

PRODUCER PRICE INDEX - MANUFACTURING (PPI-M)

Food, Beverages and Tobacco (October - December 1997)

Introduction

A Producer Price Index - Manufacturing (PPI-M) covering the "Food, beverages and tobacco" sub-group is published quarterly by the Central Statistical Office since 1994. The PPI-M measures the average change in the selling prices received by manufacturers for the part of their output that is sold on the domestic market. The prices include taxes on products but exclude Sales Tax. This present issue of the indicator shows changes in the indices for the "Food, beverages and tobacco" sector during the fourth quarter of 1997 and provides revised figures for the previous months and quarters. It is recalled that the indices are computed using calendar year 1993 as the reference period.

2. PPI-M: Food, Beverages and Tobacco

2.1 Monthly change

The overall Producer Price Index for "Food, beverages and tobacco" stood at 134.4 at the end of December, following slight increases of 0.1% in both October and November and 0.3% in December 1997.

In October 1997, the index for the "Food" sector rose by 0.1%: a 6.5% increase in the prices of dairy products was partly offset by a 1.1% decrease in "Slaughtering, preparation and preserving meat". In November, the index moved up by 0.2%, the net effect of a 0.8% increase in "Slaughtering, preparation and preserving meat" and decreases of 0.3% and 0.2% in "Canning and processing of fish and similar products" and "Manufacture of tea", respectively. In the following month, the index increased by 0.3% mainly due to price increases in "Manufacture of vegetable and animal oils and fats".

The index for "Manufacture of beverages and tobacco" with nearly 45% of the total weight moved up to 138.2 (+0.3%) in December 1997. The prices of soft drinks registered consecutive increases of 0.2%, 0.1% and 1.7% in October, November

and December, respectively. Table 1 shows the evolution of the monthly indices by industry group since January 1997.

2.2 Quarterly change

Table 2 gives the evolution of the Producer Price Index on a quarterly basis, the quarterly index being the average of the monthly indices. The average index for the fourth quarter of 1997 rose by 0.1% over the previous quarter as a result of the combined effect of a 0.1% rise in the "Food" sector and another 0.2% in "Beverages and tobacco".

Compared to the corresponding quarter of last year, the overall index rose by 4.1%: there was a decrease of 2.2% in the "Food" sector whilst "Manufacture of beverages and tobacco" rose by 12.6%. Within the "Food" sector, the 2.2% decrease was the net effect of a 29.7% decrease in "Manufacture of grain mill products" and significant increases in "Manufacture of dairy products" (+16.2), "Canning and processing of fish and similar products" (+13.8%), and "Manufacture of bakery products" (+9.1%). The increase in the "Beverages and tobacco" sector was mostly the result of higher prices of tobacco products following increases in excise duties. Other details on changes that have occurred at the group and sub-group level are given in Table 2.
