834 auto cycles and 14,740 motor cycles). Passenger cars numbered 50,016 representing 36% and the remaining 15% were made up mainly of lorries (7,200), vans (7,600) and buses (2,000).

1.2 Net addition during 1991

During the year 1991, the fleet was renewed with the addition of around 16,700 vehicles which represents an increase of 13.5% over 1990. In fact, some 20,000 vehicles were registered of which 3,400 were second hand vehicles; but, as 3,200 were put off the road during the same period, the net addition works out to 16,700. This figure is slightly higher than the net addition of 16,000 in 1990. Over the last five years, the fleet of vehicles has been increasing on average by around 13% yearly.

1.3 Passenger cars

In 1991, the total number of passenger cars inclusive of dual purpose vehicles increased by 3,200 or 7% to 50,016. On average, every month, some 370 cars were registered and 120, put off the road. The ratio of the number of passenger cars per 1,000 persons works out to 48 against to 45 in 1990.

Table 1.2 on the age-distribution of passenger cars shows that nearly half of the fleet on the road was under 10 years - a result of the continued renewal of the fleet over the last five years.

2.1 Road accidents

During the year 1991, 13,300 accidents were reported to the police against 10,300 in 1990, representing a substantial increase of 3,000 or 29% over the previous year. The accident rate (the number of accidents per thousand registered motor vehicles) consequently went up to a high 95 from 90 in 1990. It is recalled that this ratio was 61 in 1983. The number of accidents per 100,000 population also shot up to 1,272 from 995 a year ago.

2.2 Casualties

The number of casualties went up by 9% to 3,879, of which, 163 were fatal, 274 sustained serious injuries and 3,442 were slightly injured.

The number of persons killed in accidents keeps on increasing every year, with 109 in 1986, 144 in 1990 and 163 in 1991. The fatality rate, that is, the ratio per 100,000 population, rose to 15 from 14 in 1990 and 11 in 1986.

The most vulnerable class of road users were riders of motor and autocycles which accounted for the highest proportion or one third of all casualties, followed by pedestrians 28%. Casualties among pedestrians dropped by 5%. The injury rate, the number of injuries per 100,000 population went up to 354 in 1991 from 331 in 1990.

2.3 Motor vehicles involved

The total number of motor vehicles involved in accidents increased by 5,000 or 29% to 22,600 from 17,600 in 1990. Table 2.3 on motor vehicles involved, by type, shows that nearly half of the vehicles involved comprised private cars and taxis followed by motorised two wheelers, 20%. A considerable rise has been observed in two wheelers involved in accidents; the number went up by 50%, passenger cars also rose by 29%.

The ratio of motor vehicles involved in accidents per 1,000 motor vehicles which stood at 152 in 1990 and 152 in 1989 jumped to 161 in 1991.

WEDDING

INVITATION

Part I - Vehicle Statistics

Definitions under Section 4 of Road Transport Act of 1962 for different types of vehicles used in the report.

1. Heavy Motor Car

That is to say, mechanically propelled vehicles other than vehicles classified under this section as motor cars, which are constructed themselves to carry a load or passengers and whose unladen weight exceeds $2\frac{1}{2}$ tons.

2. Dual-purpose Vehicle

Means a vehicle, constructed or adapted for the carriage both of passengers and of goods or burden of any description whose unladen weight does not exceed two tons and which either:-

- (a) is so constructed or adapted that the driving power of the engine is, or by the appropriate use of the controls of the vehicle can be, transmitted to all the wheels of the vehicle; or
- (b) satisfied the following conditions as to construction -
 - (i) the vehicle is permanently fitted with a rigid roof, with or without a sliding panel,
 - (ii) the area of the vehicle to the rear of the driver's seat is -
 - (A) permanently fitted with at least one row of transverse seats (fixed or folding) for 2 or more passengers and those seats are properly sprung or cushioned and provided with upholstered back-rests, attached either to the seats or to a side on the floor of the vehicle;
 - and (B) lit on each side and at the rear by a window or windows of glass or other transparent material having an aggregate area of not less than 2 square feet on each side and not less than 120 square inches on the rear;
 - (iii) the distance between the rearmost part of the steering wheel and the backrests of the top of transverse seats satisfying the requirements specified in subparagraph (ii) (a) (i), where there is more than one row of seats, the distance between the rearmost part of the steering wheel and the backrests of the rearmost row is, when the seats are ready for use, not less than one-third of distance between the rearmost part of the steering wheel and the rearmost part of the floor of the vehicle.

3. Motor Cycles

That is to say, mechanically propelled vehicles, other than autocycles or vehicles classified under this section as invalid carriages, with not more than 4 wheels and whose unladen weight does not exceed 400 kilograms.

4. Auto-Cycles

That is to say, bicycles which have pedals and a motor attached which can be propelled by means of those pedals and by mechanical or electrical power from that motor and the swept volume of the cylinders of that motor does not exceed 50 cubic centimetres.

