

PRODUCER PRICE INDEX - MANUFACTURING (PPI-M)
Food, Beverages and Tobacco
(July - September 1998)

Introduction

This issue of the "Economic and Social Indicators" presents indices for the "Food, beverages and tobacco" sector for the period July to September 1998 as well as revised figures for previous months. It is recalled that the Producer Price Index (PPI-M) measures the average change in the selling prices received by manufacturers for the part of their output that is sold on the domestic market. The price is the amount realised by a producer when selling his products. This includes excise duties but excludes the value-added tax. The indices are computed using calendar year 1993 as the reference period.

2. PPI-M: Food, Beverages and Tobacco

2.1 Monthly change

At the end of September 1998 the overall index for "Food, beverages and tobacco" stood at 145.3 following increases of 0.7% and 0.8% in July and August and a decrease of 0.6% in September.

The index for the "Food" sector, which stood at 136.2 in June 1998, increased to 137.7 in July and 139.8 in August and stayed at this level in September. In July the 1.1% increase was due to higher prices of products in "Canning and preserving of fruits and vegetables" (+5.3%) and in "Slaughtering, preparation and preserving meat" (+2.2%). In August, the 1.5% increase was mainly the effect of a 10% rise in "Manufacture of vegetable and animal oils and fats"

The index for "Beverages and tobacco" remained quite stable during July and August before a 1.3% decrease in September. This decrease was mainly due to slightly lower prices charged for tobacco and spirits.

2.2 Quarterly change

Table 2 gives the evolution of the Producer Price Index on a quarterly basis, the quarterly index being the average of the monthly indices. The average index, which stood at 135.4 for the 1st Quarter 1998, rose to 139.4 and 145.5 for the second and third quarter respectively. From the second to the third quarter the increase works out to 4.4% representing the combined effect of a 2.5% rise in the "Food" sector and another 6.7% in "Beverages and tobacco".

Compared to the corresponding quarter of last year, the overall index for the third quarter rose by 8.6% as a result of a 6.2% rise in the "Food" sector and another 11.5% in the "Manufacture of beverages and tobacco". Within the "Food" sector, prices went up in "Manufacture of vegetable and animal oils and fats" (+17%) and "Manufacture of grain mill products" (+13.8%). The increase in the "Beverages and tobacco" sector was mostly the result of higher prices of spirits and tobacco products. Other details on changes that have occurred at the group and sub-group level are given in Table 2.
