

PRODUCER PRICE INDEX - MANUFACTURING (PPI-M)
Food, Beverages and Tobacco
(January - March 2000)

Introduction

This issue of the "Economic and Social Indicators" presents producer price indices for the "Food, beverages and tobacco" sector for the period January to March 2000 as well as revised figures for previous months. It is recalled that the Producer Price Index (PPI-M) measures the average change in the selling prices (including excise duties but excluding value added tax) received by manufacturers for the part of their output that is sold on the domestic market. The indices are computed using calendar year 1993 as the reference period.

2. PPI-M: Food, Beverages and Tobacco

2.1 Monthly index

At the end of March 2000 the overall index for "Food, beverages and tobacco" stood at 154.6 representing a 0.2 point decrease compared to December 1999 (Table 1). In fact, after increasing by 0.6% and 0.2% in January and February, respectively, the index declined by 0.9% in March 2000.

The sub-index for the "food" sector rose by 0.5% in January, mainly due to increases in the producer prices of tea (6.8%) and grain mill products (3.1%). In February it fell by 1.1%, mainly as a result of a 7.1% decrease in the prices of "vegetable and animal oils and fats", remaining at this level through March 2000.

Increases of 4.1% and 3.2% in the prices of soft drinks and wine respectively moved the "beverages and tobacco" sub-index by +0.6% to 179.7. A further +6.9% increase in soft drink prices, coupled with a +2.5% rise in the prices of spirits, pushed the sub-index up by a further 1.6% in February. The index then declined by 1.8% in March to 179.3, mainly as the effect of a 6.7% decrease in the prices of spirits.

The evolution of the monthly index by ISIC group for the period 1993 to 1999 is given in Tables 2 and 3.

2.2 Quarterly index

Table 4 gives the evolution of the Producer Price Index on a quarterly basis, the quarterly index being the simple average of the monthly indices. The average index, which stood at 154.8 for the 4th quarter of 1999, rose by 0.4% to reach 155.5 for the first quarter of 2000. At the sub-sector level, the index for the "food" sector declined slightly by 0.1% whilst that of "beverages and tobacco" increased by 1.0%. Details of changes by ISIC group are given in Table 4.

Compared to the corresponding quarter of 1999, the overall index for the first quarter rose by 6.8% as a result of a rise of 16.3% in "beverages and tobacco", partly offset by a fall of 1.8% in the "food" sector. Within the "food" sector, prices of "vegetable and animal oils and fats" fell by 13.4% whilst those of tea and products in the group "canning and preserving of fruits and vegetables" increased by 6.8% and 6.3%, respectively. The increase in the "beverages and tobacco" sector was mostly the result of higher prices of spirits (+20.2%), wine (+9.5%) and soft drinks (+9.0%). Other details on changes that have occurred at the group and sub-group level are given in Table 4.
