

# **PRODUCER PRICE INDEX - MANUFACTURING (PPI-M)**

## **Food, Beverages and Tobacco**

**(July - September 2000)**

### **1. Introduction**

This issue of the "Economic and Social Indicators" presents producer price indices for the "Food, beverages and tobacco" sector for the period July to September 2000 as well as revised figures for previous months. It is recalled that the Producer Price Index (PPI-M) measures the average change in the selling prices (including excise duties but excluding value added tax) received by manufacturers for the part of their output that is sold on the domestic market. The indices are computed using calendar year 1993 as the reference period.

### **2. PPI-M: Food, Beverages and Tobacco**

#### **2.1 Monthly index**

The overall index for "Food, beverages and tobacco" which stood at 153.8 in June 2000 increased by 3.1 points to 156.9 in July, kept this level in August and then fell by 0.3 point to 156.6 in September 2000 (Table 1).

The sub-index for the "Food" sector increased from 133.4 in June to 134.7 in July (+0.9%), mainly due to increases in the producer prices of "Slaughtering, preparation and preserving meat" (2.9%), "Canning and processing of fish" (3.7%) and "Grain mill products" (2.1%). It maintained this level in August and then fell by 0.5% in September to reach 134.0, following a drop of 4.7% in the price of "Grain mill products".

In July 2000, the index of "Beverages and tobacco" grew by 3.1% to reach 184.8 as a result of an increase of 1.7% in the price of "Wine". The index then remained at this level in August and grew by 0.1% in September to reach 184.9.

The evolution of the monthly index by ISIC group for the period 1993 to 1999 is given in Tables 2 and 3.

## 2.2 Quarterly index

Table 4 gives the evolution of the Producer Price Index on a quarterly basis, the quarterly index being the average of the monthly indices. The average index, which stood at 154.1 for the 2nd quarter of 2000 rose to 156.8 during the 3rd quarter 2000. This 1.8% rise was mainly due to the overall effect of price increases of 0.3% in the "Manufacture of food" and 3.1% in the "Manufacture of beverages and tobacco".

Compared to the corresponding quarter of 1999, the overall index for the 3rd quarter increased by 1.5% as a result of a price rise of 3.4% in "Beverages and tobacco" partly offset by a drop of 0.5% in the price of "Food". The increase in price of "Beverages and tobacco" was derived from increases of 11.2% in "Soft drinks" and 9.1% in "Wine" coupled with a decline of 4.6% in "Distilling, blending, bottling of spirit". Within the "Food" sector, a decrease of 12.3% was noted in the price of "Vegetables, animal oils and fats" while increases were registered from the following manufactured products: "Tea" (8.4%), "Canning and preserving of fruits and vegetables" (6.8%), "Canning and processing of fish and similar products" (4.4%) and "Biscuits and sweets" (3.6%). Other details on changes that have occurred at the group and sub-group level are given in Table 4.
