#### WAGE RATE INDEX (WRI)

(*Base: fourth quarter 2011 = 100*)

#### 3rd Quarter 2016

#### 1. Introduction

This issue of the Economic and Social Indicators (ESI) on wage rate index presents data for the third quarter of 2016 together with backward series of indices.

The wage rate index measures changes in the price of labour, i.e., changes in the average rates actually paid by employers to their employees for work during normal working hours.

The methodology used for computing the index is given in the technical note at Annex 1.

#### 2. Movement of the overall wage rate index

The wage rate index (Base = fourth quarter 2011) increased by 1.0% or 1.4 points to reach 135.3 in the third quarter 2016 from 133.9 in the second quarter 2016. (Tables 1 & 2)

Compared to 3rd quarter 2015, the wage rate index which stood at 128.5, increased by 5.3% or 6.8 points. (Table 3)

# 3(a) Movement of the sub indices, 2nd Quarter 2016 to 3rd quarter 2016

Most industry groups registered increases in their wage rates which were partly offset by decreases in other industry groups resulting in a net increase of 1.0% in the overall index.

The high increase in 'Agriculture, forestry and fishing' is explained by higher wages and regular allowances paid in the crop season which falls mainly in the third quarter.

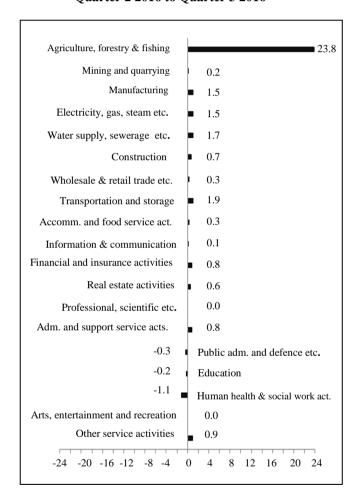

Main increases were in the following industry groups (Chart 1 & Table 2):

Agriculture forestry and fishing	23.8%	
Transportation and storage	1.9%	
Water supply, sewerage, waste management and remediation activities	1.7%	
Electricity, gas, steam and air conditioning supply	1.5%	
Manufacturing	1.5%	

Decreases were registered in the following industry groups:

Human health and social work activities	-1.1%
Public administration and defence; compulsory social security	-0.3%
Education	-0.2%

Chart 1: % Change in Wage Rate Index from Quarter 2 2016 to Quarter 3 2016

The wage rate index for the General Government sector which comprises Ministries, Government departments and agencies operating under them, municipalities, district councils and Rodrigues Regional Assembly decreased by 0.4% or 0.2 point to reach 145.8 in the third quarter 2016, from 146.4 in the second quarter 2016, due to less regular allowances paid, mainly in the health sector. The General Government sector accounts for around 32% of the total weight of the wage rate index.

# 3(b) Movement of sub - indices, 3rd quarter 2015 to 3rd quarter 2016

Table 3 compares the indices for the third quarter 2016 with those for the corresponding quarter 2015. A general increase was registered in all industry groups with the exception of 'Arts, entertainment and recreation'.

Main increases were registered in the following industry groups:

Water supply; sewerage, waste management and remediation activities	11.9%
Real estate activities	11.7%
Education	8.7%
Construction	7.8%
Other service activities	7.2%

Decrease was in

Arts, entertainment and recreation -5.5%

#### 4. Past trend

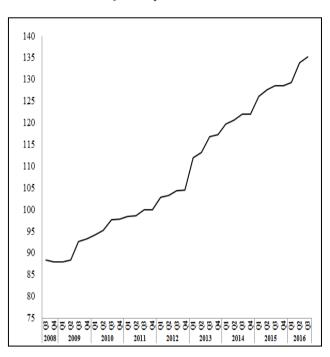

Table 4 presents the quarterly indices from first quarter 2007 to third quarter 2016. Indices for 2007 to 2011 have been worked out using third quarter 2006 as base. As from 2012, the base period used is fourth quarter 2011.