5. Motor Tractor

That is to say, mechanically propelled vehicles which are not constructed themselves to carry any load and whose unladen weight does not exceed $7\frac{1}{4}$ tons.

6. Trailler

- (a) means a vehicle which has no independent motive power of its own and which is drawn or designed to be drawn, by a motor vehicle;
 - (b) does not include a sidecar attached to a motor cycle, nor a farm implement that is not constructed or adapted for the conveyance of goods or burden of any description.

7. Weight Unladen

means the weight of a vehicle which-

- (a) includes the body and all parts (the heavier being taken where alternative bodies or parts are used) which are necessary to or ordinarily used with the vehicle when working or a road;
 - (b) excludes the weight of water, fuel or accumulators used for the purpose of the supply of power for the propulsion of vehicle or of loose tools and loose equipment.

Table 1.1 - Road networks, 1987 - 1991

As at end of	Length of roads (Kms)				Percentage of roads paved	Density of total network in kilometres per sq. km ¹
	Motorways	Main roads	Secondary roads	Other roads	Total	
1987	27	840	577	339	1,753	92 0.96
1988	29	856	577	339	1,801	93 0.97
1989	29	856	577	339	1,801	93 0.97
1990	29	856	577	339	1,801	93 0.97
1991	29	826	577	339	1,831	93 0.98

1/ density of total network in kms per sq. km is the ratio of the total number of kms of roads to the area of Mauritius (1,865 sq. kms)

Part II Road Traffic Accidents

Definitions

1. Casualties

The total number of fatalities and injuries resulting from road accidents.

2. Fatalities

Deaths occurring as a result of road accident if the victim dies within a week the accident occurs.

3. Injuries

The reported number of persons seriously or slightly injured in road accidents.

(i) Serious Injury

An injury for which a person is detained in hospital as an "in-patient" or any of the following injuries whether or not he is detained in hospital.

- (a) fractures
- (b) concussions
- (c) internal injuries
- (d) severe cuts and lacerations
- (e) crushings
- (f) severe general shock requiring medical treatment

(ii) Slight Injury

An injury of minor character such as:

- (a) sprain
- (b) bruise
- (c) cut not judged to be severe

4. Severity of accident

Each accident is classified according to the degree of injury sustained most by the road users, namely, Fatal, Serious, Slight or No injury.

Table 2.1 - Road traffic accidents, motor-vehicles involved and casualties, 1987 - 1991

Number

Year	Accidents	Motor-vehicles involved	Casualties	Population (mid-year)	Motor-vehicles registered (mid-year)
1987	7,059	11,869	3,294	1,001,607	30,893
1988	8,259	14,153	3,004	1,009,332	90,647
1989	9,055	15,489	3,141	1,017,307	101,816
1990	10,316	17,562	3,575	1,024,571	114,703
1991	13,439	22,835	4,025	1,035,807	131,771

Table 2.2 - Accident rate, 1987 - 1991

- 24 -

YEAR	Accidents			Motor-vehicles involved per 1,000 registered motor-vehicles
	Number	Per 100,000 population	Per 1,000 registered motor-vehicles	
1987	7,059	703	87	11,869
1988	8,259	812	91	14,153
1989	9,085	881	89	15,489
1990	10,316	995	90	17,562
1991	13,439	1,297	102	22,835

Fig2.1- Fleet evolution & road accidents
(1986-1991)

