

PRODUCER PRICE INDEX - MANUFACTURING (PPI-M)

Food, Beverages and Tobacco

(October – December 1999)

Introduction

This issue of the "Economic and Social Indicators" presents producer price indices for the "Food, beverages and tobacco" sector for the period October to December 1999 as well as revised figures for previous months. It is recalled that the Producer Price Index (PPI-M) measures the average change in the selling prices received by manufacturers for the part of their output that is sold on the domestic market. The indices are computed using calendar year 1993 as the reference period.

2. PPI-M: Food, Beverages and Tobacco

2.1 *Monthly change*

The overall index for "Food, beverages and tobacco", which stood at 154.5 in September 1999, increased slightly by 0.2 point in October, kept its level in November, then rose by 0.1 point to reach 154.8 in December 1999 (Table 1).

Changes in the sub-index "Food" during the 4th quarter were due, mainly, to fluctuations in producer prices of tea and products in the "Canning" industry. In October, the price of tea fell by 0.9%, but then increased by 1.3% in December 1999. The index for "Canning and preserving of fruits and vegetables" rose by 4.2% in October followed, two months later, by a further 1.3% in December whilst that for "Canning and processing of fish and similar products" went up by 0.6% in October and then fell by 0.2% the following month.

The sub-index "Beverages and tobacco" remained at 178.6 throughout the 4th quarter 1999.

Monthly sub-indices by ISIC group for the period 1993 to 1999 are given in tables 2 and 3.

2.2 Quarterly change

Table 4 gives the evolution of the Producer Price Index on a quarterly basis, the quarterly index being the simple average of the monthly indices. The average index, which stood at 154.5 for the 3rd quarter 1999, rose to 154.8 in the 4th quarter 1999. This 0.2% increase was mainly the effect of price increases in "Canning and preserving of fruits and vegetables" (+4.7%).

Compared to the corresponding quarter of 1998, the overall index for the 4th quarter 1999 rose by 6.4% as a result of the combined effect of a 17.3% increase in "Manufacture of beverages and tobacco" and a 3.0% fall in the "Food" sector. The increase in "Beverages and tobacco" was mostly the result of higher prices of alcoholic beverages. Within the "Food" sector, there were significant decreases of 16.6% and 7.4% in "Manufacture of grain mill products" and "Manufacture of vegetable and animal oils and fats" respectively. On the other hand, the index for "Canning and preserving of fruits and vegetables" rose by 5.3%. Other details on changes that have occurred at the group and sub-group level are given in Table 4.