To enable comparison between the two series, chain link series with fourth quarter 2011 as base has been worked out and is given in Table 5. The series are not strictly comparable because of different base periods and weighting patterns.

Chart 2 depicts the trend of the quarterly wage rate indices, which shows a general upward movement in the index throughout the quarters. The increases in the 3<sup>rd</sup> quarter 2008, 1<sup>st</sup> quarter 2013 and 2<sup>nd</sup> quarter 2016 are mainly explained by salary revision in the Government sector.

## Chart 2 – Wage rate indices, 3rd Quarter 2008 - 3rd Quarter 2016

#### **Technical Note**

## Methodology used for the compilation of the Wage Rate Index

#### 1. Definition

The Wage Rate Index (WRI) measures changes in the price of labour, i.e., changes in the average rates actually paid by employers to their employees for work during normal working hours.

### 2. Approach adopted

To show genuine changes in the price of labour, it would have been necessary for wages of specific workers at specific establishments to be measured over time. Since this is not possible, the next best approach has been adopted, that is, to follow changes in the wages of groups of employees performing the same jobs. This gives a measure of changes in wage rates of specific occupations but has the following limitations:

- (i) any changes in the mix of employees within the selected occupations is bound to affect the calculated rates and hence the corresponding sectoral indices. Such changes occur, for example, with a new intake of employees in a specific group - when the wages of the new recruits pull down the average wages for the whole group from one period to the next.
- (ii) wage adjustments resulting from changes in the tasks associated with a particular occupation, which cannot be separated from pure price changes of labour.
- (iii) it is difficult to separate the effects of productivity from the overall change.

#### 3. Coverage

The wage rate index is based on wage rates in 'large' establishments only. Employment in these establishments accounted for around 55% of total employment in year 2016. 'Large' establishments comprise sugar cane plantations of 10 hectares or more; tea plantations of 2 hectares or more; other agricultural and non-agricultural establishments having 10 or more employees as well as General Government Services, i.e. ministries, government departments and agencies operating under them; municipalities; district councils and Rodrigues Regional Assembly.

Time-rated as well as piece-rated wage earners and salaried employees are covered. Apprentices, workers on probation, part-time workers and employees working on a temporary basis are excluded.

#### 4. Calculating the Wage Rate Index

A Laspeyres formula is used. The occupational structure is held constant with reference to the base period of the index, i.e. December 2011. The relative changes in average wage rates are measured at the occupational level and these changes are then weighted to give a combined measure of the change. The following formula is used

$$I_{t} = \sum_{i} w_{i} (R_{i}^{t} / R_{i}^{o}) \qquad X \quad 100$$

$$\sum_{i} w_{i}$$

where  $I_t$  = index for quarter t compared to base period o

 $w_i = N^o_i R^o_i$  which represents the total wages paid to all employees in the i <sup>th</sup> occupation base period, December 2011

 $R_i^{\circ}$  = wage rate of occupation i in base period, December 2011

 $R_i^t$  = wage rate of occupation i in quarter t

The index is first calculated for each industry group and the overall index (covering all industry groups) is computed as a weighted average of the individual industry group indices.

#### 5. Reference period

The base period for the index is quarter 4 2011=100 as from the first quarter of 2012. The wage rate indices for the first, second, third and fourth quarters of 2007 and 2008 are based on wage rates applicable during the months of February, May, August and November respectively. As from 2009, the wage rate indices for the first to fourth quarter are based on wage rates applicable during the months of March, June, September and December respectively.

#### 6. Weights

Two sets of weights are used:

- (i) The weights used for each occupation within a given industry group are based on the distribution of wages by occupation as obtained from the Population Census 2011.
- (ii) The weights for each industry group are based on the distribution of earnings by industry group as obtained from the Survey of Employment and Earnings carried out in around 2,700 'large' establishments in March 2011.

#### 7. Wage rates used

The wage/salary rates of specific occupations, used in the calculation of the index, are the rates paid for normal time work, comprising basic wages and salaries, cost of living allowances and other guaranteed and regular allowances and piece rates paid at the end of each pay period. Overtime payments are therefore excluded.