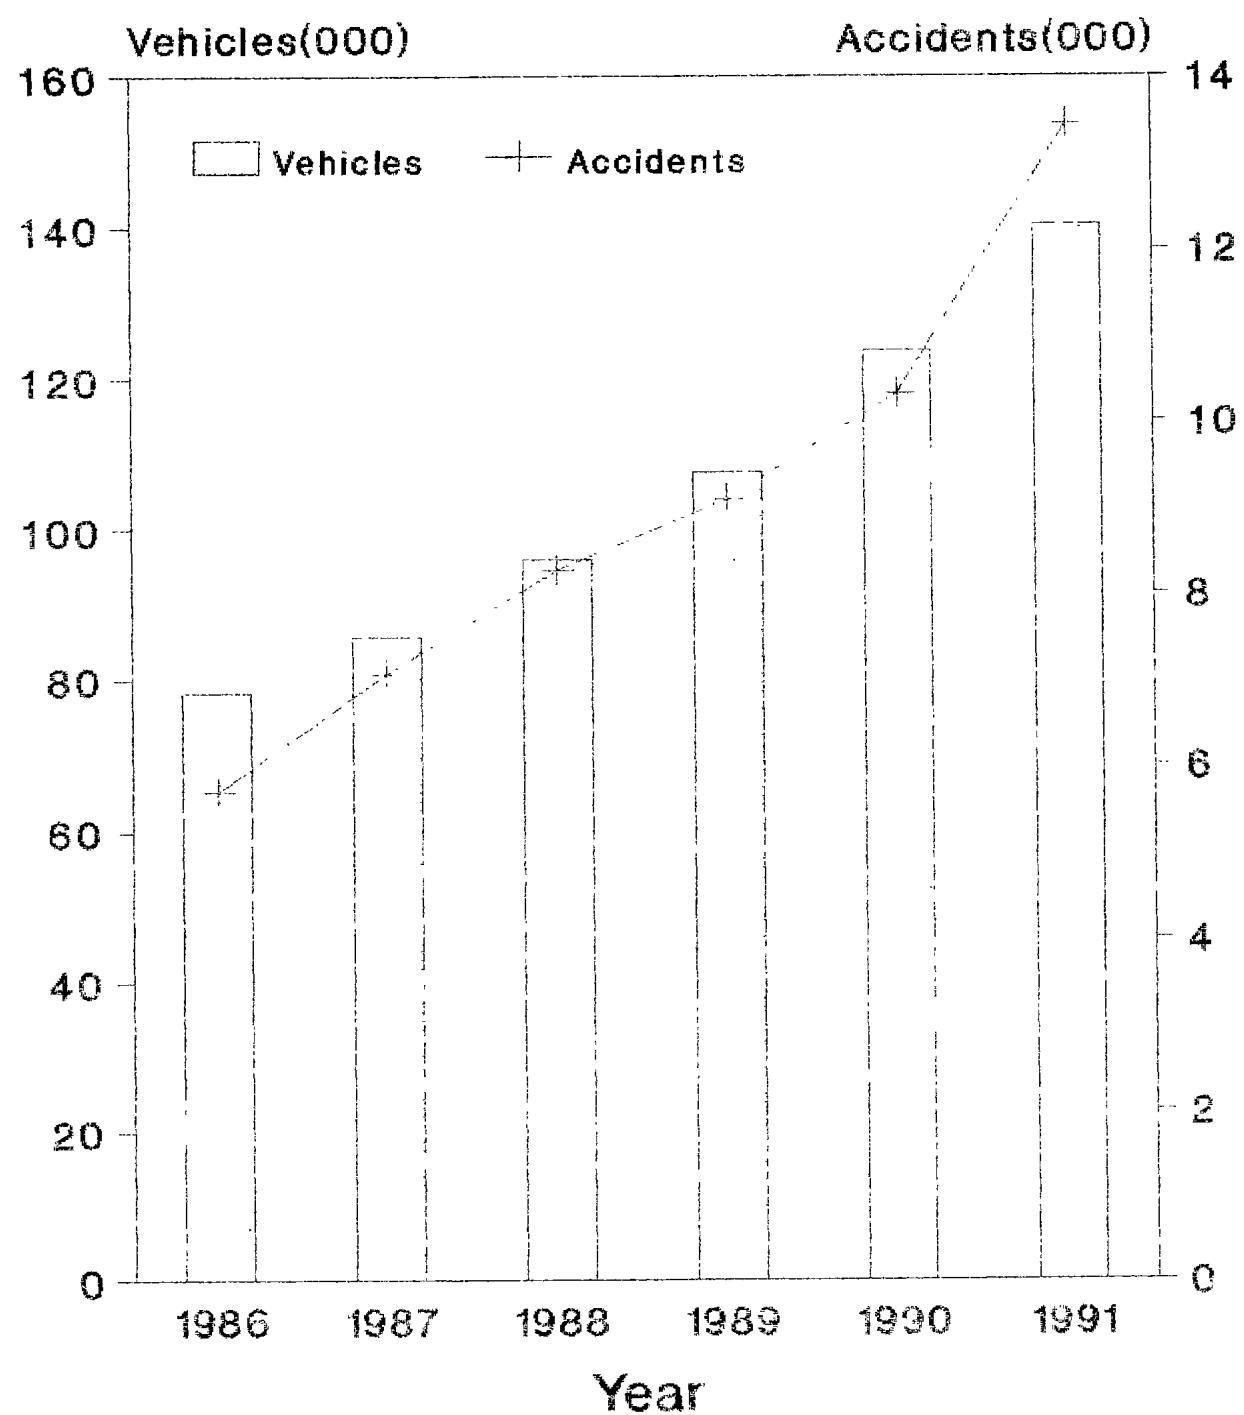

Table 2.3 - Fatalities and fatality index^{1/}, 1987 - 1991

Year	Fatalities		Per 1,000 registered motor- vehicles	Fatality index
	Number	Per 100,000 population		
1987	112	11.2	1.4	3.4
1988	122	12.0	1.3	4.1
	130	12.6	1.3	4.1
1990	144	13.9	1.3	4.0
1991	168	16.2	1.3	4.2

^{1/} Fatality index is the ratio of the number of fatalities to the total number of casualties expressed as a percentage.

Table 2.4 : Number of injuries by degree of injury and injury rate,
1987 - 1991

Year	Degree of injury			Injuries	
	Serious	Slight	Total injured	Per 100,000 population	Per 1,000 registered motor- vehicles
1987	255	2,927	3,182	317.0	39.3
1988	282	2,600	2,882	283.5	31.8
